**GlobalSantaFe Corporation**

2002 Annual Report

## CORPORATE PROFILE

Weatherford is a leading worldwide drilling contractor offering a full range of premium equipment and drilling management services. The Company's diverse and technologically advanced fleet of 58 offshore rigs includes premium and heavy-duty, harsh-environment jackups, semisubmersibles, and dynamically positioned ultra-deepwater drillships. Additionally, the Company has four rigs under construction. The Company also has 31 land rigs and is the world's leading provider of turnkey drilling and drilling management services.

## MISSION STATEMENT

Our Mission is to be the world's premier drilling service provider. As we shape the future of drilling, we will excel in the following areas:

**Client** By providing an injury-free workplace.

**Environment** By protecting the environment in which we operate.

**Values** By maintaining the highest standards of personal and business ethics.

**Customers** By exceeding customer expectations through the deployment of a highly skilled workforce and a diversified range of premium equipment and drilling management services.

**Employees** By providing our employees with challenging careers that encourage and reward exceptional performance.

**Shareholders** By increasing long-term shareholder value through operational excellence and financial discipline.

# 2002 Financial Highlights

*(Dollars in millions)*

## For the Year

Revenues .....	\$ 2,017.7
Net Income .....	\$ 277.9
Capital Expenditures .....	\$ 574.1
Marine Rig Utilization .....	89%
Land Rig Utilization .....	69%
Turnkey Wells Drilled - Worldwide .....	78

## At Year-End

Cash and Cash Equivalents .....	\$ 677.0
Properties and Equipment, Net .....	\$ 4,194.0
Total Assets .....	\$ 5,808.2
Long-term Debt .....	\$ 925.2
Shareholders' Equity .....	\$ 4,234.2
Number of Rigs .....	89

## COMPANY OVERVIEW

- One of the world's largest offshore drilling contractors
- Technologically advanced fleet of 58 offshore drilling rigs including premium jackups and heavy-duty, harsh-environment jackups; semisubmersibles; dynamically positioned, ultra-deepwater drillships; 31 land rigs; plus four rigs under construction—two high-performance jackups and two ultra-deepwater semisubmersibles
- Drilling operations in the majority of the world's major markets, including the Gulf of Mexico, the North Sea, Eastern Canada, West Africa, the Middle East, the Mediterranean, South America and Southeast Asia
- Strongest balance sheet in the offshore drilling sector
- Approximately 8,800 employees representing more than 50 nationalities

GlobalSantaFe ordinary shares are traded on the New York Stock Exchange. Ticker symbol: GSF.

# Letter to our Shareholders

---

One year ago, GlobalSantaFe Chairman Bob Rose and I described our vision for the company. That vision was “a company capable of serving customers in any major market with any type of drilling equipment, while providing highly experienced personnel with well engineering expertise and other technical skills.” That vision is now a reality.

## **Power of Balance**

The balance GlobalSantaFe now possesses—in geographic coverage, equipment types and services—has set the foundation for superior results for both customers and shareholders.

The company's geographic coverage is especially powerful. In 2002, improved international reach helped GlobalSantaFe balance market risk. Soft demand in the North Sea, particularly for semisubmersible rigs, and in the Gulf of Mexico was offset by relatively strong demand in West Africa, the Middle East and Southeast Asia.

Furthermore, as a global company, GlobalSantaFe was able to relocate rigs to capitalize on opportunities in robust markets and reduce exposure in weaker markets.

The quality of GlobalSantaFe's offshore rig fleet was another distinct advantage in 2002. When demand is soft, customers have more rigs to choose from, making equipment quality the decisive factor in most cases. Our utilization rate in the highly competitive Gulf of Mexico jackup market illustrates how premium equipment can win business and keep rigs employed even in weak markets.

Recognizing the appeal of quality equipment, we've used our financial strength to invest in our fleet by making strategic upgrades, especially during weak markets when costs are at their lowest. GlobalSantaFe's emphasis on quality, premium equipment will grow with the delivery in the first half of 2003 of a newly built high-performance jackup rig, the *GSF Constellation I*.

GlobalSantaFe served customers in 2002 with a balanced array of services. Our Applied Drilling Technology Inc. (ADTI) subsidiary provides the most comprehensive turnkey drilling service in the world. Challenger Minerals Inc. (CMI) uses its geological and geophysical capabilities to assist our customers by attracting outside investors to their drilling projects, thereby creating additional business

The balance GlobalSantaFe now possesses—in geographic coverage, equipment types and services—has set the foundation for superior results for both customers and shareholders.

opportunities for ADTI in the Gulf of Mexico and our North Sea-based well engineering group. CMI and its outside investors were involved with 20 percent of ADTI's 96 projects in the Gulf of Mexico in 2002 and established a presence in the North Sea with participation in our well engineering group's West Heather project.

#### **Adapting to Customer Needs**

Major oil companies continue to be GlobalSantaFe's largest customers. They are demanding customers whose selection criteria generally include equipment quality, company size, operating efficiency and safety and environmental performance. We have increasingly seen our customers prefer to work with a limited number of contractors and are proud to be a preferred contractor to some of the world's largest oil and gas companies. These customers typically offer longer-term contracts on large projects, providing us with a greater revenue backlog.

We also serve the needs of independent oil and gas companies. We believe that in the future the North Sea market will imitate the Gulf of Mexico market of the late 1980s and early 1990s, when independents became more active in the region. The most recent evidence of this trend occurred early in 2003 when a large U.S. independent acquired a significant producing property in the North Sea from one of the major oil companies.

For two reasons, GlobalSantaFe is well positioned to benefit from this emerging trend. First, extensive experience in the North Sea makes the company a natural choice as a drilling contractor. Second, our ability to provide turnkey services and drilling and completion management services through the company's

**THE DRILLSHIP *GLOMAR JACK RYAN*,  
AT WORK OFFSHORE AUSTRALIA, IS PART  
OF OUR TECHNOLOGICALLY ADVANCED FLEET.**

As a global company, GlobalSantaFe was able to relocate rigs to capitalize on opportunities in robust markets and reduce exposure in weaker markets.

---

North Sea-based well engineering group should appeal to independents that, unlike the majors, may not have large dedicated drilling departments.

#### **Progress in Integration**

Following the merger of Global Marine and Santa Fe International in late 2001, which formed GlobalSantaFe, a major goal was to identify the best practices of both legacy companies and integrate them to deliver the most efficient service to customers and positive financial results to shareholders.

While there are several examples to cite, the most important is a strong safety program. In 2002, employees worldwide participated in behavioral-based safety process training,

while approximately 1,200 supervisors received additional training in advanced safety auditing. The result was a steady quarter-by-quarter improvement in our safety record and, by year's end, the best full-year safety performance ever seen at either legacy company.

---

**LISTENING TO OUR CUSTOMER NEEDS  
INSPIRED THE JACKUP GSF CONSTELLATION I.**

#### **Prospects for 2003 and Beyond**

As this report is being prepared, the prospect of war in Iraq and an unstable Venezuela are creating uncertainty in world oil markets. GlobalSantaFe is not immune to the effects of these conflicts. In Venezuela, for example, our land rigs are currently idle. Any conflict in the Middle East would certainly affect our business in the short run.

Overall, we believe drilling demand will be weaker in 2003 than in 2002. Much of that softness will be in the North Sea. Major oil company activity in this market

Recognizing the appeal of quality equipment,  
we've used our financial strength to invest in our fleet  
by making strategic upgrades.

---

appears likely to remain soft, and we anticipate the expected transition from majors to independent oil companies dominating the region to take several years to fully develop.

On the positive side, jackup rig supply and demand offshore West Africa, Southeast Asia, the Mediterranean and Arabian Gulf are relatively balanced. We also expect near full employment of our jackup rigs working in the Gulf of Mexico in 2003.

For the longer term, we are convinced that GlobalSantaFe has the right business strategy and an excellent future. Our strategy of combining a premium fleet with a skilled, experienced workforce serves the interests of both customers and shareholders. Meanwhile, worldwide demand for petroleum products continues to grow, and respected independent research suggests sufficient recoverable petroleum reserves around the world to develop for decades to come.

**THE HEAVY-DUTY, HARSH-ENVIRONMENT JACKUP  
GSF GALAXY II HAS BEEN WORKING OVER FOUR YEARS  
ON A MAJOR GAS DEVELOPMENT OFF EASTERN CANADA.**

#### **Continuity for Shareholders, Customers and Employees**

Today, GlobalSantaFe appeals to customers worldwide. The company is an industry leader known for its financial strength. Our leadership team at GlobalSantaFe is well respected industry-wide and possesses deep and diverse experience.

For all of these reasons, I felt very comfortable announcing in January that I would retire as president and chief executive officer effective May 6, 2003. I will be succeeded by Jon Marshall, currently executive vice president and chief operating officer. Jon and I have worked closely since the merger, and I am confident that the change of leadership will be seamless.

The result was a steady quarter-by-quarter improvement in our safety record and, by year's end, the best full-year safety performance ever seen at either legacy company.

Jon is a graduate of the U.S. Military Academy at West Point who began his career with Global Marine in 1979. His diverse management experience began as project manager for ADTI, and later he served as president of both ADTI and CMI. In 1995, Jon became group vice president of Global Marine, responsible for worldwide turnkey operations, integrated drilling services and exploration and production. In May 1998, he was appointed executive vice president and chief operating officer.

In short, Jon is experienced, dedicated and extremely capable. Under his leadership, shareholders, customers and employees can look forward to GlobalSantaFe continuing to be one of the world's premier drilling contractors.

## Financial Strength

**GLOBALSANTAFE USES ITS FINANCIAL STRENGTH  
TO KEEP THE SEMISUBMERSIBLE *GLOMAR CELTIC*  
SEA AND OTHER RIGS UPGRADED.**

I want to thank our shareholders for their continued support. Also, I want to acknowledge the employees of GlobalSantaFe for their hard work in a year of great challenges and opportunities. It has been a privilege

to be part of such a great group of people dedicated to making our company an industry leader.

Sincerely,

C. Stedman Garber, Jr.  
President and Chief Executive Officer

# Operational Highlights

## Fleet

In 2002, GlobalSantaFe upgraded a number of rigs, increasing the company's ability to win business and earn higher dayrates. Furthermore, GlobalSantaFe relocated eleven rigs from various regions, which helped the company seize better opportunities in more active regions.

## Services

The contract drilling segment accounted for nearly 80 percent of GlobalSantaFe's revenues in 2002. Drilling management services, provided by ADTI and the company's North Sea-based well engineering group, contributed approximately 19 percent of 2002 revenues. Participation in oil and gas projects through Challenger Minerals Inc. generated the balance of revenues.

## Operating Standards and Safety

The company's safety performance improved steadily throughout the year as more employees participated in our Advanced Safety Auditing and FOCUS (Field Observation Continuously Upgrading Safety) training initiatives. Our fully integrated Management System was implemented fleet-wide and achieved full compliance with the ISM (International Safety Management) Code of Standards during 2002.

### EARNINGS CONFERENCE CALL

On Wednesday, April 23, 2003, GlobalSantaFe is scheduled to release its first quarter 2003 financial results before trading opens on the New York Stock Exchange. On April 23, 2003, at 10:00 a.m. Central Time (11:00 a.m. Eastern Time), the Company is scheduled to hold an earnings conference call to discuss the results.

Interested parties may participate in the conference by calling 913-981-5571, confirmation code 364669. The call is also available through the Company's website at [www.gsfdrill.com](http://www.gsfdrill.com). It is recommended that listeners connect to the website prior to the conference call to ensure adequate time for any software download that may be needed to hear the webcast. Replays will be available starting at 1:00 p.m. Central Time (2:00 p.m. Eastern Time) on the day of the conference call by webcast on the Company's website or by telephoning 719-457-0820, confirmation code 364669. Both services will discontinue replays at 7:00 p.m. Central Time on April 30, 2003.

## FORWARD-LOOKING STATEMENTS

Under the Private Securities Litigation Reform Act of 1995, companies are provided a "safe harbor" for discussing their expectations regarding future performance. We believe it is in the best interests of our shareholders and the investment community to use these provisions and provide such forward-looking information. We do so in this report and other communications. Forward-looking statements are often but not always identifiable by use of words such as "anticipate," "believe," "budget," "could," "estimate," "expect," "forecast," "intend," "may," "might," "plan," "predict," "project," "should," and "will."

Our forward-looking statements include statements about the following subjects:

- our possible or assumed results of operations;
- our funding and financing plans;
- the dates drilling rigs will become available following completion of current contracts;
- the dates our rigs that are under construction are expected to be delivered;
- projected cash outlays, the timing of such outlays and expected sources of funding in connection with the rigs that are under construction;
- our belief that a Venezuelan tax lien and customs claim will not impact the operations of the rigs within Venezuela;
- our contract drilling and drilling management services revenue backlogs and the amounts expected to be realized in 2003;
- our expectations regarding the impact our suspension of drilling operations in Kuwait will have on our results of operations;
- our expectations regarding the length of time mobile assets will be operating in given locations and our resulting conclusions regarding the future tax consequences of operating in those locations;
- our plans to implement a business restructuring that will better integrate the operations of the Company and change the U.S. tax classification of certain subsidiaries before the occurrence of any events that could give rise to a tax liability;
- the fact that Jon A. Marshall will succeed C. Stedman Garber, Jr. as President and Chief Executive Officer and will stand for election as a director of the Company at the 2003 annual general meeting of shareholders;
- the expected outcomes of legal and administrative proceedings, their materiality, and their expected effects on our financial position and results of operations;
- our expectation that our effective tax rate will continue to fluctuate from year to year as our operations are conducted in different taxing jurisdictions;
- the amount of the Company's net actuarial loss on its pension plans expected to be recognized in pension plan cost in 2003;
- our expectations regarding future conditions in various geographic markets in which we operate and the prospects for future work and dayrates in those markets;
- expected transition expenses in connection with the Merger between Global Marine and Santa Fe International and our belief that they are not indicative of the Company's ongoing operations;
- the fact that we do not anticipate using ordinary shares to satisfy future purchase obligations in connection with our Zero Coupon Convertible Debentures;
- our estimated capital expenditures in 2003;

- our expectation that we will fund various commitments, primarily related to our debt and capital lease obligations, leases for office space and other property and equipment as well as commitments for construction of drilling rigs, with cash generated from operations but may use a portion of the proceeds of the 5% Notes to satisfy these obligations;
- our ability to service indebtedness;
- our ability to meet all of our current obligations, including working capital requirements, capital expenditures and debt service, from our existing cash and marketable securities balances, the net proceeds from our 5% Notes and future cash flow from operations;
- the anticipated effect of the required adoption of SFAS No. 143 in 2003 and the required adoption of SFAS No. 146;
- the results of our sensitivity analyses to assess the impact of oil price changes under certain dayrate contracts;
- our expectation that, if required, any additional payments made under certain fully defeased financing leases would not be material to our financial position or results of operations in any given year;
- our belief that our exposure to interest rate fluctuations is not material to our financial position, results of operations or cash flows;
- our belief that credit risk in our commercial paper, money-market funds and Eurodollar time deposits with a variety of financial institutions with strong credit ratings is minimal;
- the adequacy of our valuation allowance in connection with net operating loss carryforwards;
- the costs, adequacy and availability of insurance; and
- any other statements that are not historical facts.

Our forward-looking statements speak only as of the date of this report and are based on currently available industry, financial, and economic data and our operating plans. They are also inherently uncertain, and investors must recognize that events could turn out to be materially different from our expectations.

Factors that could cause or contribute to such differences include, but are not limited to:

- the discovery of additional issues and/or opportunities for further synergies as we continue to integrate the administration, operations and accounting records and systems of Global Marine and Santa Fe International following the Merger, which could require further operating, administrative and/or accounting adjustments;
- higher than anticipated accruals for performance-based compensation due to better than anticipated Company performance, higher than anticipated severance expenses due to unanticipated employee terminations, higher than anticipated legal and accounting fees due to unanticipated financing or other corporate transactions, and other factors that could increase G&A expenses;
- changes in rig utilization and dayrates in response to the level of activity in the oil and natural gas industry, which is significantly affected by indications and expectations regarding the level and volatility of oil and natural gas prices, which in turn are affected by such things as political, economic and weather conditions affecting or potentially affecting regional or worldwide demand for oil and natural gas, actions or anticipated actions by OPEC, inventory levels, deliverability constraints, and futures market activity;
- the extent to which customers and potential customers continue to pursue ultra-deepwater drilling;
- exploration success or lack of exploration success by our customers and potential customers;
- our ability to enter into and the terms of future drilling contracts;
- our ability to win bids for turnkey drilling operations;
- rig availability;

## **PART I**

### **Items 1. and 2. *Business and Properties***

GlobalSantaFe Corporation (“GlobalSantaFe” or the “Company”) is a leading worldwide oil and gas drilling contractor, owning or operating a high quality, technologically advanced fleet of over 100 marine and land drilling rigs. The Company’s fleet currently includes 13 floating rigs, 44 cantilevered jackup rigs, 31 land rigs and one platform rig. In addition, the Company or its affiliates operate 11 platform rigs for third parties, and it participates in a joint venture that operates two semisubmersible rigs for third parties. The Company provides offshore oil and gas contract drilling services to the oil and gas industry worldwide on a daily rate (“dayrate”) basis. The Company also provides offshore oil and gas drilling management services on either a dayrate or completed-project, fixed-price (“turnkey”) basis, as well as drilling engineering and drilling project management services, and it participates in oil and gas exploration and production activities. Business segment and geographic information is set forth in Note 13 of Notes to Consolidated Financial Statements in Item 8 of this Annual Report on Form 10-K. The Company is a Cayman Islands company, with its executive offices in Houston, Texas.

Unless otherwise provided, the term “Company” refers to GlobalSantaFe Corporation and, unless the context otherwise requires, to its predecessors and consolidated subsidiaries. Substantially all of the Company’s businesses are conducted by subsidiaries of GlobalSantaFe Corporation.

### **Merger of Santa Fe International Corporation and Global Marine Inc.**

On November 20, 2001, Santa Fe International Corporation (“Santa Fe International”) and Global Marine Inc. (“Global Marine”) consummated their business combination with the merger (the “Merger”) of an indirect wholly owned subsidiary of Santa Fe International with and into Global Marine, with Global Marine surviving the Merger as a wholly owned subsidiary of Santa Fe International. In connection with the Merger, Santa Fe International was renamed GlobalSantaFe Corporation. At the effective time of the Merger, each issued and outstanding share of common stock, par value \$0.10 per share, of Global Marine was converted into the right to receive 0.665 ordinary shares, par value \$0.01 per share, of GlobalSantaFe (“GlobalSantaFe Ordinary Shares”). Approximately 118 million GlobalSantaFe Ordinary Shares were issued in connection with the Merger.

The Merger was accounted for as a purchase business combination in accordance with accounting principles generally accepted in the United States of America. As the stockholders of Global Marine owned slightly over 50% of GlobalSantaFe after the Merger, Global Marine was considered the acquiring entity for accounting purposes. Accordingly, the historical basis of Global Marine in its assets and liabilities has been carried forward to the consolidated financial statements of GlobalSantaFe Corporation. The assets and liabilities of Santa Fe International were recorded at estimated fair market value at the date of the Merger in the consolidated financial statements of GlobalSantaFe, with the excess of the purchase price over the sum of such fair values recorded as goodwill. The \$2.6 billion purchase price was calculated using the number of Santa Fe International ordinary shares outstanding immediately prior to the Merger and a \$14.67 per share average trading price of Global Marine’s common stock, as adjusted for the merger ratio (\$22.06 per share, as adjusted), for a period of time immediately before and after the Merger was announced, plus the estimated fair value of Santa Fe International’s outstanding stock options.

### **Background of Santa Fe International and Global Marine**

At the time of the Merger, Santa Fe International was a leading international offshore and land contract driller of oil and natural gas wells and owned and operated a high-quality, technologically advanced fleet of 26 marine drilling rigs and 31 land drilling rigs located in 16 countries throughout the world. In addition, Santa Fe International operated 13 marine drilling rigs owned by third parties. Santa Fe International primarily contracted its drilling rigs, related equipment and crews to oil and gas companies on a dayrate basis. As part of its contract drilling services, Santa Fe International also provided third-party rig operations and incentive drilling services to the international oil and gas industry. In the area of drilling management services, Santa Fe International provided drilling engineering and project management services. Santa Fe International was incorporated in its current form under the laws of the Cayman Islands in 1990.

At the time of the Merger, Global Marine was a major domestic and international offshore drilling contractor, with a modern, diversified fleet of 33 mobile offshore drilling rigs worldwide. Global Marine provided offshore drilling services on a dayrate basis in the U.S. Gulf of Mexico and internationally. Global Marine also provided drilling management services on a turnkey basis. As part of its drilling management services, Global Marine provided planning, engineering and management services beyond the scope of its traditional contract drilling business. Global Marine also engaged in oil and gas exploration, development and production activities principally in order to facilitate the acquisition of turnkey contracts for its drilling management services operations.

## Contract Drilling

Substantially all of the Company's domestic offshore contract drilling operations are conducted by GlobalSantaFe Drilling Company ("GSFDC"), a wholly owned subsidiary headquartered in Houston, Texas. International offshore contract drilling operations are conducted by subsidiaries of the Company with operations in 22 countries throughout the world.

*Offshore Rig Fleet.* The Company has a modern, diversified fleet of 57 mobile offshore drilling rigs and one platform rig. The Company's mobile offshore drilling rigs include six cantilevered heavy-duty harsh environment jackups, 38 cantilevered jackups, nine semisubmersibles, three ultra-deepwater, dynamically positioned drillships and one moored drillship. All of the Company's offshore rigs, with the exception of the *Britannia* jackup and the platform rig, were placed into service in 1974 or later, and, as of January 31, 2003, the average age of the Company's offshore fleet was approximately 19 years.

The Company's fleet is deployed in major offshore oil and gas operating areas worldwide. The principal areas in which the fleet is currently deployed are the U.S. Gulf of Mexico, West Africa, the North Sea, Southeast Asia, North Africa, the Middle East and Canada.

The following table lists the rigs in the Company's offshore drilling fleet as of January 31, 2003, indicating the year each rig was placed in service, each rig's maximum water and drilling depth capabilities, current location, customer, and the date each rig is estimated to become available.

**Offshore Rig Fleet**

<b>Platform</b>						
Rig 82 .....	1968	N/A	20,000 ft.	North Sea	Shell	12/03

(1) As currently equipped.

(2) Estimated based on the anticipated completion date of current commitments, including executed contracts, letters of intent, and other customer commitments for which contracts have not yet been executed.

**Rig Types.** Jackup rigs have elevating legs which extend to the sea bottom, providing a stable platform for drilling, and are generally preferred in water depths of 400 feet or less. All of the Company's jackup rigs have drilling equipment mounted on cantilevers, which allow the equipment to extend outward from the rigs' hulls over fixed drilling platforms and enable operators to drill both exploratory and development wells. In addition, eight of the Company's jackups have been equipped with skid-off packages, which allow the drilling equipment to be transferred to fixed production platforms.

The Company owns one of the world's largest fleets of heavy-duty harsh environment jackup rigs in service in the industry. Three of the Company's rigs, the *GSF Galaxy I*, *GSF Galaxy II* and *GSF Galaxy III*, are Universe class rig designs capable of operating in water depths up to 400 feet and are currently qualified to operate year-round in the harsh environment of the central North Sea in water depths of up to 360 feet. The Company's three other heavy-duty harsh environment jackup rigs, the *GSF Monarch*, *GSF Monitor* and *GSF Magellan*, are Monarch class rig designs capable of operating in water depths of up to 350 feet. These rigs are able to operate year-round in the central North Sea in water depths of up to 300 feet.

Semisubmersible rigs are floating offshore drilling units with pontoons and columns that, when flooded with water, cause the unit to partially submerge to a predetermined depth. Most semisubmersibles are anchored to the sea bottom, but some use dynamic positioning ("DP"), which allows the vessels to be held in position by computer-controlled propellers, known as thrusters. Semisubmersibles are classified into five generations, distinguished mainly by their age, environmental rating, variable deck load and water-depth capability. The Company's *GSF Aleutian Key* is a second-generation semisubmersible capable of drilling in water depths up to 2,300 feet. The *Glomar Arctic I*, *GSF Arctic II* (formerly the *Maersk Jutlander*), *Glomar Arctic III*, *Glomar Arctic IV*, *Glomar Grand Banks*, *GSF Rig 135* and *GSF Rig 140* semisubmersibles are third-generation, conventionally moored rigs suitable for drilling in water depths ranging from 1,200 to 3,400 feet. The Company's *Glomar Celtic Sea* is a fourth-generation semisubmersible capable of drilling in water depths of up to 5,750 feet, and utilizes a mooring system that is DP-assisted.

Drillships are generally preferred for deepwater drilling in remote locations with moderate weather environments because of their mobility and large load carrying capability. The Company's *Glomar C.R. Luigs*, *Glomar Jack Ryan* and *Glomar Explorer* are dynamically positioned, ultra-deepwater drillships capable of drilling in water depths up to 9,000 feet, 8,000 feet and 7,800 feet, respectively, as currently equipped. With modifications, maximum water depth capabilities are 12,000 feet for the *Glomar C.R. Luigs* and *Glomar Jack Ryan*, and 10,000 feet for the *Glomar Explorer*. The *Glomar Robert F. Bauer* is a conventionally moored drillship capable of drilling in maximum water depths of 2,750 feet.

The Company's "deepwater" rigs consist of its semisubmersibles and drillships. The Company considers rigs with a maximum water-depth capability of 7,000 feet or more, such as the *Glomar C.R. Luigs*, *Glomar Jack Ryan* and *Glomar Explorer*, to be "ultra-deepwater" rigs.

The Company's platform rig consists of a number of self-contained drilling equipment packages, that, when assembled on a customer's offshore production platform, forms a complete drilling rig.

The Company has title to all of the offshore drilling rigs in its fleet in the table above with the exception of the *Glomar Explorer*, which is subject to a 30-year capital lease, and the *Glomar C.R. Luigs* and *Glomar Jack Ryan*, which are subject to fully defeased, 20-year capital leases. None of the Company's offshore drilling rigs are currently subject to any outstanding liens or mortgages.

In January 2003, the Company entered into a lease-leaseback arrangement with a European bank related to the Company's *Britannia* cantilevered jackup. Pursuant to this arrangement, the Company leased the *Britannia* to the bank, which then leased the rig back to the Company, each lease being for a five-year term. The Company has classified this arrangement as a capital lease.

The Company has definitive contracts with PPL Shipyard PTE, Ltd. of Singapore ("PPL Shipyard") for the construction of two high performance jackup rigs at a cost of approximately \$132 million each. The Company has options with PPL Shipyard for construction of additional jackup units, the first two of which are at a similar price to the current contracts. The Company does not intend to exercise these options. Construction of the first new jackup, the *GSF Constellation I*, commenced in the second quarter of 2001 and the rig is expected to be delivered during the second quarter of 2003. The second new jackup is expected to be delivered near the end of the first quarter of 2004.

The Company also has definitive contracts with PPL Shipyard for the construction of two ultra-deepwater semisubmersible drilling rigs at a cost of approximately \$285 million each. The Company has options for construction of two additional ultra-deepwater semisubmersibles at a similar price to the two current contracts. The Company does not intend to exercise these options. Construction of the first new semisubmersible, the *GSF Development Driller I*, commenced in the third quarter of 2001, and the rig is scheduled for delivery during the first quarter of 2004. The second new semisubmersible is expected to be delivered during the first quarter of 2005.

The Company anticipates that this rig building program will be funded through the Company's existing cash and marketable securities balances and future cash flow from operations.

*Land Rig Fleet.* The majority of the Company's land rigs are designed for use in remote desert environments and generally include all facilities necessary to support living and working in harsh and remote environments, including accommodation camps and inventories of repair parts and materials. Each of the rigs is designed for efficient disassembly, transport and reassembly. Eleven of the newer rigs are specially designed as wheel-mounted units that can be moved quickly between well locations. Three of the rigs are equipped with special "lift and roll" systems, so that the rigs can be quickly moved between well locations on a pad site. An extensive fleet of specialized rig transport equipment supports land rig operations in Kuwait and the Kuwaiti-Saudi Arabia Partitioned Neutral Zone. This equipment is comprised primarily of heavy-duty trucks built and equipped for desert service. Additionally, these operations are supported by a fleet of heavy equipment, including bulldozers, cranes and forklifts that prepare access roads and drill site locations and facilitate the assembly and disassembly of the Company's land rigs.

The Company has historically concentrated its land rig operations in the Middle East, South America and North Africa. All of the Company's land rigs were placed into service in 1972 or later, and, as of January 31, 2003, their average age was approximately 13 years.

The following table lists the rigs in the Company's land drilling fleet as of January 31, 2003, indicating the year each rig was placed in service, rig type, each rig's drilling depth capabilities, current location, customer, and the date each rig is estimated to become available.

**Land Rig Fleet(1)**

(1) Excludes *Rig 159*, which was held for sale at December 31, 2002.

(2) Estimated based on the anticipated completion date of current commitments, including executed contracts, letters of intent, and other customer commitments for which contracts have not yet been executed.

The Company has title to all of the land drilling rigs in its fleet. The Company's *Rig 187* land rig in Venezuela is presently encumbered by a lien asserted by the Venezuelan tax authorities in connection with certain assessed retroactive tax liabilities. In addition, the Company's *Rig 119* land rig, also in Venezuela, is subject to a

customs claim. Although these claims restrict the Company's ability to export the rigs from Venezuela, the Company does not believe that the claims will impact the operations of the rigs within Venezuela. The Company is contesting the imposition of the lien and the various assertions of the tax authorities and is also contesting the customs claim. None of the Company's other land rigs are currently subject to any outstanding liens or mortgages.

*Third-Party Rig Operations.* The Company's third-party rig operations are presently concentrated on oil and gas platforms in the North Sea, an area where the Company maintains substantial contract drilling operations, and semisubmersible rig operations in the Caspian Sea. See "— Joint Venture, Agency and Sponsorship Relationships and Other Investments." As of January 31, 2003, the Company operated or maintained 11 platform rigs for third parties, and it participates in a joint venture that operated two semisubmersible rigs for third parties under a joint venture agreement.

*Backlog.* The Company's contract drilling backlog at December 31, 2002, was \$1.2 billion, consisting of \$1.1 billion related to executed contracts and \$0.1 billion related to customer commitments for which contracts had not yet been executed as of December 31, 2002. Approximately \$800 million of the backlog is expected to be realized in 2003. The Company's contract drilling backlog at December 31, 2001, was \$1.4 billion and included \$0.1 billion attributable to customer commitments for which contracts had not yet been executed as of that date.

*Drilling Contracts and Major Customers.* Contracts to employ the Company's drilling rigs extend over a specified period of time or the time required to drill a specified well or number of wells. While the final contract for employment of a rig is the result of negotiations between the Company and the customer, most contracts are awarded based upon competitive bidding. The rates specified in drilling contracts are generally on a dayrate basis, and vary depending upon the type of rig employed, equipment and services supplied, geographic location, term of the contract, competitive conditions and other variables. Each contract provides for a basic dayrate during drilling operations, with lower rates or no payment for periods of equipment breakdown, adverse weather or other conditions which may be beyond the Company's control. When a rig mobilizes to or demobilizes from an operating area, a contract may provide for different dayrates, specified fixed amounts or no payment during the mobilization or demobilization. A contract may be terminated by the customer if the rig is destroyed or, in some cases, if drilling operations are suspended for a specified period of time due to a breakdown of major equipment, in the event of poor operational, safety or environmental performance not remedied by the Company within a specified period or if other events occur that are beyond either party's control. In addition, certain contracts are cancellable upon specified notice at the option of the customer.

The Company's business is subject to the usual risks associated with having a limited number of customers for its services. One customer accounted for more than 10% of consolidated revenues in 2002: ExxonMobil provided \$267.7 million of contract drilling revenues and \$0.1 million of drilling management services revenues. Two customers each accounted for more than 10% of consolidated revenues in 2001: ExxonMobil provided \$180.1 million of contract drilling revenues, and BP provided \$146.0 million of contract drilling revenues and \$1.6 million of drilling management services revenues. No single customer accounted for more than 10% of Global Marine's historical consolidated revenues in 2000. The Company's results of operations could suffer a material adverse effect if any of its major customers terminates its contracts with the Company, fails to renew the Company's existing contracts or refuses to award new contracts to the Company. See "Risk Factors — The Company relies heavily on a small number of customers".

### **Drilling Management Services**

The Company provides drilling management services primarily on a turnkey basis through a wholly owned subsidiary, Applied Drilling Technology Inc. ("ADTI"), and through GlobalSantaFe Drilling U.K. Limited ("GSFUKL"). ADTI operates primarily in the U.S. Gulf of Mexico, and GSFUKL operates internationally. Under a turnkey arrangement, the Company will assume responsibility for the design and execution of a well and deliver a logged or cased hole to an agreed depth for a guaranteed price. Compensation is contingent upon satisfactory completion of the drilling program. Under the Company's turnkey drilling operations, the Company provides planning, engineering and management services beyond the scope of its traditional contract drilling business and thereby assumes greater liability.

As of December 31, 2002, the Company's drilling management services revenue backlog was approximately \$118 million, all of which is expected to be realized in 2003. The Company's drilling management services backlog was approximately \$64 million at December 31, 2001.

## **Oil and Gas Operations**

The Company conducts oil and gas exploration, development and production activities through its wholly owned subsidiary, Challenger Minerals Inc. ("CMI"). CMI acquires its interests in oil and gas properties principally in order to facilitate the acquisition of turnkey contracts for the Company's drilling management services operations. In this capacity, CMI facilitated the acquisition of contracts to drill 19 turnkey wells in 2002. CMI participated in 18 of these turnkey wells, of which 10 proved successful. The Company's oil and gas activities are conducted in the North Sea and in the United States offshore Louisiana and Texas.

## **Joint Venture, Agency and Sponsorship Relationships and Other Investments**

In some areas of the world, local customs and practice or governmental requirements necessitate the formation of joint ventures with local participation. The Company is an active participant in several joint venture drilling companies, principally in Azerbaijan, Indonesia, Malaysia, Nigeria, Oman and Saudi Arabia.

In Azerbaijan, the semisubmersibles *Istiglal* and *Dada Gorgud* operate under long-term bareboat charters. The *Istiglal* is bareboat chartered to and operated by the joint venture Caspian Drilling Company Limited, in which the Company holds a 45% ownership interest, until October 2006. The *Dada Gorgud* is bareboat chartered to the Company until October 2006 or the later termination of the Company's current drilling contract with the Azerbaijan International Operating Company. The Company has subcontracted operations of the *Dada Gorgud* to Caspian Drilling Company Limited.

The Company also participates in a joint venture that operates a petroleum supply base in Indonesia. The Indonesian supply base, in which the Company holds a 42% ownership interest, is located at Merak Point on the western portion of the island of Java. It provides both open and covered storage and bulk chemical trans-shipment facilities. The land lease for this supply base extends through the year 2030.

The Company also has a passive minority interest in a Libyan drilling company managed by non-U.S. persons that is and has been managed in accordance with applicable trade laws and regulations and is accounted for on the cost basis.

Local law or custom in some areas of the world also effectively mandates establishment of a relationship with a local agent or sponsor. When necessary or appropriate in these areas, the Company enters into agency or sponsorship agreements.

## **Risk Factors**

### ***The Company's Business Depends on the Level of Activity in the Oil and Natural Gas Industry, Which is Significantly Affected By the Level and Volatility of Oil and Natural Gas Prices***

The Company's business depends on the level of activity in offshore and onshore oil and natural gas exploration, development and production in markets worldwide. Oil and natural gas prices, and market expectations of potential changes in these prices, significantly affect this level of activity. Worldwide military, political and economic events have contributed to oil and natural gas price volatility and are likely to continue to do so in the future. Numerous factors may affect oil and natural gas prices and the level of demand for the Company's services, including:

- worldwide demand for oil and natural gas;
- the ability of the Organization of Petroleum Exporting Countries, or OPEC, to set and maintain production levels and pricing;

### ***Failure to Obtain and Retain Key Personnel Could Impede Operations***

The Company requires highly skilled personnel to operate and provide technical services and support for its business. Competition for the skilled and other labor required for deepwater and other drilling operations has intensified as the number of rigs activated or added to worldwide fleets or under construction has increased in the last few years. The Company currently has two premium jackup rigs and two deepwater rigs under construction. The Company must hire full crews for these rigs before they commence operations in addition to its routine requirements for drilling crews. Although competition for skilled and other labor has not materially affected the Company to date, in periods with high utilization, the Company has found it more difficult to find qualified individuals, and the possibility exists that competition for skilled and other labor for deepwater and other operations could limit the Company's results of operations.

### ***The Company Relies Heavily on a Small Number of Customers***

The Company's business is subject to the usual risks associated with having a limited number of customers for its services. One customer, ExxonMobil, accounted for more than 10% of consolidated revenues in 2002. ExxonMobil provided approximately \$267.8 million in revenues, which constituted approximately 13.3% of consolidated revenues. For 2002, approximately 45% of the Company's operating revenues was derived from six customers. On a pro forma basis for the year ended December 31, 2001, approximately 12% of the pro forma operating revenues for the Company would have been attributable to the largest customer on a combined basis and approximately 38% of pro forma operating revenues would have been attributable to the Company's five largest customers. The Company's results of operations could be materially adversely affected if any of its major customers terminates any of its contracts with the Company, fails to renew the Company's existing contracts or refuses to award new contracts to the Company.

### ***The Company May Suffer Losses if its Customers Terminate or Seek to Renegotiate its Contracts***

Certain of the Company's contracts with customers may be cancellable upon specified notice at the option of the customer. Other contracts require the customer to pay a specified early termination payment upon cancellation, which payments may not fully compensate the Company for the loss of the contract. Contracts customarily provide for either automatic termination or termination at the option of the customer in the event of total loss of the drilling rig or if drilling operations are suspended for extended periods of time by reason of acts of God or excessive rig downtime for repairs, or other specified conditions. Early termination of a contract may result in a rig being idle for an extended period of time. The Company's revenues may be adversely affected by customers' early termination of contracts, especially if the Company is unable to recontract the affected rig within a short period of time. During depressed market conditions, a customer may no longer need a rig that is currently under contract or may be able to obtain a comparable rig at a lower daily rate. As a result, customers may seek to renegotiate the terms of their existing drilling contracts or avoid their obligations under those contracts. The renegotiation of a number of the Company's drilling contracts could adversely affect its financial position, results of operations and cash flows.

### ***Rig Upgrade, Refurbishment and Construction Projects, Including the Company's Deepwater Semisubmersible and Premium Jackup Rigs that are Under Construction, Will Be Subject to Risks, Including Delays and Cost Overruns, and Contracts Have Yet to be Entered Into for the Deployment of the Deepwater Semisubmersibles and Premium Jackup Rigs Upon Completion***

The first of the Company's two high-performance jackups currently under construction is scheduled for delivery during the second quarter of 2003, while the first of two ultra-deepwater semisubmersibles, also under construction, is scheduled for delivery during the first quarter of 2004. In addition, the Company may make upgrade and refurbishment expenditures for its fleet, and the Company may also make substantial expenditures for the construction of additional new rigs. Rig upgrade, refurbishment and construction projects are subject to the risks of delay or cost overruns inherent in any large construction project, including the following:

- shortages of materials or skilled labor;
- unforeseen engineering problems;

- unanticipated actual or purported change orders;
- work stoppages;
- financial or operating difficulties of the shipyard upgrading, refurbishing or constructing the rig;
- adverse weather conditions;
- unanticipated cost increases; and
- inability to obtain any of the requisite permits or approvals.

Significant cost overruns or delays would adversely affect the Company's financial condition and results of operations. In addition, the Company's premium jackups and ultra-deepwater semisubmersibles currently under construction will employ advancements in technology that may lead to certain difficulties as to the Company's use of this technology.

None of the four vessels that the Company has under construction has secured a contract for deployment upon completion. Historically, the industry has experienced prolonged periods of overcapacity, during which many rigs were idle for long periods of time. The Company's ability to obtain contracts for its newbuild rigs and the terms of such contracts will be dependent on market conditions at the time these rigs are available for contract. The Company can make no assurances that it will be able to obtain contracts for all of its new or existing rigs or that the contract terms will be similar to those for similar equipment in current market conditions.

***The Company's Business Involves Numerous Operating Hazards and it is Not Fully Insured Against All of Them***

The Company's operations are subject to the usual hazards incident to the drilling of oil and natural gas wells, including blowouts, explosions, oil spills and fires. The Company's activities are also subject to hazards peculiar to marine operations, such as collision, grounding, and damage or loss from severe weather.

All of these hazards can cause personal injury and loss of life, severe damage to and destruction of property and equipment, pollution or environmental damage and suspension of operations. The Company insures against, or will have indemnification from customers for some, but not all, of these risks. The Company's insurance contains various deductibles and limitations on coverage. In light of the current volatility in the insurance markets and recent significant increases in rates, the Company may elect to change its insurance coverage, including by increasing deductibles, retentions and other limitations on coverage. Changes in coverage such as those would effectively increase the amount of risk against which the Company is not insured.

The Company believes its policy of purchasing insurance coverage is consistent with its industry peers for the types, amounts and limits of insurance maintained. However, as a result of poor underwriting results suffered by the insurance industry over the past few years and the catastrophic events of September 11, 2001, the Company incurred significant premium and deductible increases in its most recent renewal of its insurance coverage. The Company's current insurance program expires in the third quarter of 2003, and premiums and deductibles may increase further.

The occurrence of a significant event, including terrorist acts, war, civil disturbances, pollution or environmental damage, not fully insured or indemnified against or the failure of a customer to meet its indemnification obligations, could materially and adversely affect the Company's operations and financial condition. Moreover, no assurance can be made that the Company will be able to maintain adequate insurance in the future at rates it considers reasonable or be able to obtain insurance against certain risks, particularly in light of the instability and developments in the insurance markets following the recent terrorist attacks.

### ***The Company's International Operations Involve Additional Risks Not Associated With Domestic Operations***

Risks associated with the Company's international operations, any of which could limit or disrupt the Company's markets or operations, include heightened risks of:

- terrorist acts, war and civil disturbances;
- expropriation or nationalization of assets;
- renegotiation or nullification of existing contracts;
- foreign exchange restrictions;
- foreign currency fluctuations;
- foreign taxation;
- assaults on property or personnel;
- limitations on the ability to repatriate income or capital to the U.S.;
- changing political conditions; and
- foreign and domestic monetary policies.

Additionally, the Company's ability to compete in the international drilling market may be adversely affected by non-U.S. governmental regulations favoring or requiring the awarding of drilling contracts to local contractors or requiring foreign contractors to employ citizens of, or purchase supplies from, a particular jurisdiction. Furthermore, foreign governmental regulations, which may in the future become applicable to the oil and natural gas industry, could reduce demand for the Company's services, or such regulations could directly affect the Company's ability to compete for customers.

Eight of our land drilling rigs are located in Venezuela, which has been experiencing labor strikes and demonstrations and in 2002 experienced an attempt to overthrow the government. The implications and results of the political, economic and social instability in Venezuela are uncertain at this time, but the instability has had and could continue to have an adverse effect on our business. None of our land rigs located in Venezuela were operating as of January 31, 2003. When or if those rigs will return to work is uncertain.

### ***The Company May Suffer Losses as a Result of Currency Risks***

A majority of the Company's international drilling and services contracts are partially payable in local currency in amounts that are generally intended to approximate its estimated operating costs, with the balance of the payments under the contract payable in U.S. dollars (except in Kuwait, Malaysia and Saudi Arabia, where the Company will likely be paid entirely in local currency). In certain jurisdictions, including Egypt and Nigeria, regulations exist which determine the amounts payable in local currency. Those amounts can exceed the local currency costs being incurred, leading to accumulation of excess local currency which in certain instances can be subject to either temporary blocking or difficulties in converting to U.S. dollars. To the extent that its revenues denominated in local currency do not equal its local operating expenses or during periods of idle time when no revenue is earned, the Company is exposed to currency exchange transaction losses, which could materially and adversely affect its results of operations and financial condition. The Company has not historically entered into financial hedging arrangements to manage risks relating to fluctuations in currency exchange rates.

### ***Laws and Governmental Regulations May Add to Costs or Limit Drilling Activity***

The Company's business is affected by changes in public policy and by federal, state, foreign and local laws and regulations relating to the energy industry. The drilling industry is dependent on demand for services from the oil and natural gas exploration and production industry and, accordingly, the Company will be directly affected by the adoption of laws and regulations curtailing exploration and development drilling for oil and natural gas for economic, environmental and other policy reasons. The Company may be required to make

significant capital expenditures to comply with governmental laws and regulations. It is also possible that these laws and regulations may in the future add significantly to the Company's operating costs or may significantly limit drilling activity.

Governments in some non-U.S. countries have become increasingly active in regulating and controlling the ownership of concessions, companies holding concessions, the exploration of oil and natural gas and other aspects of the oil and natural gas industries in these countries. In some areas of the world, this governmental activity has adversely affected the amount of exploration and development work done by major oil companies and may continue to do so.

### ***The Company May be Limited in Its Use of Its Net Operating Losses***

The Company's ability to realize the benefit of its deferred tax asset requires that the Company achieve certain future earnings levels prior to the expiration of its net operating loss ("NOL") carryforwards. The Company has established a valuation allowance against the future tax benefit of a portion of its NOL carryforwards and could be required to record an additional valuation allowance if market conditions change materially and future earnings are, or are projected to be, significantly different from current estimates. The Company's NOL carryforwards are subject to review and potential disallowance upon audit by the tax authorities in the jurisdictions where the loss was incurred.

As of December 31, 2002, the Company had approximately \$540.4 million of NOL carryforwards for U.S. federal income tax purposes, including an NOL carryforward of \$408.4 million at November 19, 2001, related to Global Marine. The Company also had approximately \$168.4 million of NOL carryforwards from foreign jurisdictions. The Company can provide no assurance that the full amount of its NOL carryforwards will be allowed. The NOL carryforwards are scheduled to expire from 2003 to 2023. Section 382 of the U.S. Internal Revenue Code could limit the future use of all or some of the U.S. NOL carryforwards if the direct and indirect ownership of stock of the relevant company changes by more than 50% in certain circumstances over a prescribed testing period. The Internal Revenue Service may take the position that the Merger consummated pursuant to the business combination of Santa Fe International and Global Marine caused a greater-than-50-percent ownership change with respect to Global Marine. If the Merger did not result in such an ownership change, changes in the ownership of the Company's ordinary shares following the Merger could result in such an ownership change. In the event of such an ownership change, the Section 382 rules would limit the utilization of the NOL carryforwards of Global Marine in each taxable year ending after the ownership change to an amount equal to a federal long-term tax-exempt rate published monthly by the Internal Revenue Service, multiplied by the fair market value of all of Global Marine's stock at the time of the ownership change. For purposes of this calculation, the value of Global Marine's stock could also be subject to adjustments, thereby further limiting the ability of the Company to utilize its NOL carryforwards in each taxable year thereafter.

### ***Proposed United States Tax Law Changes Could Reduce the Company's Net Income***

In 2002 and 2003, various changes to the U.S. federal income tax code were proposed that, if enacted, could adversely affect the Company's United States federal income tax position. Many of the proposed changes target United States corporations that have expatriated to a foreign jurisdiction and would in certain cases treat such corporations as United States corporations for United States federal income tax purposes. Several of the proposals would have retroactive application and would treat the Company as a United States corporation. Some of the proposals would impose additional limitations on the deductibility for United States federal income tax purposes of certain intercompany transactions, including intercompany interest expense.

At this time, it is impossible to predict what changes, if any, may be enacted, and if enacted, what effect such changes may have on the Company. However, there is a risk that changes to U.S. tax laws could substantially increase the income tax costs of the Company. If this were to occur, such changes could have a material adverse effect on the Company's financial position and future results of operations.

In addition, due to the Company's structure and extensive foreign operations, its effective tax rate is based on the provisions of numerous tax treaties, conventions and agreements between various countries and taxing

jurisdictions, as well as the tax laws of many jurisdictions. Changes in one or more of these tax regimes could also have a material adverse effect on the Company.

#### ***The Company May Be Required to Accrue Additional Tax Liability on Certain Earnings***

The Company has not provided for U.S. deferred taxes on the unremitted earnings of its U.S. subsidiaries and their controlled foreign corporations (“U.S. Subsidiaries”) that are permanently reinvested. Should the Company make a distribution from the unremitted earnings of its U.S. Subsidiaries, the Company would be required to record additional U.S. deferred taxes that could have a material adverse effect on its financial position, results of operations and cash flows.

In certain circumstances, management expects that, due to the changing demands of the offshore drilling markets, the Company’s mobile assets are more likely than not to be redeployed to other locations before those assets operate in certain jurisdictions long enough to give rise to future tax consequences. As a result, no deferred tax liability has been recognized on the earnings from these assets. In addition, the Company has not provided for U.S. deferred taxes on foreign earnings that could be taxed in the United States upon the occurrence of certain events in a future period. The Company plans, subject to approval by its Board of Directors, to implement a business restructuring that will better integrate the operations of the Company. This integration will change the U.S. tax classification of certain of its subsidiaries before the occurrence of any events that could give rise to a tax liability. Should management’s expectations change regarding the length of time a mobile asset will be operating in a given location, or should the Company choose not to implement the planned business restructuring, the Company would be required to record additional deferred taxes that could have a material adverse effect on its financial position, results of operations and cash flows.

#### ***Governmental Regulations and Environmental Matters Could Significantly Affect the Company’s Operations***

The Company’s operations are subject to numerous federal, state, and local laws and regulations controlling the discharge of materials into the environment or otherwise relating to the protection of the environment. As a result, the application of these laws could materially adversely affect the Company’s results of operations by increasing its cost of doing business, discouraging its customers from drilling for hydrocarbons or subjecting it to liability. For example, the Company, as an operator of mobile offshore drilling units in navigable U.S. waters and certain offshore areas, including the Outer Continental Shelf, is liable for damages and for the cost of removing oil spills for which it may be held responsible, subject to certain limitations. The Company’s operations may involve the use or handling of materials that may be classified as environmentally hazardous substances. Laws and regulations protecting the environment have generally become more stringent, and may in certain circumstances impose “strict liability,” rendering a person liable for environmental damage without regard to negligence or fault. Environmental laws and regulations may expose the Company to liability for the conduct of or conditions caused by others or for acts that were in compliance with all applicable laws at the time they were performed. For a discussion of potential environmental liabilities affecting the Company, see “Item 3. Legal Proceedings — Environmental Matters.”

#### ***The Company May Not Be Able to Generate Sufficient Cash Flow to Meet Its Debt Service Obligations***

The amount of debt that the Company can manage in some periods may not be as large as in other periods because its earnings and cash flows vary significantly from year to year following trends in the oil and gas industry. The Company’s ability to generate cash flow from operations to pay its debt will depend on its future financial performance, which will be affected by a range of economic, competitive and business factors. The Company cannot control many of these factors, such as general economic and financial conditions in the oil and gas industry, the economy at large and competitive initiatives of its competitors. The Company’s future cash flow may be insufficient to meet all of its debt obligations and commitments, and any insufficiency could negatively impact its financial position.

If the Company does not generate sufficient cash flow from operations to satisfy its debt obligations, it may have to undertake alternative financing plans, such as refinancing or restructuring its debt, selling assets, reducing

or delaying capital investments or seeking to raise additional capital. The Company can provide no assurance that any refinancing would be possible, that any assets could be sold, or, if sold, of the timing of the sales and the amount of proceeds that may be realized from those sales, or that additional financing could be obtained on terms acceptable to the Company, if at all. The Company's inability to generate sufficient cash flow to satisfy all of its debt obligations, or to refinance its indebtedness on commercially reasonable terms, would materially adversely affect its financial position, results of operations and cash flows.

***SFIC Holdings Has the Ability to Significantly Influence Matters on Which Shareholders May Vote***

SFIC Holdings (Cayman), Inc. ("SFIC Holdings"), a wholly owned subsidiary of Kuwait Petroleum Corporation, which is in turn wholly owned by the State of Kuwait, holds approximately 18.7% of the outstanding ordinary shares of the Company.

As long as Kuwait Petroleum Corporation and its affiliates own at least 12.5% of the outstanding ordinary shares or at least 12.5% of the outstanding voting shares, SFIC Holdings has the right to designate for election three directors of the Company. If SFIC Holdings' interest is reduced to less than 12.5% and equal to or greater than 7.5%, the number of directors that SFIC Holdings will have the right to designate for election is reduced from three to two. If SFIC Holdings' interest is reduced to less than 7.5% and equal to or greater than 4%, the number of directors that SFIC Holdings may designate for election is reduced from two to one. If SFIC Holdings' interest is reduced to less than 4%, it will not have the right to designate any directors for election to the board of the Company. For purposes of determining SFIC Holdings' ownership interest in the Company, until SFIC Holdings sells any GlobalSantaFe Ordinary Shares, only ordinary shares outstanding at the completion of the Merger are included in the calculation of the ownership percentage. Accordingly, reductions in SFIC Holdings' percentage ownership in the Company as a result of the Company's issuance of shares will not reduce SFIC Holdings' board representation.

As a result, Kuwait Petroleum Corporation, through SFIC Holdings, is able to significantly influence the management and affairs of the Company and all matters requiring shareholder approval, including the election of the Company's Board of Directors. This concentration of ownership could delay or deter a change of control of the Company.

Although the owners of all the ordinary shares after the Merger are entitled to one vote per share, as long as Kuwait Petroleum Corporation and its affiliates own at least 10% of the outstanding ordinary shares or at least 10% of the outstanding voting shares of the Company, the consent of SFIC Holdings is required to change the jurisdiction of incorporation of the Company or any existing subsidiary or to incorporate a new subsidiary in a jurisdiction in a manner materially adversely affecting the rights or interests of Kuwait Petroleum Corporation and its affiliates. This restriction on the Company may limit its ability to take action it deems to be in the best interest of its other shareholders.

***Some of the Directors of the Company are also Directors or Officers of Kuwait Petroleum Corporation or its Affiliates and May Have Interests That are in Conflict With the Interests of Other Shareholders***

As discussed above, SFIC Holdings has the right to designate for election up to three members of the Company's Board of Directors. The Company's articles of association state that Kuwait Petroleum Corporation and its affiliated companies have no duty to refrain from competing with the Company. The articles of association also state that Kuwait Petroleum Corporation and its affiliated companies are not under any duty to present corporate opportunities to the Company in the event of a conflict, and that corporate opportunities offered to persons who are directors or officers of the Company and of Kuwait Petroleum Corporation or its affiliates will be allocated based principally on the capacities in which the individual director or officer is offered the opportunity. As a result, any director of the Company designated by SFIC Holdings may have potential or actual conflicts that could affect the process or outcome of board deliberations.

***The Company's Shareholders Have Limited Rights Under Cayman Islands Law***

The Company is incorporated under the laws of the Cayman Islands, and its corporate affairs are governed by its memorandum of association and its articles of association and by the Companies Law (2001 Second

Revision) of the Cayman Islands. Principles of law relating to matters such as the validity of corporate procedures, the fiduciary duties of management, directors and controlling shareholders and the rights of shareholders differ from those that would apply if the Company were incorporated in a jurisdiction within the United States. Further, the rights of shareholders under Cayman Islands law are not as clearly established as the rights of shareholders under legislation or judicial precedent applicable in some U.S. jurisdictions. As a result, GlobalSantaFe's shareholders may face more uncertainty in protecting their interests in the face of actions by the management or directors than they might have as shareholders of a corporation incorporated in a U.S. jurisdiction.

## Employees

The Company had approximately 8,800 employees worldwide at December 31, 2002. The Company requires highly skilled personnel to operate its drilling rigs and, accordingly, conducts extensive personnel training and safety programs. A total of 114 of the Company's local employees in Trinidad, 52 local employees in Australia and 274 of the Company's local employees in Nigeria are represented by labor unions. The Company, through its membership in the U.K. Drilling Contractors Association, has entered into a recognition agreement with a union representing 1,512 employees in the U.K. sector of the North Sea. At such time as the Company recommences operations in Venezuela, local rig employees will be represented by a labor union.

## Executive Officers of the Registrant

The name, age as of December 31, 2002, and office or offices currently held by each of the executive officers of the Company are as follows:

<u>Name</u>	<u>Age</u>	<u>Office or Offices</u>
Robert E. Rose .....	64	Chairman of the Board
C. Stedman Garber, Jr. ....	59	President and Chief Executive Officer
Jon A. Marshall .....	51	Executive Vice President and Chief Operating Officer
Joe E. Boyd .....	60	Senior Vice President, Human Resources and Corporate Affairs
Roger B. Hunt .....	53	Senior Vice President, Marketing
James L. McCulloch .....	50	Senior Vice President and General Counsel
W. Matt Ralls .....	53	Senior Vice President and Chief Financial Officer
Marion M. Woolie .....	48	Senior Vice President, Operations
Douglas C. Stegall .....	57	Vice President and Controller
Douglas K. Vrooman .....	52	President of Applied Drilling Technology Inc.

Officers serve for a one-year term or until their successors are elected and qualified to serve. Each executive officer's principal occupation has been as an executive officer of the Company or its predecessors, Santa Fe International or Global Marine, for more than the past five years, with the exception of Messrs. Boyd, Stegall, Rose and Woolie. Mr. Boyd has been the Company's Senior Vice President, Human Resources and Corporate Affairs since November 2001. Previously, he served as the Company's Vice President, Human Resources and Corporate Affairs from 1985 until November 2001. Mr. Stegall has been the Company's Vice President and Controller since December 2002. Previously, he served in a management transition position from November 2001 to December 2002, following his service as Vice President and Controller of Global Marine from February 2000 until November 2001. Prior to such service, Mr. Stegall was Vice President and Controller of GSFDC. Prior to his election in November 2001 as the Chairman of the Board, Mr. Rose served as Global Marine's Chairman since May 1999 and its President and Chief Executive Officer since May 1998, prior to which he was President and Chief Executive Officer of Cardinal Services, Inc., an oil services company, since April 1998, and President and Chief Executive Officer of Diamond Offshore Drilling, Inc. and its predecessor, Diamond M Company, for more than a decade. Prior to his election in November 2001 as Senior Vice President, Operations of the Company,

Mr. Woolie served as President of GSFDC since 1998. He was GSFDC's Senior Vice President, Sales and Contracts, from 1997 to 1998, prior to which he was responsible for GSFDC's North and South American sales.

### **Executive Management Change**

C. Stedman Garber, Jr. has announced his intention to retire from his position as President and Chief Executive Officer and a director of the Company as of May 6, 2003, the date of the Company's annual general meeting. Jon A. Marshall, currently the Company's Executive Vice President and Chief Operating Officer, will succeed Mr. Garber as President and Chief Executive Officer and will stand for election as a director of the Company at the annual general meeting.

### **Item 3. Legal Proceedings**

Applied Drilling Technology Inc. ("ADTI"), a wholly owned subsidiary of the Company, was a defendant in a civil lawsuit filed in September 2001 by Newfield Exploration Co. ("Newfield") and its insurance underwriters in the United States District Court for the Eastern District of Louisiana. The lawsuit arose out of damage caused to an offshore well owned by Newfield, which had been drilled by ADTI pursuant to a turnkey contract. The lawsuit has been dismissed with prejudice by the court, and Newfield has waived its right to appeal.

In 1998, the Company entered into fixed-price contracts with Harland and Wolff Shipbuilding and Heavy Industries Limited (the "Shipbuilder") totaling \$315 million for the construction of two dynamically positioned, ultra-deepwater drillships, the *Glomar C.R. Luigs* and the *Glomar Jack Ryan*, originally scheduled for delivery in the fourth quarter of 1999 and first quarter of 2000, respectively. Pursuant to two 20-year capital lease agreements, the Company subsequently novated the construction contracts for the drillships to two financial institutions (the "Lessors"), which now own the drillships and lease them to the Company. The Company acted as the Lessors' construction supervisor and has paid on behalf of the Lessors, or provided for the Lessors' payment of, all amounts it believes were required under the terms of the contracts, including payments for all approved change orders.

In November 1999, because the Company was concerned about the Shipbuilder's financial viability and the satisfactory completion of the drillships in a timely manner, the Company agreed to provide additional funding to the Shipbuilder for completion of the two drillships in exchange for certain assurances by the Shipbuilder and its parent, Fred. Olsen Energy ASA (the "Funding Agreement"). The Company ultimately provided a total of \$103.1 million under the Funding Agreement.

The Lessors and the Company were involved in arbitration proceedings with the Shipbuilder, in which the Shipbuilder claimed breach of contract in connection with the Company's obligations regarding design of the drillships, the timely delivery to the Shipbuilder of owner furnished equipment and information relating thereto, change orders and additional compensation for increased steelweight. The Company was involved in an arbitration proceeding with Fred. Olsen Energy ASA ("Olsen") relating to disputes under the Funding Agreement. In February 2003, the Lessors and the Company agreed to pay an additional \$8.2 million to the Shipbuilder and Olsen in exchange for settlement of all outstanding disputes between the parties. This amount is to be adjusted by reference to the award to be issued by the arbitration tribunal for the cost of completion arbitration in respect of the *Glomar Jack Ryan*, subject to a minimum additional payment of \$7.7 million and a maximum additional payment of \$10.0 million. In the event that the Company is required to pay the maximum amount of \$10.0 million, total cost of construction will be \$485.1 million for the two drillships.

The Company filed a claim in 1993 in the amount of \$40.6 million with the United Nations Compensation Commission ("UNCC") for losses suffered as a result of the Iraqi invasion of Kuwait in 1990. The claim was for the loss of four rigs and associated equipment, lost revenue, and miscellaneous expenditures. The Governing Council of the UNCC has awarded the Company compensation in the amount of \$22.1 million in a final, non-appealable, adjudication of the claim. The Company has been advised that the funds will be paid upon receipt of a formal request, which has now been made. As a result of this award, the Company recorded a pretax gain of \$22.1 million in the first quarter of 2003.

## Environmental Matters

The Company has certain potential liabilities in the area of claims under the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") and similar state acts regulating cleanup of various waste disposal sites, including those described below. CERCLA is intended to expedite the remediation of hazardous substances without regard to fault. Potentially responsible parties ("PRPs") for each site include present and former owners and operators of, transporters to and generators of the substances at the site. Liability is strict and can be joint and several.

The Company has been named as a PRP in connection with a site located in Santa Fe Springs, California known as the Waste Disposal, Inc. site. The Company and other PRPs have agreed with the U.S. Environmental Protection Agency ("EPA") and the U.S. Department of Justice ("DOJ") to settle their potential liabilities for this site by agreeing to perform the remaining remediation required by EPA. The form of the agreement is a consent decree which has not yet been lodged or entered by the court. Although the settlement is not final until the decree is entered by the court, the Company expects the decree to be entered by the Court. The parties to the settlement have entered into a participation agreement which makes the Company liable for an estimated 7.7% of the remediation costs. Although the remediation costs cannot be determined with certainty until the remediation is complete, the consultant advising the group with respect to remediation believes that the remediation costs will be such that the Company's share of the remaining remediation costs will be less than \$800,000. There are additional potential liabilities related to the site, but these cannot be quantified, and there is no reason at this time to believe that they will be material.

The Company has also been named as a PRP in connection with a site in California known as the Casmalia Resources Site. The Company and other PRPs have entered into an agreement with EPA and DOJ to resolve their potential liabilities. This agreement is also not final until the agreed-upon Consent Decree is entered by the court, but it is likely that it will be. Under the settlement, the Company is not likely to owe any substantial additional amounts for this site beyond what the Company has already paid. There are additional potential liabilities at this site, but these cannot be quantified at this time, and there is no reason to believe that they will be material.

The Company has been named as one of many PRPs in connection with a site located in Carson, California formerly maintained by Cal Compact Landfill. On February 15, 2002, the Company was served with a required 90-day notification that eight California cities, on behalf of themselves and other PRPs, intend to commence an action against the Company under the Resource Conservation and Recovery Act ("RCRA"). On April 1, 2002, a Complaint was filed by the cities against the Company and others alleging that they have liabilities in connection with the site. However, the Complaint has not been served. The site was closed in or around 1965, and the Company does not have sufficient information to enable it to assess its potential liability, if any, for this site.

Resolutions of other claims by the U.S. Environmental Protection Agency, the involved state agency and/or PRPs are at various stages of investigation. These investigations involve determinations of:

- the actual responsibility attributed to the Company and the other PRPs at the site;
- appropriate investigatory and/or remedial actions; and
- allocation of the costs of such activities among the PRPs and other site users.

The Company's ultimate financial responsibility in connection with those sites may depend on many factors, including:

- the volume and nature of material, if any, contributed to the site for which the Company is responsible;
- the numbers of other PRPs and their financial viability; and
- the remediation methods and technology to be used.

It is difficult to quantify with certainty the potential cost of these environmental matters, particularly in respect of remediation obligations. Nevertheless, based upon the information currently available, the Company believes that its ultimate liability arising from all environmental matters, including the liability for all other related pending legal proceedings, asserted legal claims and known potential legal claims which are likely to be

asserted, is adequately accrued and should not have a material effect on the Company's financial position or ongoing results of operations. Estimated costs of future expenditures for environmental remediation obligations are not discounted to their present value.

## Other Legal Matters

There are no other material pending legal proceedings, other than ordinary routine litigation incidental to the business of the Company, to which the Company is a party or of which any of its property is the subject.

## Item 4. Submission of Matters to a Vote of Security Holders

There were no matters submitted to a vote of the Company's security holders during the fourth quarter of 2002.

## PART II

## Item 5. Market for Registrant's Common Equity and Related Stockholder Matters

The Company's Ordinary Shares, \$.01 par value per share, are listed on the New York Stock Exchange under the symbol "GSF." The following table sets forth the high and low sales prices of the Company's Ordinary Shares as reported on the New York Stock Exchange Composite Transactions Tape for the calendar periods indicated. Data for periods prior to November 20, 2001, represents high and low prices for Santa Fe International's ordinary shares.

	Price per Share	
	High	Low
2002		
First Quarter .....	\$33.13	\$25.00
Second Quarter .....	36.40	27.35
Third Quarter .....	27.15	19.33
Fourth Quarter .....	26.20	21.90
2001		
First Quarter .....	\$42.40	\$27.50
Second Quarter .....	39.90	29.00
Third Quarter .....	31.55	18.99
Fourth Quarter .....	29.72	19.75

On February 28, 2003, the closing price of the Ordinary Shares, as reported by the NYSE, was \$22.25 per share. As of February 28, 2003, there were approximately 2,885 shareholders of record of Ordinary Shares. This number does not include shareholders for whom shares are held in a nominee or street name.

## Dividend Policy

On March 4, 2003, the Company's Board of Directors increased the dividend for the first quarter of 2003 to \$0.0375 per share, payable on April 15, 2003, to holders of record of Ordinary Shares as of the close of business on March 31, 2003. The Company (and, prior to November 20, 2001, Santa Fe International) paid a dividend of \$0.0325 per share during each period shown in the table above. The dividends paid in a given quarter relate to the immediately preceding quarter. The Company's payment of dividends in the future, if any, will be at the discretion of the Company's Board of Directors and will depend on the Company's results of operations, financial condition, cash requirements, future business prospects and other factors. There can be no assurance that the Company will pay dividends in the future.

**Item 6. Selected Financial Data**

In the following table, the Company's operating results for 2002 represent operations of the combined company. Operating results for 2001 include Global Marine's operations for the full year and Santa Fe International's operations from the November 2001 merger date (42 days). Selected financial data for years prior to 2001 represents the operations of Global Marine only. As a result, comparisons to prior years' data may not be meaningful. In April 2002, the Emerging Issues Task Force ("EITF") of the Financial Accounting Standards Board reached a consensus on Issue 01-14, "Income Statement Characterization of Reimbursement Received for 'Out-of-Pocket' Expenses Incurred," requiring that all reimbursements received for out-of-pocket expenses incurred be characterized as revenue in the income statement. The Company previously recorded certain reimbursements received from customers as a reduction of the related expenses incurred, and in order to implement the consensus, certain reimbursements received from customers for the periods presented have been reclassified as revenues and related operating expenses. Operating income and net income for all periods presented were not affected by this reclassification. The selected financial data should be read in conjunction with "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" and the audited consolidated financial statements and the notes thereto included under "Item 8. Financial Statements and Supplementary Data."

Number of employees (end of year) .....	8,800	8,700	2,700	2,400	2,700

(1) Restructuring costs for 2001 represent estimated restructuring costs associated with Global Marine recorded in connection with the Merger.

(2) Includes a \$35.1 million gain on the sale of the *Glomar Beaufort Sea I* concrete island drilling system, which was sold in June 2001.

(3) Includes a \$47.2 million charge incurred in the fourth quarter of 2001 for increased valuation allowances, partially offset by adjustments to prior years' tax contingencies.

(4) Income per share data for years prior to 2001 has been restated to reflect the effect of the exchange ratio of 0.665 established in the merger agreement.

(5) In 2001, cash dividends declared per ordinary share included a regular quarterly cash dividend of \$0.0325 per ordinary share approved by the Company's Board of Directors in December 2001. Global Marine historically did not pay dividends on its common stock.

(6) Capital expenditures for 2002 included approximately \$12.8 million of capital expenditures related to the Company's rig building program that had been accrued but not paid as of December 31, 2002.

(7) In 1999, the Company increased the estimated useful lives of certain of its drilling rigs. The effect of the change was to reduce 1999 depreciation expense by approximately \$27.2 million.

(8) The average rig utilization rate for a period represents the ratio of days in the period during which the rigs were under contract to the total days in the period during which the rigs were available to work.

(9) Average dayrate is the ratio of contract drilling revenues less non-rig related revenues divided by the aggregate contract days, adjusted to exclude days under contract at zero dayrate. Non-rig related revenues, consisting mainly of cost reimbursements, were \$74.9 million, \$26.5 million, \$14.4 million, \$20.8 million and \$17.1 million for 2002, 2001, 2000, 1999 and 1998, respectively. Inclusion of these amounts in the average dayrate calculation would increase the amount reported for each of the years specified by \$2,100, \$2,500, \$2,700, \$2,900 and \$2,100 per day for 2002, 2001, 2000, 1999 and 1998, respectively, for the Company's marine rigs and \$900 and \$2,100 per day for 2002 and 2001, respectively, for the Company's land rigs. Global Marine had no land rig operations prior to the Merger in November 2001.

(10) Excludes *Rig 159*, which was held for sale as of December 31, 2002.

## **Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations**

The Company is a leading worldwide oil and gas drilling contractor, owning or operating a high quality, technologically advanced fleet of over 100 marine and land drilling rigs. The Company's fleet currently includes 13 floating rigs, 44 cantilevered jackup rigs, 31 land rigs and one platform rig. In addition, the Company or its affiliates operate 11 platform rigs for third parties and it participates in a joint venture that operates two semisubmersible rigs for third parties. The Company provides offshore oil and gas contract drilling services to the oil and gas industry worldwide on a daily rate ("dayrate") basis. The Company also provides offshore oil and gas drilling management services on either a dayrate or completed-project, fixed-price ("turnkey") basis, as well as drilling engineering and drilling project management services, and it participates in oil and gas exploration and production activities.

### **Critical Accounting Policies**

The Company's consolidated financial statements are impacted by the accounting policies used and the estimates and assumptions made by management during their preparation. The following is a discussion of the Company's most significant accounting policies as well as the use of estimates.

#### ***Properties and Depreciation***

*Rigs and Drilling Equipment.* Capitalized costs of rigs and drilling equipment include all costs incurred in the acquisition of capital assets including allocations of interest costs incurred during periods that assets are under construction. Expenditures for maintenance and repairs are charged to expense as incurred. Costs of property sold or retired and the related accumulated depreciation are removed from the accounts; resulting gains or losses are included in income.

Jackup drilling rigs and semisubmersibles are depreciated over lives ranging from 15 to 30 years, with salvage values of \$0.5 million and \$1.0 million, respectively, per rig. All land drilling rigs are depreciated over 15-year lives with no salvage value. Drillships, with the exception of the *Glomar Explorer*, are depreciated over 20-year lives, with salvage values of \$1.0 million per rig. The *Glomar Explorer* is being depreciated over approximately 28 years, which represents the time that remained on its 30-year lease as of the date it entered service following its conversion to a drillship, with no salvage value.

The Company reviews its long-term assets for impairment when changes in circumstances indicate that the carrying amount of the asset may not be recoverable, in accordance with Statement of Financial Accounting Standards ("SFAS") No. 144, "Accounting for the Impairment or Disposal of Long-lived Assets." SFAS No. 144, among other things, requires that long-lived assets and certain intangibles to be held and used be reported at the lower of carrying amount or fair value and establishes criteria to determine when a long-lived asset is classified as available for sale. Assets to be disposed of and assets not expected to provide any future service potential to the Company are recorded at the lower of carrying amount or fair value less cost to sell.

*Oil and Gas Properties.* The Company uses the full-cost method of accounting for oil and gas exploration and development costs. Under this method of accounting, the Company capitalizes all costs incurred in the acquisition, exploration, and development of oil and gas properties and amortizes such costs, together with estimated future development and dismantlement costs, using the units-of-production method.

#### ***Revenue Recognition***

The Company's contract drilling business provides crewed rigs to customers on a dayrate basis. Dayrate contracts can be for a specified period of time or the time required to drill a specified well or number of wells. Revenues and expenses from dayrate drilling operations, which are classified under contract drilling services, are recognized on a per-day basis as the work progresses. Lump-sum fees received as compensation for the cost of

relocating drilling rigs from one major operating area to another, whether received up-front or upon termination of the drilling contract, are recognized as earned, which is generally over the term of the related drilling contract.

The Company also designs and executes specific offshore drilling or well-completion programs for customers at fixed prices under short-term “turnkey” contracts. Revenues and expenses from turnkey contracts, which are classified under drilling management services, are earned and recognized upon completion of each contract using the completed contract method of accounting.

### ***Income Taxes***

The Company is a Cayman Islands company. The Cayman Islands does not impose corporate income taxes. Consequently, income taxes have been provided based on the tax laws and rates in effect in the countries in which operations are conducted and income is earned. The income taxes in these jurisdictions vary substantially. The Company’s effective tax rate for financial statement purposes will continue to fluctuate from year to year as the Company’s operations are conducted in different taxing jurisdictions. The Company’s ability to realize the benefit of its deferred tax assets requires that the Company achieve certain future earnings levels prior to the expiration of its net operating loss (“NOL”) carryforwards.

The Company has not provided for U.S. deferred taxes on the unremitted earnings of its U.S. subsidiaries and their controlled foreign corporations (“U.S. Subsidiaries”) that are permanently reinvested. Should the Company make a distribution from the unremitted earnings of its U.S. Subsidiaries, the Company would be required to record additional U.S. deferred taxes.

In certain circumstances, management expects that, due to the changing demands of the offshore drilling markets, the Company’s mobile assets are more likely than not to be redeployed to other locations before those assets operate in certain jurisdictions long enough to give rise to future tax consequences. As a result, no deferred tax liability has been recognized on the earnings from these assets. In addition, the Company has not provided for U.S. deferred taxes on foreign earnings that could be taxed in the United States upon the occurrence of certain events in a future period. The Company plans, subject to approval by its Board of Directors, to implement a business restructuring that will better integrate the operations of the Company. This integration will change the U.S. tax classification of certain of its subsidiaries before the occurrence of any events that could give rise to a tax liability. Should management’s expectations change regarding the length of time a mobile asset will be operating in a given location, or should the Company choose not to implement the planned business restructuring, the Company would be required to record additional deferred taxes that could have a material adverse effect on its financial position, results of operations and cash flows.

### ***Goodwill***

The Company accounts for goodwill in accordance with the provisions of SFAS No. 142, “Goodwill and Other Intangible Assets.” The Company has defined reporting units within its contract drilling segment based upon economic and market characteristics of these units. All of the goodwill recorded in connection with the Merger has been allocated to the jackup drilling fleet reporting unit, as these rigs were the primary source of value in the Merger discussions and negotiations. The estimated fair value of this reporting unit for purposes of the Company’s annual goodwill impairment testing is based upon the present value of its estimated future net cash flows, utilizing a discount rate based upon the Company’s cost of capital.

### ***Stock-Based Compensation***

The Company accounts for its stock option and stock-based compensation plans using the intrinsic-value method prescribed by Accounting Principles Board (“APB”) Opinion No. 25. Accordingly, the Company computes compensation cost for each employee stock option granted as the amount by which the quoted market price of the Company’s common stock on the date of grant exceeds the amount the employee must pay to acquire the stock. The amount of compensation cost, if any, is charged to income over the vesting period. No compensation cost has been recognized for any of the Company’s outstanding stock options, all of which have exercise prices equal to the market price of the stock on the date of grant.

### ***Pension Cost and Other Postretirement Benefits***

The Company's pension costs and liabilities are actuarially determined based on certain assumptions including expected long-term rates of return on plan assets, rate of increase in future compensation levels and the discount rate used to compute future benefit obligations. The expected long-term rate of return on plan assets used to compute pension cost was 9% for 2002, 2001 and 2000. The assumed rate of increase in future compensation levels was 4.5% for 2002 and 2001, and 6.0% for 2000. The discount rate used to compute the projected benefit obligation was 6.75% for 2002, 7.25% for 2001 and 7.5% for 2000. The Company's policy is to use a discount rate comparable to rates of return on high-quality fixed-income investments currently available and expected to be available during the period to maturity of the Company's pension benefits. Actuarial gains and losses resulting from experience different from these assumptions or from changes in these assumptions are amortized over the remaining service period of active employees expected to receive benefits under the plans. Actual results could differ materially from estimated amounts. For a discussion of the components of the Company's net periodic pension cost and the funded status of the Company's pension plans, see Note 9 of Notes to the Consolidated Financial Statements.

As of December 31, 2002, the Company had an unrecognized net actuarial loss of \$109.9 million. This loss will be recognized in net periodic pension cost over the estimated remaining service lives of the active participants in the plans. Approximately \$11 million of this loss is expected to be recognized in 2003.

The calculation of other postretirement benefits costs and liabilities includes the weighted-average annual assumed rate of increase in the per capita cost of covered medical benefits. These assumptions are based on data available to management at the time these assumptions are made. Actual results could differ materially from estimated amounts.

### ***Use of Estimates***

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make certain estimates and assumptions. These estimates and assumptions affect the carrying values of assets and liabilities and disclosures of contingent assets and liabilities at the balance sheet date and the amounts of revenues and expenses recognized during the period. Actual results could differ from such estimates.

Key estimates used by management in this report include:

*Allowance for doubtful accounts.* The Company estimates its allowance for doubtful accounts based on analysis of historical collection activity. Factors that may affect this estimate include changes in the financial position of a major customer or significant changes in the prices of oil or natural gas.

*Depreciation and amortization.* The Company depreciates its rigs and equipment over their remaining estimated useful lives. The Company's estimates of these remaining useful lives may be affected by such factors as changing market conditions, technological advances in the industry or changes in regulations governing the industry.

*Tax estimates.* The Company's ability to realize the benefit of its deferred tax assets requires that the Company achieve certain future earnings levels prior to the expiration of its NOL carryforwards. The Company has established a valuation allowance against the future tax benefit of a portion of its NOL carryforwards and could be required to record an additional valuation allowance if market conditions deteriorate and future earnings are below, or are projected to be below, its current estimates.

*Turnkey drilling estimates.* The Company typically relies on detailed cost estimates created by project engineering staff to compute and book profits on turnkey drilling projects based on known revenues. These cost estimates are adjusted when final actual project costs have been determined, which may result in adjustments to previously recorded amounts.

*Accrued claims and liabilities.* The Company estimates its accrued claims and liabilities based on the facts and circumstances specific to the claims and past experience with similar claims. The actual outcome of litigated claims could differ significantly from estimated amounts.

*Fair values of financial instruments.* The Company estimates the fair values of its financial instruments based on available third-party market quotes for its financial instruments or market quotes based on financial instruments with similar characteristics. Where market quotes are unavailable, the Company bases its estimates of fair values on the net present value of estimated future cash flows.

*Cash flow estimates.* The Company's estimates of future cash flows are based on the most recent currently available market and operating data for the applicable asset or reporting unit at the time the estimate is made. In addition to fair value calculations discussed above, cash flow estimates are also used to determine certain tax-related valuations and for asset impairment analyses. Actual results could differ materially from these estimated amounts.

### **Merger with Santa Fe International**

On November 20, 2001, Global Marine merged with a subsidiary of Santa Fe International and became a wholly owned subsidiary of Santa Fe International, which was renamed GlobalSantaFe Corporation at the time of the Merger.

The Merger was accounted for as a purchase business combination in accordance with accounting principles generally accepted in the United States of America. As the stockholders of Global Marine owned slightly over 50% of GlobalSantaFe after the Merger, Global Marine was considered the acquiring entity for accounting purposes. Accordingly, the historical basis of Global Marine in its assets and liabilities has been carried forward to the consolidated financial statements of the Company. The assets and liabilities of Santa Fe International were recorded at estimated fair market value at the date of the Merger in the consolidated financial statements of the Company, with the excess of the purchase price over the sum of such fair values recorded as goodwill.

In connection with the Merger, the Company implemented a restructuring program that included the consolidation of Santa Fe International's administrative office in Dallas, Texas, Global Marine's administrative office in Lafayette, Louisiana, and Global Marine's administrative office in Houston, Texas, into a single administrative office in Houston, the consolidation of Santa Fe International's and Global Marine's North Sea administrative offices in Aberdeen, Scotland and the separation of 167 employees from the Company. The employee functions affected were primarily corporate support in nature and included accounting, information technology, and employee benefits, among others. Approximately 60% of the affected positions were located in Dallas, 23% were located in Houston and Lafayette, and the remaining 17% were located in Aberdeen.

Estimated restructuring costs associated with Global Marine were recorded as a pretax charge in the fourth quarter of 2001. Changes in estimated costs, consisting mainly of refinements of cost estimates, and payments related to these restructuring costs for the year ended December 31, 2002, are summarized as follows:

<u>Restructuring Costs:</u>	<u>Employee Severance Costs</u>	<u>Office Closures and Consolidation of Facilities</u>	<u>Directors' Separation and Other Costs(1)</u>	<u>Total</u>
	(\$ in millions)			
<b>Houston and Lafayette Offices:</b>				
Number of Employees — 38				
Liability at 12/31/01 .....	\$ 8.2	\$ 4.1	\$ 2.5	\$ 14.8
Changes in estimated costs .....	(2.2)	2.6	(0.5)	(0.1)
2002 payments .....	<u>(2.6)</u>	<u>(2.1)</u>	<u>—</u>	<u>(4.7)</u>
Liability at 12/31/02 .....	<u>3.4</u>	<u>4.6</u>	<u>2.0</u>	<u>10.0</u>
<b>Aberdeen Office:</b>				
Number of Employees — 16				
Liability at 12/31/01 .....	0.9	0.2	0.1	1.2
Changes in estimated costs .....	(0.1)	0.3	(0.1)	0.1
2002 payments .....	<u>(0.7)</u>	<u>(0.5)</u>	<u>—</u>	<u>(1.2)</u>
Liability at 12/31/02 .....	<u>0.1</u>	<u>—</u>	<u>—</u>	<u>0.1</u>
<b>Total:</b>				
Number of Employees — 54				
Liability at 12/31/01 .....	9.1	4.3	2.6	16.0
Changes in estimated costs .....	(2.3)	2.9	(0.6)	—
2002 payments .....	<u>(3.3)</u>	<u>(2.6)</u>	<u>—</u>	<u>(5.9)</u>
Liability at 12/31/02 .....	\$ 3.5	\$ 4.6	\$ 2.0	\$ 10.1

(1) The liability at December 31, 2002, included \$2.0 million of special termination costs related to certain retirement plans, which were included in Other long-term liabilities in the Consolidated Balance Sheets.

Estimated costs associated with Santa Fe International's employee severance and closure of its Dallas and Aberdeen offices were recognized as a liability assumed in the purchase business combination and included in the cost of acquisition in accordance with the provisions of SFAS No. 141, "Business Combinations." Changes in estimated costs, consisting primarily of costs associated with employee terminations and further employee relocation costs, and payments related to this liability for the year ended December 31, 2002, are summarized as follows:

<u>Purchase Price:</u>	<u>Employee Separation Costs</u>	<u>Employee Relocation Costs</u>	<u>Office Closures and Consolidation of Facilities(1)</u>	<u>Directors' Separation and Other Costs</u>	<u>Total</u>
	(\$ in millions)				
Number of Employees — 113					
Liability at 12/31/01 .....	\$ 9.5	\$ 5.4	\$11.5	\$ 0.9	\$ 27.3
Changes in estimated costs ....	4.8	2.8	—	(0.4)	7.2
2002 payments .....	<u>(11.6)</u>	<u>(7.7)</u>	<u>(1.2)</u>	<u>(0.2)</u>	<u>(20.7)</u>
Liability at 12/31/02 .....	\$ 2.7	\$ 0.5	\$10.3	\$ 0.3	\$ 13.8

(1) The liability at December 31, 2002, included \$7.6 million related to the Dallas office lease obligation, which was included in Other long-term liabilities in the Consolidated Balance Sheets.

In addition to the amounts in the above table, Santa Fe International paid \$10.0 million in 2001 to SFIC Holdings in consideration for SFIC Holdings' consent to the Merger. This consent was required pursuant to an intercompany agreement with Kuwait Petroleum Corporation and SFIC Holdings that required the consent of SFIC Holdings to, among other things, significant corporate actions by Santa Fe International, including the issuance of equity securities, sale of significant assets or a change in the corporate domicile of Santa Fe International or any of its subsidiaries.

## Operating Results

The Company's operating results for 2002 represent the first full year of operations of the combined company, while the Company's results of operations for 2001 include Global Marine's operations for the full year and Santa Fe International's operations from November 20, 2001 (42 days). The Company's results of operations for 2000 represent the operations of Global Marine only. As a result, year-to-year comparisons may not be meaningful.

In April 2002, the Emerging Issues Task Force ("EITF") of the Financial Accounting Standards Board reached a consensus on Issue 01-14, "Income Statement Characterization of Reimbursement Received for 'Out-of-Pocket' Expenses Incurred." The EITF consensus requires that all reimbursements received for out-of-pocket expenses incurred be characterized as revenue in the income statement. The Company previously recorded certain reimbursements received from customers as a reduction of the related expenses incurred. In connection with the implementation of the consensus on this issue, the Company has reclassified certain reimbursements received from customers for the years ended December 31, 2001 and 2000, as revenues and related operating expenses to conform to the 2002 presentation. Operating income and net income for all periods presented were not affected by this reclassification. Amounts classified as revenues and expenses for 2002 pursuant to this consensus and the amounts of revenues and expenses reclassified by segment for each prior period presented are as follows (in millions):

	<u>Year Ended December 31,</u>		
	<u>2002</u>	<u>2001</u>	<u>2000</u>
Contract drilling .....	\$74.9	\$26.5	\$14.4
Drilling management services .....	<u>11.3</u>	<u>7.7</u>	<u>4.5</u>
	<u>\$86.2</u>	<u>\$34.2</u>	<u>\$18.9</u>

## Summary

Data relating to the Company's operations by business segment follows:

	<u>2002</u>	<u>Increase (Decrease)</u>	<u>2001</u>	<u>Increase (Decrease)</u>	<u>2000</u>
			(\$ in millions)		
Revenues:					
Contract drilling .....	\$1,619.0	66%	\$ 974.1	61%	\$ 603.6
Drilling management .....	416.8	0%	417.3	(7)%	450.1
Oil and gas .....	10.6	(24)%	13.9	(31)%	20.1
Less: Intersegment revenues .....	<u>(28.7)</u>	32%	<u>(21.7)</u>	44%	<u>(15.1)</u>
	<u>\$2,017.7</u>	46%	<u>\$1,383.6</u>	31%	<u>\$1,058.7</u>
Operating income:					
Contract drilling .....	\$ 360.2	6%	\$ 338.5	83%	\$ 184.5
Drilling management .....	28.6	(14)%	33.4	55%	21.6
Oil and gas .....	4.8	(43)%	8.4	(31)%	12.2
Restructuring costs .....	—	(100)%	(22.3)	329%	(5.2)
Corporate expenses .....	<u>(61.8)</u>	120%	<u>(28.1)</u>	14%	<u>(24.6)</u>
	<u>\$ 331.8</u>	1%	<u>\$ 329.9</u>	75%	<u>\$ 188.5</u>

Operating income in 2002 increased by \$1.9 million to \$331.8 million from \$329.9 million in 2001, due primarily to the inclusion of \$168.7 million attributable to the full-year operations of the Santa Fe International drilling fleet. Excluding the contribution from the Santa Fe fleet, operating income decreased by \$166.8 million due primarily to lower dayrates and utilization in the U.S. Gulf of Mexico, increases in repair and maintenance expenses, reduced turnkey drilling activity, lower average oil and gas prices and an increase in corporate expenses. Operating income for 2002 included \$22.7 million of transition expenses, which are costs incurred in connection with the Merger and subsequent integration of Global Marine and Santa Fe International. Such costs are not considered to be indicative of the Company's ongoing operations. Operating income for 2001 included a \$22.3 million charge in connection with a restructuring program related to the Merger.

Operating income in 2001 increased by \$141.4 million to \$329.9 million from \$188.5 million in 2000. Approximately \$114.6 million of this increase was attributable to Global Marine's operating results, and \$26.8 million was attributable to Santa Fe International's operating results from the date of the Merger. The increase in Global Marine's operating income in 2001 as compared to 2000 was primarily attributable to the full-year results of the *Glomar C.R. Luigs* and *Glomar Jack Ryan* drillships, which were added to the Company's fleet in April 2000 and December 2000, respectively, along with increases in average dayrates and rig utilization. These increases were offset in part by the \$22.3 million restructuring charge related to the Merger noted above.

In August 2002, the existing drilling contract for the *Glomar Jack Ryan* ultra-deepwater drillship was assigned by the Company's customer to their Australian subsidiary to drill a series of deepwater wells on the western and southern coasts of Australia. To facilitate the assignment of this contract, the Company was paid \$21.7 million, which is being amortized over the remaining contract term expiring August 1, 2003.

In February 2002, the Company sold the *Key Bermuda* jackup drilling rig to Nabors Drilling International Limited for approximately \$29 million, less selling costs of approximately \$5 million. The carrying value of the *Key Bermuda* was adjusted to its estimated market value in the consolidated financial statements of the Company at the time of the Merger and, therefore, no gain or loss was recorded as a result of this sale.

In June 2001, the Company completed the sale of the *Glomar Beaufort Sea I* concrete island drilling system to Exxon Neftegas Limited for \$45.0 million, resulting in a pretax gain in the amount of \$35.1 million.

### ***Pro Forma Financial Information***

The following unaudited condensed consolidated pro forma results for the years ended December 31, 2001 and 2000, has been prepared as if the Merger had occurred on January 1, 2000. Revenues for both periods have been reclassified pursuant to EITF Issue 01-14 discussed above. If Global Marine and Santa Fe International had merged on this date, GlobalSantaFe might have performed differently. The pro forma financial information should not be relied on as an indication of the financial position or results of operations that the Company would have achieved had the Merger taken place at a different date or of the future results that the Company will achieve.

	Year Ended December 31,	
	2001	2000
	(In millions, except per share data)	
Revenues .....	\$2,058.5	\$1,658.0
Operating income .....	497.7	293.7
Income before income taxes .....	525.1	276.0
Net income .....	377.8	232.6
Earnings per ordinary share:		
Basic .....	\$ 1.62	\$ 1.00
Diluted .....	\$ 1.59	\$ 0.98

The pro forma information includes adjustments for additional revenue based on the fair market value of certain drilling contracts acquired, elimination of goodwill amortization, additional depreciation based on the fair

market value of drilling rigs and other property and equipment acquired and related adjustments for income taxes, reflecting the incremental benefit attributable to the effect of the Company's tax structure on the earnings of the combined companies.

### ***Backlog***

The Company's contract drilling backlog at December 31, 2002, totaled approximately \$1.2 billion, of which approximately \$800 million is expected to be realized in 2003. Contract drilling backlog at December 31, 2001 was \$1.4 billion.

### ***Market Conditions***

The drilling business has historically been cyclical, marked by periods of low demand, excess rig supply and low dayrates, followed by periods of high demand, short rig supply and increasing dayrates. These cycles are highly volatile and are traditionally influenced by a number of factors, including oil and gas prices, the spending plans of the Company's customers and the highly competitive nature of the offshore drilling industry. Even when rig markets appear to have stabilized at a certain level of utilization and dayrates, these markets can change swiftly, making it difficult to predict trends or conditions in the market. The relocation of rigs from weak markets to stable or strong markets may also have a significant impact on utilization and dayrates in the affected markets. A summary of current market conditions in the Company's areas of operations follows:

*North Sea.* The Company currently operates three semisubmersibles, five cantilevered heavy-duty harsh environment jackups, three cantilevered jackups and a platform rig in the North Sea market. Utilization and dayrates for both jackups and semisubmersibles have declined in this market following the announcement of tax law changes in the United Kingdom, the recent period of reorganization and asset sales among our clients, and the reassessment of production targets by our clients. The Company expects continued weakness in this market and anticipates that several of its rigs currently under contract in this area will either continue to receive low dayrates, or be idle when their current contracts expire. The Company also expects jackup dayrates to soften in the first quarter of 2003, and anticipates semisubmersible and jackup market weakness to continue throughout 2003, likely resulting in intermittent periods of idle time for a portion of its rigs. In the fourth quarter of 2002, the Company mobilized one of its semisubmersibles that had previously been operating in this market to a shipyard in Poland for painting and other maintenance, after which it will be cold-stacked in Scotland.

*U.S. Gulf of Mexico.* The Company currently operates two semisubmersibles and ten cantilevered jackups in the U.S. Gulf of Mexico market, which is characterized by short-term contracts. Although the U.S. Gulf of Mexico jackup market has historically reacted to changes in natural gas prices, recent high natural gas prices have thus far had little effect on utilization, and this market is currently experiencing significant idle capacity for both jackups and semisubmersibles. One of the Company's semisubmersibles in this market is currently committed until June 2003, and the other is operating under a contract that expires in the first quarter of 2003. Dayrates for jackup rigs marginally improved during the first half of 2002 but have weakened slightly since that time. Despite this market weakness, the Company's ten jackups in the U.S. Gulf of Mexico experienced 96% utilization in the fourth quarter of 2002 while generally maintaining market dayrates.

*Ultra-deepwater drillship market.* The Company currently operates three drillships in the ultra-deepwater markets in the U.S. Gulf of Mexico (two units) and Australia (one unit). The worldwide ultra-deepwater market is currently oversupplied, and the contracts of numerous units in this class worldwide are expected to expire in 2003 and 2004. There are presently fewer oil companies pursuing operations in ultra-deepwater, and several oil companies with these types of rigs under contract have offered them to other oil companies at subsidized dayrates. While the Company's ultra-deepwater drillships have been operating under long-term contracts, one contract will expire in April 2003, to be followed by a 60-day contract at a significantly reduced dayrate, and the contracts of the other two drillships will expire in the third quarter of 2003. The Company currently has no long-term commitments for its drillships following these expirations.

*West Africa.* The Company currently operates two semisubmersibles and nine cantilevered jackups in this market. One of the Company's semisubmersibles in this market is contracted through 2003, while the other is contracted through a substantial portion of 2003. While jackup dayrates and utilization remained firm in this market throughout most of 2002, recent jackup contract early terminations in Nigeria and possible rig relocations into this market may cause dayrates and utilization to decline in the West Africa market. Although the Company is facing the potential for lower dayrates and utilization for its nine jackups, four of its jackups in this market are contracted through 2003.

*Middle East and Mediterranean.* The Company currently operates six cantilevered jackups in the Middle East region and two cantilevered jackups in the Mediterranean region offshore North Africa, with one additional cantilevered jackup being mobilized to the Mediterranean. Although both markets appear to be stable, contracts on two of these rigs expire in the first quarter of 2003 and the current contract on an additional rig expires in the second quarter of 2003. The Company's moored drillship is cold-stacked in Malta.

*Southeast Asia.* The Company currently operates six cantilevered jackups in Southeast Asia. Four of these jackups are contracted beyond the end of 2003, with a fifth jackup rig contracted until the fourth quarter of 2003. The remaining jackup concluded a contract in the first quarter of 2003 and will undergo modifications and upgrades in a Singapore shipyard, with no contract commitment thereafter. Although the market is generally balanced in this region and utilization remains high, the Company has observed a reduction in dayrates in recent contract placements.

*Other.* In Northeast Canada, the Company currently operates one semisubmersible and one heavy-duty harsh environment jackup. The semisubmersible is undergoing upgrades and modifications during the first quarter of 2003 prior to the mid-2003 commencement of a two-year contract. The jackup is under contract until the fourth quarter of 2003. In Trinidad and Tobago, the Company currently operates one cantilevered jackup under a contract expiring in the second quarter of 2003.

*Land drilling fleet.* The Company owns 31 land drilling rigs, with 19 of these located in the Middle East (Rig 159, located in the Middle East, is held for sale), four in North Africa and eight in Venezuela. All but three of the active rigs in the Middle East were under contract at the start of 2003, but the Company anticipates that utilization and dayrates for the Middle East and North Africa land rig markets may experience some softening in the first and second quarters of 2003.

In March 2003, the Company suspended drilling operations and evacuated its employees from Kuwait in response to the threat of war in Iraq. Although the suspension of drilling operations is not expected to have a material impact on the Company's results of operations for the first quarter of 2003, the Company estimates, based on current contracts and commitments, that its results of operations for each subsequent quarter will be negatively impacted by approximately \$0.03 per diluted ordinary share for each full quarter that operations are suspended. Should the threat of war continue, or if hostilities break out, the Company may be forced to evacuate employees in other countries in the region, possibly resulting in the termination of some contracts.

Venezuela has been experiencing labor strikes and demonstrations and in 2002 experienced an attempt to overthrow the government. The implications and results of the political, economic and social instability in Venezuela are uncertain at this time, but the instability has had and is expected to continue to have an adverse effect on this market. None of the Company's land rigs located in Venezuela are currently operating.

#### ***Future Market for Newbuilds***

The *GSF Constellation I*, the first of the Company's two high-performance jackups currently under construction, is scheduled for delivery during the second quarter of 2003, while the *GSF Development Driller I*, the first of two ultra-deepwater semisubmersibles also under construction, and the *GSF Constellation II* are scheduled for delivery around the end of the first quarter of 2004. Although the Company has options for construction of additional jackup and ultra-deepwater semisubmersible units beyond these four, it does not intend to exercise these options. The Company's ability to obtain contracts for its newbuild rigs and the terms of such contracts will depend on market conditions at the time these rigs are available for contract. The Company is

actively marketing the *GSF Constellation I* and the *GSF Development Driller I*. While the Company believes that its newbuild rigs will have substantial advantages in efficiency and capability over competitive equipment in the industry, it can provide no assurance that it will be able to obtain contracts for all of its new rigs or that the contract terms will be similar to those for similar equipment in current market conditions.

### **Contract Drilling Operations**

Data with respect to the Company's contract drilling operations follows:

	<u>2002</u>	<u>Increase (Decrease)</u>	<u>2001(2)</u>	<u>Increase (Decrease)</u>	<u>2000(3)</u>
	(\$ in millions, except for average dayrates)				
Contract drilling revenues by area:(1)					
North Sea .....	\$ 453.4	187%	\$ 158.0	120%	\$ 71.9
U.S. Gulf of Mexico .....	342.0	(25)%	458.7	28%	357.4

(1) Includes revenues earned from affiliates.

(2) Includes the results of Global Marine for the full-year 2001 and the results of Santa Fe International from November 20, 2001 (42 days).

(3) Reflects the pre-Merger results of Global Marine only.

(4) See note (9) under "Item 6. Selected Financial Data."

### **Year Ended December 31, 2002, Compared to Year Ended December 31, 2001**

Contract drilling revenues increased by \$644.9 million to \$1,619.0 million in 2002 compared to \$974.1 million in 2001 due primarily to \$686.8 million from the addition of the Santa Fe International rigs to the Company's drilling fleet, partially offset by lower dayrates and utilization in the U.S. Gulf of Mexico.

For 2002, 2001 and 2000, respectively, the Company's average offshore utilization for its drilling rigs in the U.S. Gulf of Mexico was 90%, 94% and 100%. The average utilization for rigs located in the North Sea was 85%, 88% and 62%, respectively, for 2002, 2001 and 2000. For the same periods, rigs located offshore West Africa averaged 86%, 97% and 77%, respectively, and rigs in South America averaged 100%, 94% and 100%, respectively. The Company's utilization rate for 2002 averaged 82% in Southeast Asia and 97% in the Middle East. Global Marine's offshore fleet did not operate in Southeast Asia or the Middle East during 2001 or 2000. The Company's land drilling utilization rates averaged 69% for 2002 and 84% for the 42 days in 2001.

The Company's operating profit margin for contract drilling operations decreased to 22% in 2002, from 35% in 2001 due primarily to the addition of land drilling operations, which have historically operated at substantially lower margins than the Company's offshore fleet, and lower average dayrates in the U.S. Gulf of Mexico, along with an increase in depreciation expense due to the adjustment of the carrying values of the Santa Fe International

rigs to their estimated market value in connection with the Merger. In addition, the Company's contract drilling operating results for 2002 were impacted by accelerated repair and maintenance expenditures on several rigs that were relocating, undergoing upgrades or idle, as well as a painting and maintenance project on one of its semisubmersibles. In accordance with its normal practice, the Company is taking advantage of idle rig time in the North Sea and elsewhere to perform repair, maintenance and upgrade work on several of its idle rigs, which will result in a continuation of this increased level of repair and maintenance costs in the first quarter of 2003.

The Company recorded approximately \$14.8 million of Merger-related transition expenses in its contract drilling operations during 2002, which represent costs incurred as part of the integration of the operations of Global Marine and Santa Fe International. Such costs are not considered to be indicative of the Company's ongoing operations.

Along with the addition of the Santa Fe International drilling fleet, the mobilization of rigs between geographic areas also affected each area's revenues over the periods indicated. Subsequent to the Merger, the Company's mobilization of rigs was as follows: one jackup from the U.S. Gulf of Mexico to Trinidad in December 2001 and back to the U.S. Gulf of Mexico in August 2002; one drillship from the U.S. Gulf of Mexico to Trinidad in March 2002, back to the U.S. Gulf of Mexico in May 2002 and to Australia in September 2002; one jackup from Trinidad to the North Sea in May 2002; one jackup from Trinidad to West Africa in July 2002; one semisubmersible from the North Sea to the east coast of Canada in July 2002; and one jackup from the North Sea to West Africa in November 2002. Prior to the Merger, Global Marine mobilized one drillship from offshore Peru to West Africa in April 2000, one drillship from West Africa to the U.S. Gulf of Mexico in June 2000, one jackup from West Africa to the U.S. Gulf of Mexico in February 2001, one drillship from Trinidad to the U.S. Gulf of Mexico in May 2001, one semisubmersible from Canada to the North Sea in May 2001, one jackup from the U.S. Gulf of Mexico to West Africa in July 2001 and one jackup from the U.S. Gulf of Mexico to Trinidad in September 2001.

As of January 31, 2003, 14 of the Company's offshore drilling rigs were located in the U.S. Gulf of Mexico; 12 rigs, including its platform rig, were located in the North Sea; 11 were offshore West Africa; six were in the Middle East; six were in Southeast Asia; two were offshore North Africa with one en route; two were off the northeast coast of Canada; one was offshore Trinidad and Tobago; one was off the western coast of Australia; one was cold-stacked in Malta and one was undergoing a painting and maintenance project in a shipyard in Poland, after which it will be cold-stacked in Scotland.

As of January 31, 2003, 19 of the Company's 31 land rigs were located in the Middle East; eight were in South America and four were in North Africa.

As of January 31, 2003, 53 of the Company's 58 offshore rigs were either committed or under contract, and 19 of the Company's 31 land rigs were under contract.

#### *Year Ended December 31, 2001, Compared to Year Ended December 31, 2000*

Contract drilling revenues increased by \$370.5 million in 2001 to \$974.1 million compared to \$603.6 million in 2000. Approximately \$274.6 million of this increase was attributable to Global Marine's fleet, and \$95.9 million was attributable to Santa Fe International's fleet from the Merger date. Of the \$274.6 million increase in Global Marine's contract drilling revenues in 2001 as compared to 2000, \$104.3 million was attributable to the addition of the *Glomar C.R. Luigs* drillship in April 2000 and the *Glomar Jack Ryan* drillship in December 2000, \$95.1 million was attributable to an increase in average dayrates, \$67.5 million was attributable to an increase in average rig utilization and \$7.7 million was attributable to an increase in reimbursable revenues. The increase in average dayrates in 2001 as compared to 2000 was primarily due to operations in West Africa and the U.S. Gulf of Mexico, and the increase in average rig utilization was primarily due to operations in West Africa and the North Sea. Of the \$95.9 million in contract drilling revenues attributable to Santa Fe International's fleet, \$75.3 million was attributable to marine rigs and \$20.6 million was attributable to land rigs.

Operating income and operating margin increased to \$338.5 million and 35%, respectively, for 2001 compared to \$184.5 million and 31%, respectively, for 2000. Operating expenses increased by \$216.5 million to

\$635.6 million in 2001 from \$419.1 million in 2000. Approximately \$148.9 million of this increase was attributable to Global Marine's fleet, and \$67.6 million was attributable to Santa Fe International's fleet from the Merger date. The increase in Global Marine's contract drilling operating expenses in 2001 as compared to 2000 was primarily due to higher operating costs in connection with the full-year operations of the *Glomar C.R. Luigs* and the *Glomar Jack Ryan* drillships, an increase in rig utilization and full-year crewed operations of the *GSF Arctic II* (formerly the *Maersk Jutlander*), which was being leased from the Company under a bareboat charter for most of 2000. Under this bareboat charter, the Company provided the customer with the rig, and the customer used its own crews to operate the rig.

### ***Drilling Management Services***

#### *Year Ended December 31, 2002, Compared to Year Ended December 31, 2001*

Drilling management services revenues decreased by \$0.5 million to \$416.8 million in 2002 from \$417.3 million in 2001. The decrease in revenues consisted of a \$59.8 million decrease attributable to fewer turnkey projects completed, partly offset by a \$32.0 million increase attributable to higher average revenues per turnkey project and a \$27.3 million increase in daywork, reimbursable and other revenues. The Company completed 98 turnkey projects in 2002 (78 wells drilled and 20 well completions) as compared to 119 turnkey projects in 2001 (97 wells drilled and 22 well completions).

Drilling management services operating income decreased by \$4.8 million to \$28.6 million in 2002 from \$33.4 million in 2001, and operating margin decreased to 6.9% in 2002 from 8.0% in 2001. These decreases were due primarily to the deferral of turnkey profit totaling \$16.3 million and \$9.9 million for 2002 and 2001, respectively, related to wells in which CMI was either the operator or held a working interest. Excluding the deferral of this profit, drilling management services operating income increased by \$1.6 million to \$44.9 million for 2002 from \$43.3 million in 2001, due primarily to improved turnkey drilling performance in 2002 as compared to 2001. The Company incurred losses totaling \$3.1 million on five of the 98 turnkey projects completed in 2002 compared to losses totaling \$13.5 million on 11 of the 119 turnkey projects completed in 2001. The Company also recognized \$2.1 million of estimated losses in the fourth quarter of 2002 related to a well in progress at December 31, 2002, that the Company completed at a loss in the first quarter of 2003.

#### *Year Ended December 31, 2001, Compared to Year Ended December 31, 2000*

Drilling management services revenues decreased by \$32.8 million to \$417.3 million in 2001 from \$450.1 million in 2000. Approximately \$33.5 million of this decrease was attributable to Global Marine's operations, offset by a \$0.7 million increase attributable to operations of Santa Fe International after the Merger. The decrease in Global Marine's revenues consisted of a \$77.3 million decrease attributable to a decrease in the number of turnkey projects, partly offset by a \$25.3 million increase attributable to higher average revenues per turnkey project and an \$18.5 million increase attributable to daywork, reimbursable and other revenues. The Company completed 119 turnkey projects in 2001 (97 wells drilled and 22 well completions) as compared to 149 projects in 2000 (122 wells drilled and 27 well completions).

Operating income for drilling management services increased by \$11.8 million to \$33.4 million in 2001 from \$21.6 million in 2000, and operating profit margin increased to 8.0% in 2001 from 4.8% in 2000. Of the \$11.8 million increase in drilling management services operating income for 2001 as compared to 2000, \$11.3 million was attributable to Global Marine, and \$0.5 million was attributable to the operations of Santa Fe International from the Merger date. The increase in operating margin in 2001 as compared to 2000 was due in part to the Company incurring fewer loss wells in 2001 as compared to 2000. The Company incurred losses totaling \$13.5 million on 11 of the 119 turnkey projects in 2001 as compared to losses totaling \$18.1 million incurred on 18 of the 149 turnkey projects during 2000.

Also contributing to the increase in the Company's operating margin in 2001 as compared to 2000 was a turnkey well drilled in the North Sea in December 2000. The turnkey drilling contract guaranteed the Company recovery of its turnkey drilling costs upon completion of the well and included a provision for additional revenue based on production from the well. The Company received \$4.1 million of additional revenue from this well in the fourth quarter of 2001, all of which was operating profit.

Results of operations from the Company's drilling management services may be limited by certain factors, in particular the ability of the Company to find and retain qualified personnel, to hire suitable rigs at acceptable rates, and to obtain and successfully perform turnkey drilling contracts based on competitive bids. The Company's ability to obtain turnkey drilling contracts is largely dependent on the number of such contracts available for bid, which in turn is influenced by market prices for oil and gas, among other factors. Accordingly, results of the Company's drilling management service operations may vary widely from quarter to quarter and from year to year.

### ***Other Income and Expense***

General and administrative expenses increased to \$58.4 million in 2002 as compared to \$26.0 million in 2001 due primarily to increases in personnel from the inclusion of Santa Fe International operations as a result of the Merger, transition expenses and an increase in pension expense. Transition expenses included in general and administrative expenses totaled approximately \$7.9 million in 2002. Transition expenses for 2001 were not material. Transition expenses, which represent costs incurred as part of the integration of the operations of Global Marine and Santa Fe International, are not considered to be indicative of the Company's ongoing operations. Pension expense included in general and administrative expenses increased to \$10.1 million in 2002 as compared to \$3.5 million in 2001 due primarily to the inclusion of expenses related to legacy Santa Fe International plans, lower returns on plan assets and plan changes to conform benefits under the legacy pension plans as a result of the Merger.

General and administrative expenses increased by \$3.4 million to \$26.0 million in 2001 from \$22.6 million in 2000. Approximately \$2.0 million of this increase was attributable to the operations of Santa Fe International after the Merger, and \$1.4 million was attributable to Global Marine. The increase in Global Marine's general and administrative expenses was primarily due to an increase in information systems costs and professional fees, partly offset by lower compensation expense.

Interest expense was \$57.1 million for 2002, \$57.4 million for 2001 and \$63.6 million for 2000. Interest expense was essentially flat in 2002 as compared to 2001. The decrease in interest expense from 2000 to 2001 reflects lower effective interest rates for the year 2001 due to the issuance of the Zero Coupon Convertible Debentures in June 2000 as well as lower average debt balances.

The Company capitalized approximately \$20.5 million of interest costs in 2002 in connection with the Company's rig expansion program discussed in "Liquidity and Capital Resources — Financing and Investing Activities." The Company capitalized interest costs of \$1.1 million in 2001 in connection with the construction of these rigs. Global Marine capitalized interest costs of \$26.4 million in 2000 in connection with the construction of the *Glomar C.R. Luigs* and *Glomar Jack Ryan* drillships.

Interest income increased to \$15.1 million in 2002 from \$13.9 million in 2001 due to increased average cash, cash equivalents and marketable securities balances, primarily as a result of the Merger, and cash generated from operations, offset in part by lower interest rates earned in 2002 on the Company's cash, cash equivalents and marketable securities balances. Interest income increased to \$13.9 million in 2001 from \$4.0 million in 2000 primarily due to higher average cash balances and short-term investments in 2001 as compared to 2000.

In June 2001, the Company completed the sale of the *Glomar Beaufort Sea I* concrete island drilling system to Exxon Neftegas Limited for \$45.0 million, resulting in a pretax gain in the amount of \$35.1 million.

Other income totaled \$2.3 million in 2002, due primarily to net gains totaling \$4.0 million recorded on embedded derivative financial instruments associated with two-year variable-dayrate contracts for two of the Company's cantilevered jackups. See discussion in "Item 7A — Quantitative and Qualitative Disclosures About Market Risk — Commodity Price Risk." The net gains in 2002 were offset in part by a \$1.1 million loss on the sale of long-term marketable securities related to one of the Company's retirement plans.

### ***Income Taxes***

The Company's effective tax rate was approximately 11% for the year ended December 31, 2002, as compared to 38% in 2001. Global Marine's effective tax rate was 27% in 2000. The lower effective tax rate for

2002 was due in part to the addition of the Santa Fe International operations, which increased earnings in international jurisdictions that are taxed at generally lower rates. The effective tax rate was further lowered by approximately \$27 million of reduced annual tax costs related to intercompany debt incurred in connection with the Merger. In 2001, the Company recorded a valuation allowance against the NOL carryforwards of Global Marine and its subsidiaries. The effect of that valuation allowance was to increase 2001 tax expense by \$47.2 million. The Company's ability to realize the benefit of Global Marine's U.S. NOL carryforwards requires that the Company achieve a certain level of future earnings in the United States prior to the expiration of its NOL carryforwards. Reduced activity levels in the U.S. Gulf of Mexico in 2001 contributed to a decrease in the expected future earnings of the Company's U.S. subsidiaries. Also, as a result of the Merger, the expiration dates of the Company's NOL carryforwards were accelerated by one year, decreasing the number of years available to fully utilize the NOL carryforwards before they expire. Based upon currently anticipated market conditions in the United States, the Company did not adjust the valuation allowance against the U.S. NOL carryforwards of Global Marine in 2002.

The Company is a Cayman Islands company. The Cayman Islands does not impose corporate income taxes. Consequently, income taxes have been provided based upon the tax laws and rates in effect in the countries in which operations are conducted and income is earned. The income taxes imposed in these jurisdictions vary substantially. The Company's effective tax rate for financial statement purposes will continue to fluctuate from year to year as the Company's operations are conducted in different taxing jurisdictions.

In certain circumstances, management expects that, due to the changing demands of the offshore drilling markets, the Company's mobile assets are more likely than not to be redeployed to other locations before those assets operate in certain jurisdictions long enough to give rise to future tax consequences. As a result, no deferred tax liability has been recognized on the earnings from these assets. In addition, the Company has not provided for U.S. deferred taxes on foreign earnings that could be taxed in the United States upon the occurrence of certain events in a future period. The Company plans, subject to approval by its Board of Directors, to implement a business restructuring that will better integrate the operations of the Company. This integration will change the U.S. tax classification of certain of its subsidiaries before the occurrence of any events that could give rise to a tax liability. Should management's expectations change regarding the length of time a mobile asset will be operating in a given location, or should the Company choose not to implement the planned business restructuring, the Company would be required to record additional deferred taxes that could have a material adverse effect on its financial position, results of operations and cash flows.

The Company intends to permanently reinvest all of the unremitted earnings of its U.S. Subsidiaries in their businesses. As a result, the Company has not provided for deferred taxes on \$1.2 billion of cumulative unremitted earnings at December 31, 2002. Should the Company make a distribution from the unremitted earnings of its U.S. Subsidiaries, the Company would be required to record additional U.S. deferred taxes that could have a material adverse effect on its financial position, results of operations and cash flows.

The Company believes the positions taken on its tax returns with regard to the taxability of its subsidiaries are reasonable; however, it can provide no assurance that its positions will not be challenged or that, if challenged, it would prevail.

In 2002 and 2003, various changes to the U.S. federal income tax code were proposed that, if enacted, could adversely affect the Company's United States federal income tax position. Many of the proposed changes target United States corporations that have expatriated to a foreign jurisdiction and would in certain cases treat such corporations as United States corporations for United States federal income tax purposes. Several of the proposals would have retroactive application and would treat the Company as a United States corporation. Some of the proposals would impose additional limitations on the deductibility for United States federal income tax purposes of certain intercompany transactions, including intercompany interest expense.

At this time, it is impossible to predict what changes, if any, may be enacted, and if enacted, what effect it may have on the Company. However, there is a risk that changes to U.S. tax laws could substantially increase the income tax costs of the Company. If this were to occur, such changes could have a material adverse effect on the Company's financial position and future results of operations.

### ***Transactions With Affiliates***

In connection with the initial public offering of Santa Fe International, Santa Fe International entered into an intercompany agreement with Kuwait Petroleum Corporation and SFIC Holdings, which agreement was amended in connection with the Merger. The intercompany agreement, as amended, provides that, as long as Kuwait Petroleum Corporation and its affiliates, in the aggregate, own at least 10% of the Company, the consent of SFIC Holdings is required to change the jurisdiction of any existing subsidiary of the Company or incorporate a new subsidiary in any jurisdiction in a manner materially adversely affecting the rights or interests of Kuwait Petroleum Corporation and its affiliates or reincorporate the Company in another jurisdiction. The intercompany agreement, as amended, also provides SFIC Holdings the right to designate up to three representatives to the Company's Board of Directors based on SFIC Holdings' ownership percentage in the Company and provides SFIC Holdings rights to access information concerning the Company. At December 31, 2002, SFIC Holdings held approximately 18.7% of the outstanding ordinary shares of the Company.

The Company provides contract drilling services in Kuwait to the Kuwait Oil Company, K.S.C. ("KOC"), a subsidiary of Kuwait Petroleum Corporation, and also provides contract drilling services to a partially owned affiliate of KOC in the Kuwait-Saudi Arabian Partitioned Neutral Zone. Such services are performed pursuant to drilling contracts containing terms and conditions and rates of compensation which materially approximate those that are customarily included in arm's-length contracts of a similar nature. In connection therewith, KOC provides the Company rent-free use of certain land and maintenance facilities and has committed to providing same, subject to the availability of the maintenance facilities, through the current term of the drilling contracts and extensions thereof as may be agreed. In relation to its drilling business in Kuwait, the Company has an agency agreement with a subsidiary of Kuwait Petroleum Corporation that obligates the Company to pay an agency fee based on a percentage of revenues. The Company believes the terms of this agreement are more favorable than those which could be obtained with an unrelated third party in an arm's-length negotiation, but the value of such terms is currently immaterial to the Company's results of operations.

During the year ended December 31, 2002, the Company earned revenues from KOC and its affiliate for performing contract drilling services in the ordinary course of business totaling \$62.7 million and paid \$586,000 of agency fees pursuant to such agency agreement. During the period following the Merger until December 31, 2001, the Company earned revenues from KOC and its affiliate totaling \$6.9 million and paid \$80,000 of agency fees. At December 31, 2002 and 2001, the Company had accounts receivable from affiliates of Kuwait Petroleum Corporation of \$11.1 million and \$9.9 million, respectively.

### **Liquidity and Capital Resources**

#### ***Sources of Liquidity***

The Company's primary sources of liquidity are its cash and cash equivalents, marketable securities and cash generated from operations. As of December 31, 2002, the Company had \$736.5 million of cash, cash equivalents and marketable securities, all of which was unrestricted. The Company had \$707.9 million in cash, cash equivalents and marketable securities at December 31, 2001, all of which was unrestricted. Cash generated from operating activities totaled \$551.1 million, \$413.1 million and \$280.6 million for the years ended December 31, 2002, 2001 and 2000, respectively.

#### ***Financing and Investing Activities***

The Company has definitive contracts with PPL Shipyard PTE, Ltd. of Singapore for construction of two ultra-deepwater semisubmersibles and two high-performance jackups, with options for two additional similarly priced semisubmersibles, and up to four additional jackups, the first two of which are similarly priced. The Company does not intend to exercise these options. Estimated cash outlays in connection with construction of the two ultra-deepwater semisubmersibles, excluding capitalized interest, startup costs, capital spares and mobilization costs, are expected to total approximately \$570 million, or \$285 million per rig. Of the \$570 million, \$297 million had been incurred as of December 31, 2002. A total of approximately \$188 million is expected to be incurred in 2003, and an additional \$85 million is expected to be incurred in 2004. Estimated cash outlays in connection with the construction of two high-performance jackups, excluding capitalized interest, startup costs,

capital spares and mobilization costs, are expected to total approximately \$264 million, or \$132 million per rig. Of the \$264 million, \$154 million had been incurred as of December 31, 2002. A total of approximately \$95 million is expected to be incurred in 2003, and an additional \$15 million is expected to be incurred in 2004. The first of two high-performance jackups, the *GSF Constellation I*, is expected to be delivered during the second quarter of 2003, and the first of two ultra-deepwater semisubmersibles, the *GSF Development Driller I*, is expected to be delivered around the end of the first quarter 2004. The Company expects to fund the construction and startup of these rigs from its existing cash and marketable securities balances and future cash flow from operations.

None of the four vessels that the Company has under construction or has firm commitments to build has secured a contract for deployment upon completion. While the Company believes that its newbuild rigs will have substantial advantages in efficiency and capability over competitive equipment in the industry, it can provide no assurance that it will be able to obtain contracts for all of its new rigs or that the contract terms will be similar to those for similar equipment in current market conditions. The Company is actively marketing the *GSF Constellation I* and the *GSF Development Driller I*.

Other significant financing and investing activities during the year ended December 31, 2002, were as follows:

- Completed the sale of the *Key Bermuda* jackup drilling rig in the first quarter of 2002 to Nabors Drilling International Limited for \$29 million, less selling costs of approximately \$5 million.
- Received approximately \$35 million (including accrued interest), net of \$7 million in sales commissions and payments to minority owners, in the first quarter of 2002, related to the 2001 sale of the *Glomar Beaufort Sea I* concrete island drilling system, which was sold to Exxon Neftegas Limited in June 2001. The Company sold the *Glomar Beaufort Sea I* for \$45 million and received \$5 million at closing. The remaining amount, plus interest, was recorded as a receivable, which was classified in Other assets in the Consolidated Balance Sheet at December 31, 2001.
- Repurchased and retired 2,374,600 ordinary shares in the third quarter of 2002 pursuant to the Company's share repurchase program at an aggregate purchase price, including commissions, of \$51.4 million.
- Paid quarterly dividends of \$0.0325 per ordinary share for the fourth quarter of 2001 and the first three quarters of 2002. These dividend payments totaled \$30.4 million for the year ended December 31, 2002.
- Announced in December 2002 that the Company's Board of Directors declared a regular quarterly cash dividend in the amount of \$0.0325 per ordinary share. The dividend in the amount of \$7.6 million was paid on January 15, 2003, to shareholders of record as of the close of business on December 31, 2002.
- Funded approximately \$30.7 million of accrued pension liabilities related to various pension plans in July 2002. As a result of, and at the time of, this payment, the Company was approximately 100% funded with respect to its accumulated benefit obligation as of January 1, 2002.

The Company's debt to capitalization ratio, calculated as the ratio of total debt, including undefeased capitalized lease obligations, to the sum of total shareholders' equity and total debt, was 18.2% at December 31, 2002, compared to 18.8% at December 31, 2001. The Company's total debt includes the current portion of its capitalized lease obligation, which totaled \$1.8 million at both December 31, 2002 and 2001.

In January 2003, the Company entered into a lease-leaseback arrangement with a European bank related to the Company's *Britannia* cantilevered jackup. Pursuant to this arrangement, the Company leased the *Britannia* to the bank for a five-year term for a lump-sum payment of approximately \$37 million, net of origination fees of approximately \$1.5 million. The bank then leased the rig back to the Company for a five-year term, under which the Company will make annual lease payments of \$8.0 million, payable in advance. The Company has classified this arrangement as a capital lease.

On February 11, 2003, the Company issued \$250 million of 5% Notes due 2013 (the "5% Notes") and received cash proceeds of approximately \$247.6 million after deduction for discount, underwriting fees and estimated expenses. The Company plans to use the funds for general corporate purposes. Interest on the 5% Notes

is payable on February 15 and August 15 of each year beginning on August 15, 2003. No principal payments are required with respect to the 5% Notes prior to their final maturity date. The Company has agreed to file a registration statement with the Securities and Exchange Commission relating to an offer to exchange the 5% Notes for registered notes having substantially identical terms.

On a pro forma basis, assuming that the Company completed the 5% Note offering and the lease-leaseback arrangement discussed above on December 31, 2002, the Company's cash and marketable securities balances would have totaled \$1,021.1 million; total debt, including capitalized lease obligations, would have been \$1,231.6 million; and the Company's debt to capitalization ratio would have been 22.5%.

### ***Cash Flows***

In 2002, cash flow provided by operating activities totaled \$551.1 million. An additional \$93.4 million was provided from the sales of properties and equipment, \$63.6 million was provided from maturities of marketable securities, net of purchases, \$27.3 million was provided from the issuance of ordinary shares, primarily in connection with the exercise of employee stock options and \$6.4 million was provided from other sources, primarily bank overdrafts. From the \$741.8 million sum of cash inflows, \$561.3 million was used for capital expenditures, \$51.4 million was used to purchase the Company's ordinary shares as part of the Company's share repurchase program and \$30.4 million was used for dividend payments.

In 2001, cash flow provided by operating activities totaled \$413.1 million. An additional \$190.7 million, representing Santa Fe International's cash and cash equivalents balances at November 20, 2001, was received in the Merger, \$13.2 million was provided from the sales of properties and equipment and \$7.6 million was provided from the exercise of employee stock options. From the \$624.6 million sum of cash inflows, \$158.4 million was used for capital expenditures, \$24.5 million was used for purchases of marketable securities, net of maturities and \$7.7 million was used for other purposes.

In 2000, cash flow provided by operating activities totaled \$280.6 million. An additional \$292.6 million was provided from the issuance of the Zero Coupon Convertible Debentures (after deduction for legal, accounting and underwriting fees), \$14.0 million was provided from exercises of employee stock options and \$3.3 million was provided from other sources. From the \$590.5 million sum of cash inflows, \$349.9 million was used to reduce long-term debt, \$177.8 million was used for capital expenditures and \$1.8 million was used for other purposes.

### ***Future Cash Requirements***

As of December 31, 2002, the Company had total long-term debt, including the current portion of its capital lease obligation, of \$943.7 million and shareholders' equity of \$4.2 billion. Long-term debt consisted of \$327.2 million (net of discount) Zero Coupon Convertible Debentures due 2020, \$301.3 million (net of discount) 7 $\frac{1}{8}$ % Notes due 2007, \$296.7 million (net of discount) 7% Notes due 2028 and a capital lease obligation, including the current portion, totaling \$18.5 million. The Company was in compliance with its debt covenants at December 31, 2002.

Annual interest on the 7 $\frac{1}{8}$ % Notes is \$21.4 million, payable semiannually each March and September. Annual interest on the 7% Notes is \$21.0 million, payable semiannually each June and December. Annual interest on the 5% Notes issued in February 2003 is \$12.5 million, payable semiannually each February and August, beginning August 15, 2003. No principal payments are due under all three issues until the maturity date.

The Company may redeem the 7 $\frac{1}{8}$ % Notes, the 7% Notes and the 5% Notes in whole at any time, or in part from time to time, at a price equal to 100% of the principal amount thereof plus accrued interest, if any, to the date of redemption, plus a premium, if any, relating to the then-prevailing Treasury Yield and the remaining life of the notes. The indentures relating to the 5% Notes, the Zero Coupon Convertible Debentures, 7 $\frac{1}{8}$ % Notes and 7% Notes contain limitations on the Company's ability to incur indebtedness for borrowed money secured by certain liens and on its ability to engage in certain sale/leaseback transactions. The Zero Coupon Convertible Debentures, 7 $\frac{1}{8}$ % Notes and 7% Notes continue to be obligations of Global Marine. The Company has not guaranteed any of these obligations.

The Zero Coupon Convertible Debentures were issued at a price of \$499.60 per debenture, which represents a yield to maturity of 3.5% per annum to reach an accreted value at maturity of \$1,000 per debenture. The Company has the right to redeem the debentures in whole or in part on or after June 23, 2005, at a price equal to the issuance price plus accrued original issue discount through the date of redemption. Each debenture is convertible into 8.125103 GlobalSantaFe Ordinary Shares (4,875,062 total shares, as restated to reflect the effect of the exchange ratio established in the Merger) at the option of the holder at any time prior to maturity, unless previously redeemed. Holders have the right to require the Company to repurchase the debentures on June 23, 2005, June 23, 2010, and June 23, 2015, at a price per debenture of \$594.25 on June 23, 2005, \$706.82 per debenture on June 23, 2010, and \$840.73 per debenture on June 23, 2015. These prices represent the accreted value through the date of repurchase. The Company may pay the repurchase price with either cash or stock or a combination thereof. The Company does not anticipate using stock to satisfy any such future purchase obligation.

Capital expenditures for 2003 are currently estimated to be approximately \$598 million, including \$317 million in connection with the construction of the four newbuild marine rigs, \$107 million for major upgrades to the marine fleet, \$127 million for maintenance capital expenditures, \$38 million for capitalized interest and \$9 million for other capital expenditures.

The Company has various commitments primarily related to its debt and capital lease obligations, leases for office space and other property and equipment as well as commitments for construction of drilling rigs. The Company expects to fund these commitments with cash generated from operations, but may use a portion of the proceeds of the 5% Notes to satisfy these obligations.

The following table summarizes the Company's contractual obligations at December 31, 2002, giving effect to the 5% Notes and the *Britannia* lease discussed in "Financing and Investing Activities."

<u>Contractual Obligation</u>	<u>Payments Due by Period</u>				
	<u>Total</u>	<u>Less than 1 Year</u>	<u>1-2 Years</u> (In millions)	<u>3-4 Years</u>	<u>After 4 Years</u>
Principal payments on long-term debt(1) . . . . .	\$1,206.6	\$ —	\$ —	\$356.6	\$ 850.0
Interest payments . . . . .	767.6	48.8	54.9	54.9	609.0
Capital lease obligations(2) . . . . .	82.4	9.8	9.8	9.8	53.0
Non-cancellable operating leases . . . . .	62.1	11.9	10.8	9.8	29.6
Drilling rig construction commitments(3) . . . . .	383.0	283.0	100.0	—	—
Total contractual obligations . . . . .	<u>\$2,501.7</u>	<u>\$353.5</u>	<u>\$175.5</u>	<u>\$431.1</u>	<u>\$1,541.6</u>

(1) Represents cash payments required. Long-term debt is recorded net of unamortized discount at December 31, 2002. Holders of the Zero Coupon Convertible Debentures have the right to require the Company to repurchase the debentures as early as June 23, 2005.

(2) Represents cash payments required. Obligation is recorded at net present value at December 31, 2002.

(3) See discussion of newbuild construction commitments in "Financing and Investing Activities."

In August 2002, the Company's Board of Directors authorized the Company to repurchase up to \$150 million of its ordinary shares from time to time depending on market conditions, the share price and other factors. At December 31, 2002, \$98.6 million of this authorized amount remained available for future purchases.

As part of the Company's goal of enhancing long-term shareholder value, the Company has from time to time considered and actively pursued business combinations and the acquisition or construction of suitable additional drilling rigs and other assets. If the Company decides to undertake a business combination or an acquisition or additional construction projects, the issuance of additional debt or additional shares could be required.

The Company believes it will be able to meet all of its current obligations, including working capital requirements, capital expenditures and debt service, from its existing cash and marketable securities balances, the net proceeds from its 5% Notes and future cash flow from operations.

### ***Recent Accounting Pronouncements***

In 2001, the Financial Accounting Standards Board ("FASB") issued SFAS No. 142, "Goodwill and Other Intangible Assets," SFAS No. 143, "Accounting for Asset Retirement Obligations" and SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets." The Company adopted the provisions of SFAS No. 142 and SFAS No. 144 effective January 1, 2002.

SFAS No. 142 primarily addresses the accounting for goodwill and intangible assets subsequent to their initial recognition. The key provisions of SFAS No. 142:

- Eliminate the amortization of goodwill and indefinite-lived intangible assets;
- Require that goodwill and indefinite-lived intangible assets be tested at least annually for impairment (and in interim periods if certain events occur indicating that the carrying value of goodwill and/or indefinite-lived intangible assets may be impaired); and
- Require that reporting units be identified for the purpose of assessing potential future impairments of goodwill.

At December 31, 2002, Goodwill in the Company's Condensed Consolidated Balance Sheet totaled approximately \$386.9 million, substantially all of which was recorded in connection with the Merger. The Company has defined reporting units within its contract drilling segment based upon economic and market characteristics of these units. All of the goodwill recorded in connection with the Merger has been allocated to the jackup drilling fleet reporting unit, as these rigs were the primary source of value in the Merger discussions and negotiations. The estimated fair value of this reporting unit for purposes of the Company's annual goodwill impairment testing is based upon the present value of its estimated future net cash flows, utilizing a discount rate based upon the Company's cost of capital. The Company has completed its goodwill impairment testing for 2002 and was not required to record a goodwill impairment loss. The amortization of goodwill existing before the Merger was immaterial.

SFAS No. 143 establishes accounting standards for the recognition and measurement of liabilities in connection with asset retirement obligations, and is effective for fiscal years beginning after June 15, 2002. The Company does not anticipate that the required adoption of SFAS No. 143 in 2003 will have a material effect on its results of operations, financial position or cash flows.

SFAS No. 144 addresses financial accounting and reporting for the impairment or disposal of long-lived assets. SFAS No. 144, among other things:

- Establishes criteria to determine when a long-lived asset is held for sale, including a group of assets and liabilities that represents the unit of accounting for a long-lived asset classified as held for sale;
- Provides guidance on the accounting for a long-lived asset if the criteria for classification as held for sale are met after the balance sheet date but before the issuance of the financial statements; and
- Provides guidance on the accounting for a long-lived asset classified as held for sale.

The adoption of SFAS No. 144 did not have a material impact on the Company's results of operations, financial position or cash flows.

In May 2002, the FASB issued SFAS No. 145, "Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement No. 13, and Technical Corrections." The Company adopted SFAS No. 145 in the second quarter of 2002. SFAS No. 145, among other things, addresses the criteria for the classification of extinguishment of debt as an extraordinary item and addresses the accounting treatment of certain sale-leaseback transactions. The adoption of SFAS No. 145 did not have a material impact on the Company's results of operations, financial position or cash flows.

**Item 8. *Financial Statements and Supplementary Data***

**REPORT OF INDEPENDENT ACCOUNTANTS**

To the Board of Directors and Shareholders of GlobalSantaFe Corporation

In our opinion, the accompanying consolidated balance sheets and the related consolidated statements of income, shareholders' equity and cash flows present fairly, in all material respects, the financial position of GlobalSantaFe Corporation and subsidiaries (the "Company") at December 31, 2002 and 2001, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2002, in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Company's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

## **GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**

### **NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

#### **Note 1 — Basis of Presentation and Description of Business**

GlobalSantaFe Corporation (the “Company” or “GlobalSantaFe”) is an oil and gas drilling contractor, owning or operating a fleet of over 100 marine and land drilling rigs. The Company’s fleet currently includes 13 floating rigs, 44 cantilevered jackup rigs, 31 land rigs and one platform rig. In addition, the Company or its affiliates operate 11 platform rigs for third parties, and it operates two semisubmersible rigs for third parties under a joint venture agreement. The Company provides offshore oil and gas contract drilling services to the oil and gas industry worldwide on a daily rate (“dayrate”) basis. The Company also provides offshore oil and gas drilling management services on either a dayrate or completed-project, fixed-price (“turnkey”) basis, as well as drilling engineering and drilling project management services, and it participates in oil and gas exploration and production activities.

#### ***Merger of Santa Fe International Corporation and Global Marine Inc.***

On November 20, 2001, Santa Fe International Corporation (“Santa Fe International”) and Global Marine Inc. (“Global Marine”) consummated their business combination with the merger (the “Merger”) of an indirect wholly owned subsidiary of Santa Fe International with and into Global Marine, with Global Marine surviving the Merger as a wholly owned subsidiary of Santa Fe International. In connection with the Merger, Santa Fe International was renamed GlobalSantaFe Corporation. At the effective time of the Merger, each issued and outstanding share of common stock, par value \$0.10 per share, of Global Marine was converted into the right to receive 0.665 ordinary shares, par value \$0.01 per share, of GlobalSantaFe Corporation (“GlobalSantaFe Ordinary Shares”). Approximately 118 million GlobalSantaFe Ordinary Shares were issued in connection with the Merger.

#### ***Background of Santa Fe International and Global Marine***

At the time of the Merger, Santa Fe International was an international offshore and land contract driller of oil and natural gas wells and owned and operated a fleet of 26 marine drilling rigs and 31 land drilling rigs in 16 countries throughout the world. In addition, Santa Fe International operated 13 marine drilling rigs owned by third parties. Santa Fe International primarily contracted its drilling rigs, related equipment and crews to oil and gas companies on a dayrate basis. As part of its contract drilling services, Santa Fe International also provided third-party rig operations and incentive drilling services to the international oil and gas industry. In the area of drilling management services, Santa Fe International provided drilling engineering and project management services. Santa Fe International was incorporated in its current form under the laws of the Cayman Islands in 1990.

At the time of the Merger, Global Marine was a domestic and international offshore drilling contractor, with a fleet of 33 mobile offshore drilling rigs worldwide. Global Marine provided offshore drilling services on a dayrate basis in the U.S. Gulf of Mexico and internationally. Global Marine also provided drilling management services on a turnkey basis. As part of its drilling management services, Global Marine also provided planning, engineering and management services beyond the scope of its traditional contract drilling business. Global Marine also engaged in oil and gas exploration, development and production activities principally in order to facilitate the acquisition of turnkey contracts for its drilling management services operations.

#### ***Merger Transaction***

The Merger was accounted for as a purchase business combination in accordance with accounting principles generally accepted in the United States of America. As the stockholders of Global Marine owned slightly over 50% of the Company after the Merger, Global Marine was considered the acquiring entity for accounting purposes. Accordingly, the historical basis of Global Marine in its assets and liabilities has been carried forward to the consolidated financial statements of the Company. The assets and liabilities of Santa Fe International have been recorded at estimated fair market value at the date of the Merger in the consolidated financial statements of

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

the Company, with the excess of the purchase price over the sum of such fair values recorded as goodwill. The purchase price of \$2,567.1 million was calculated using the number of Santa Fe International ordinary shares outstanding immediately prior to the Merger and a \$14.67 per share average trading price of Global Marine's common stock, as adjusted for the merger ratio (\$22.06 per share, as adjusted), for a period of time immediately before and after the Merger was announced, plus the estimated fair value of Santa Fe International's outstanding stock options.

The following table summarizes the allocation of the purchase price to the specific assets and liabilities of Santa Fe International based on estimates of fair values and costs at the time of the Merger. All of the goodwill was assigned to the Company's contract drilling segment. Goodwill recorded in connection with the Merger is nondeductible for tax purposes.

	(In millions)
Current assets .....	\$ 526.7
Properties, plant and equipment .....	1,958.7
Other assets .....	38.1
Goodwill .....	<u>382.1</u>
	2,905.6
Current liabilities .....	(259.4)
Deferred income taxes .....	(17.5)
Other liabilities .....	<u>(61.6)</u>
	<u>\$2,567.1</u>

The recording of goodwill is supported by the nature of the offshore drilling industry, the acquisition of long-lived drilling equipment and the long-standing relationships between Santa Fe International and its core customers. Subsequent to the Merger, \$4.3 million of additional goodwill was recognized due primarily to additional employee separation costs incurred.

The consolidated balance sheets as of December 31, 2002 and 2001, represent the consolidated financial position of the combined company. The statements of income, cash flows and shareholders' equity for the year ended December 31, 2002, reflect the results of the combined company. The statements of income, cash flows and shareholders' equity for the year ended December 31, 2001, include the results of Global Marine for the full-year 2001 and the results of Santa Fe International from November 20, 2001 (42 days). The statements of income, cash flows and shareholders' equity for the year ended December 31, 2000, reflect the historical results of Global Marine. Share and per share data for all periods prior to the Merger have been restated to reflect the exchange ratio as outlined in the merger agreement.

***Pro Forma Financial Information (Unaudited)***

The following unaudited condensed consolidated pro forma results for the years ended December 31, 2001 and 2000, has been prepared as if the Merger had occurred on January 1, 2000. Revenues for both periods have been reclassified pursuant to EITF Issue 01-14 (see discussion in "Basis of Presentation"). If Global Marine and Santa Fe International had merged on this date, GlobalSantaFe might have performed differently. The pro forma financial information should not be relied on as an indication of the financial position or results of operations that

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

the Company would have achieved had the Merger taken place at a different date or of the future results that the Company will achieve.

	Year Ended December 31,	
	2001	2000
	(In millions, except per share data)	
Revenues .....	\$ 2,058.5	\$ 1,658.0
Operating income .....	497.7	293.7
Income before income taxes .....	525.1	276.0
Net income .....	377.8	232.6
Earnings per ordinary share:		
Basic .....	\$ 1.62	\$ 1.00
Diluted .....	\$ 1.59	\$ 0.98

The pro forma information includes adjustments for additional revenue based on the fair market value of certain drilling contracts acquired, additional depreciation based on the fair market value of drilling rigs and other property and equipment acquired, elimination of goodwill amortization and related adjustments for income taxes, reflecting the incremental benefit attributable to the effect of the Company's tax structure on the earnings of the combined companies.

***Restructuring Costs***

In connection with the Merger, the Company implemented a restructuring program that included the consolidation of Santa Fe International's administrative office in Dallas, Texas, Global Marine's administrative office in Lafayette, Louisiana, and Global Marine's administrative office in Houston, Texas, into a single administrative office in Houston, the consolidation of Santa Fe International's and Global Marine's North Sea administrative offices in Aberdeen, Scotland and the separation of 167 employees from the Company. The employee functions affected were primarily corporate support in nature and included accounting, information technology, and employee benefits, among others. Approximately 60% of the affected positions were located in Dallas, 23% were located in Houston and Lafayette, and the remaining 17% were located in Aberdeen.

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

Estimated restructuring costs associated with Global Marine were recorded as a pretax charge in the fourth quarter of 2001. Changes in estimated costs, consisting mainly of refinements of cost estimates, and payments related to these restructuring costs for the year ended December 31, 2002, are summarized as follows:

<u>Restructuring Costs:</u>	<u>Employee Severance Costs</u>	<u>Office Closures and Consolidation of Facilities(1)</u>	<u>Directors' Separation and Other Costs(1)</u>	<u>Total</u>
	(\$ in millions)			
<b>Houston and Lafayette Offices:</b>

Liability at 12/31/02 .....	<u>\$ 3.5</u>	<u>\$ 4.6</u>	<u>\$ 2.0</u>	<u>\$ 10.1</u>

(1) The liability at December 31, 2002, included \$2.0 million of special termination costs related to certain retirement plans, which were included in Other long-term liabilities in the Consolidated Balance Sheets.

Estimated costs associated with Santa Fe International's employee severance and closure of its Dallas and Aberdeen offices were recognized as a liability assumed in the purchase business combination and included in the cost of acquisition in accordance with the provisions of Statement of Financial Accounting Standards ("SFAS") No. 141, "Business Combinations." Changes in estimated costs, consisting primarily of costs associated with employee terminations and further employee relocation costs, and payments related to this liability for the year ended December 31, 2002, are summarized as follows:

<u>Purchase Price:</u>	<u>Employee Separation Costs</u>	<u>Employee Relocation Costs</u>	<u>Office Closures and Consolidation of Facilities(1)</u>	<u>Directors' Separation and Other Costs</u>	<u>Total</u>
	(\$ in millions)				
Number of Employees — 113					
Liability at 12/31/01 .....	\$ 9.5	\$ 5.4	\$ 11.5	\$ 0.9	\$ 27.3
Changes in estimated costs ....	4.8	2.8	—	(0.4)	7.2
2002 payments .....	<u>(11.6)</u>	<u>(7.7)</u>	<u>(1.2)</u>	<u>(0.2)</u>	<u>(20.7)</u>
Liability at 12/31/02 .....	<u>\$ 2.7</u>	<u>\$ 0.5</u>	<u>\$ 10.3</u>	<u>\$ 0.3</u>	<u>\$ 13.8</u>

(1) The liability at December 31, 2002, included \$7.6 million related to the Dallas office lease obligation, which was included in Other long-term liabilities in the Consolidated Balance Sheets.

**GLOBAL SANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

All remaining accrued estimated restructuring costs associated with Global Marine and costs associated with Santa Fe International's employee severance and closure of its Dallas and Aberdeen offices are included in Other accrued liabilities on the Consolidated Balance Sheets, except for special termination costs and long-term office lease obligations noted in the tables above.

In addition to the amounts in the above table, Santa Fe International paid \$10.0 million to SFIC Holdings (Cayman), Inc. ("SFIC Holdings") in consideration for SFIC Holdings' consent to the Merger. This consent was required pursuant to an intercompany agreement with Kuwait Petroleum Corporation and SFIC Holdings that required the consent of SFIC Holdings to, among other things, significant corporate actions by Santa Fe International, including the issuance of equity securities, sale of significant assets or a change in the corporate domicile of Santa Fe International or any of its subsidiaries (see Note 14).

***Dividends***

Holders of GlobalSantaFe Ordinary Shares are entitled to participate in the payment of dividends in proportion to their holdings. Under Cayman Islands law, the Company may pay dividends or make other distributions to the Company's shareholders, in such amounts as the Board of Directors deems appropriate from the profits of the Company or out of the Company's share premium account (equivalent to additional paid-in capital) if the Company thereafter has the ability to pay its debts as they come due. Cash dividends, if any, will be declared and paid in U.S. dollars. The Company has declared cash dividends of \$7.6 million that were unpaid as of December 31, 2002.

***Basis of Presentation***

The accompanying consolidated financial statements and related footnotes are presented in U.S. dollars and in accordance with accounting principles generally accepted in the United States of America. Certain prior period amounts have been reclassified to conform to the current presentation.

In April 2002, the Emerging Issues Task Force ("EITF") of the Financial Accounting Standards Board reached a consensus on Issue 01-14, "Income Statement Characterization of Reimbursement Received for 'Out-of-Pocket' Expenses Incurred." The EITF consensus requires that all reimbursements received for out-of-pocket expenses incurred be characterized as revenue in the income statement. The Company previously recorded certain reimbursements received from customers as a reduction of the related expenses incurred. As part of the implementation of the consensus in this issue, the Company has reclassified certain reimbursements received from customers for the years ended December 31, 2001 and 2000, as revenues and related operating expenses to conform to the current presentation. Operating income and net income for all periods presented were not affected by this reclassification. Amounts classified as revenues and expenses for 2002 pursuant to this consensus and the amounts of revenues and expenses reclassified by segment for each prior period presented are as follows (in millions):

	<u>Year Ended December 31,</u>		
	<u>2002</u>	<u>2001</u>	<u>2000</u>
Contract drilling .....	\$74.9	\$26.5	\$14.4
Drilling management services .....	<u>11.3</u>	<u>7.7</u>	<u>4.5</u>
	<u>\$86.2</u>	<u>\$34.2</u>	<u>\$18.9</u>

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

**Note 2 — Summary of Significant Accounting Policies**

*Principles of Consolidation*

The Company consolidates all of its majority-owned subsidiaries and joint ventures over which the Company exercises control through the joint venture agreement or related operating and financing agreements. The Company accounts for its interest in other joint ventures using the equity method. All material intercompany accounts and transactions are eliminated in consolidation.

*Cash Equivalents and Marketable Securities*

Cash equivalents include highly liquid debt instruments with remaining maturities of three months or less at the time of purchase. The Company's marketable securities, consisting of investment grade securities with relatively short-term maturities, are classified as held-to-maturity. The carrying value of these securities approximates market value due to the short-term nature of these securities. The Company also holds investment grade securities in connection with certain nonqualified pension plans (see Note 3), which are classified as available-for-sale. These investments are reported at fair value, with unrealized gains and losses excluded from earnings and reported as a separate component of shareholders' equity.

*Properties and Depreciation*

*Rigs and Drilling Equipment.* Capitalized costs of rigs and drilling equipment include all costs incurred in the acquisition of capital assets including allocations of interest costs incurred during periods that assets are under construction or refurbishment. Expenditures for maintenance and repairs are charged to expense as incurred. Costs of property sold or retired and the related accumulated depreciation are removed from the accounts; resulting gains or losses are included in income.

Jackup drilling rigs and semisubmersibles are depreciated over lives ranging from 15 to 30 years, with salvage values of \$0.5 million and \$1.0 million, respectively, per rig. All land drilling rigs are depreciated over 15-year lives with no salvage value. Drillships, with the exception of the *Glomar Explorer*, are depreciated over 20-year lives, with salvage values of \$1.0 million per rig. The *Glomar Explorer* is being depreciated over the time that remained on its 30-year lease as of the date it entered service following its conversion to a drillship, or approximately 28 years, with no salvage value.

Rigs and drilling equipment included \$1.0 billion of assets recorded under capital leases at both December 31, 2002 and 2001. Accumulated amortization of assets under capital leases totaled \$134.2 million and \$84.8 million at December 31, 2002 and 2001, respectively.

The Company reviews its long-term assets for impairment when changes in circumstances indicate that the carrying amount of the asset may not be recoverable, in accordance with Statement of Financial Accounting Standards ("SFAS") No. 144, "Accounting for the Impairment and Disposal of Long-lived Assets." SFAS No. 144 requires that long-lived assets and certain intangibles to be held and used be reported at the lower of carrying amount or fair value. Assets to be disposed of and assets not expected to provide any future service potential to the Company are recorded at the lower of carrying amount or fair value less cost to sell. The Company recorded no impairment charges during the years ended December 31, 2002, 2001 or 2000.

*Oil and Gas Properties.* The Company uses the full-cost method of accounting for oil and gas exploration and development costs. Under this method of accounting, the Company capitalizes all costs incurred in the acquisition, exploration and development of oil and gas properties and amortizes such costs, together with estimated future development and dismantlement costs, using the units-of-production method.

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

***Goodwill***

The Company accounts for goodwill in accordance with the provisions of SFAS No. 142, "Goodwill and Other Intangible Assets." SFAS No. 142 primarily addresses the accounting for goodwill and intangible assets subsequent to their initial recognition. The key provisions of SFAS No. 142:

- Eliminate the amortization of goodwill and indefinite-lived intangible assets;
- Require that goodwill and indefinite-lived intangible assets be tested at least annually for impairment (and in interim periods if certain events occur indicating that the carrying value of goodwill and/or indefinite-lived intangible assets may be impaired); and
- Require that reporting units be identified for the purpose of assessing potential future impairments of goodwill.

At December 31, 2002, Goodwill in the Company's Condensed Consolidated Balance Sheet totaled approximately \$386.9 million, substantially all of which was recorded in connection with the Merger (see Note 1). The Company has defined reporting units within its contract drilling segment based upon economic and market characteristics of these units. All of the goodwill recorded in connection with the Merger has been allocated to the jackup drilling fleet reporting unit, as these rigs were the primary source of value in the Merger discussions and negotiations. The estimated fair value of this reporting unit for purposes of the Company's annual goodwill impairment testing is based upon the present value of its estimated future net cash flows, utilizing a discount rate based upon the Company's cost of capital. The Company has completed its goodwill impairment testing for 2002 and was not required to record a goodwill impairment loss. The amortization of goodwill existing before the Merger was immaterial.

***Revenue Recognition***

The Company's contract drilling business provides crewed rigs to customers on a daily rate (i.e., "dayrate") basis. Dayrate contracts can be for a specified period of time or the time required to drill a specified well or number of wells. Revenues and expenses from dayrate drilling operations, which are classified under contract drilling services, are recognized on a per-day basis as the work progresses. Lump-sum fees received as compensation for the cost of relocating drilling rigs from one major operating area to another, whether received up-front or upon termination of the drilling contract, are recognized as earned, which is generally over the term of the related drilling contract.

The Company also designs and executes specific offshore drilling or well-completion programs for customers at fixed prices under short-term "turnkey" contracts. Revenues and expenses from turnkey contracts, which are classified under drilling management services, are earned and recognized upon completion of each contract using the completed contract method of accounting.

***Derivative Financial Instruments***

From time to time, the Company may make use of derivative financial instruments to manage its exposure to fluctuations in cash flows, interest rates or foreign currency exchange rates. The Company accounts for its derivative financial instruments pursuant to SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities," as amended by SFAS No. 138, "Accounting for Derivative Instruments and Hedging Activities — an amendment of FASB Statement No. 133." Derivative instruments held by the Company at December 31, 2002, include dayrate contracts on two of the Company's drilling rigs that are indexed to exchange-traded oil futures contracts, various commodity caps, swaps and floors used to mitigate the Company's exposure to fluctuations in the fair values of these dayrate contracts, and an interest rate swap related to the Company's 7½% Notes due 2007 (see Note 7).

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

***Foreign Currency Transactions***

The United States dollar is the functional currency for all of the Company's operations. Realized and unrealized foreign currency transaction gains and losses are recorded in income.

The Company may be exposed to the risk of foreign currency exchange losses in connection with its foreign operations. Such losses are the result of holding net monetary assets (cash and receivables in excess of payables) denominated in foreign currencies during periods of a strengthening U.S. dollar. The Company attempts to lessen the impact of exchange rate changes by requiring customer payments to be primarily in U.S. dollars, by keeping foreign cash balances at minimal levels and by not speculating in foreign currencies.

***Income Taxes***

The Company is a Cayman Islands company. The Cayman Islands does not impose corporate income taxes. Consequently, income taxes have been provided based on the tax laws and rates in effect in the countries in which the operations are conducted and income is earned. The income taxes in these jurisdictions vary substantially. The Company's effective tax rate for financial statement purposes will continue to fluctuate from year to year as the Company's operations are conducted in different taxing jurisdictions. The Company's ability to realize the benefit of its deferred tax assets requires that the Company achieve certain future earnings levels prior to the expiration of its NOL carryforwards.

The Company has not provided for U.S. deferred taxes on the unremitted earnings of its U.S. subsidiaries and their controlled foreign corporations ("U.S. Subsidiaries") that are permanently reinvested. Should the Company make a distribution from the unremitted earnings of its U.S. Subsidiaries, the Company would be required to record additional U.S. deferred taxes.

***Stock-Based Compensation Plans***

The Company accounts for its stock option and stock-based compensation plans using the intrinsic-value method prescribed by Accounting Principles Board ("APB") Opinion No. 25. Accordingly, the Company computes compensation cost for each employee stock option granted as the amount by which the quoted market price of the Company's common stock on the date of grant exceeds the amount the employee must pay to acquire the stock. The amount of compensation cost, if any, is charged to income over the vesting period. No compensation cost has been recognized for options granted under the Company's Employee Share Purchase Plan or for any of the Company's outstanding stock options, all of which have exercise prices equal to the market price of the stock on the date of grant. The Company does, however, recognize compensation cost for all grants of performance-based stock awards (see Note 8).

Had compensation cost for the Company's stock-based compensation plans been determined based on fair values as of the dates of grant, the Company's net income and earnings per share would have been reported as

**GLOBAL SANTAFE CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

follows (earnings per share amounts for 2000 have been restated to reflect the effect of the exchange ratio as outlined in the Merger):

	<u>2002</u>	<u>2001</u>	<u>2000</u>
	<small>(In millions, except per share amounts)</small>		
Net income, as reported .....	\$277.9	\$198.8	\$113.9
Deduct: Total stock-based employee compensation expense determined under fair value-based method for all awards, net of related tax effects .....	<u>(18.3)</u>	<u>(17.8)</u>	<u>(12.4)</u>
Pro forma net income .....	<u>\$259.6</u>	<u>\$181.0</u>	<u>\$101.5</u>
Basic earnings per ordinary share — as reported .....	\$ 1.19	\$ 1.52	\$ 0.98
— pro forma .....	\$ 1.11	\$ 1.39	\$ 0.87
Diluted earnings ordinary per share — as reported .....	\$ 1.18	\$ 1.50	\$ 0.95
— pro forma .....	\$ 1.10	\$ 1.36	\$ 0.86

The pro forma figures in the preceding table may not be representative of pro forma amounts in future years.

The weighted average per share fair value of stock options as of the grant date was \$15.82 in 2002, \$13.29 in 2001 and \$11.73 in 2000. The weighted average per share fair value of the outstanding Santa Fe International stock options at November 20, 2001 was \$4.94. The per share value of options granted under the Employee Share Purchase Plan was \$9.61 for 2002. The per share fair value of the Company's performance-based stock awards as of the grant date was \$23.92 in 2002, \$29.36 in 2001 and \$19.32 in 2000.

Estimates of fair values of stock options, options granted under the Employee Share Purchase Plan and performance-based stock awards on the grant dates for purposes of calculating the pro forma data in the table above were computed using the Black-Scholes option-pricing model based on the following assumptions:

	<u>2002</u>	<u>2001</u>	<u>2000</u>
Expected price volatility range .....	60%	49% to 60%	53% to 56%
Risk-free interest rate range .....	2.0% to 4.5%	4.2% to 5.0%	5.9% to 6.7%
Expected annual dividends .....	\$0.13	none — \$0.13	none
Expected life of stock options .....	5 years	5 years	5 years
Expected life of Employee Share Purchase Plan options .....	1 year	N/A	N/A
Expected life of performance-based stock awards .....	3 years	3 years	3 years

***Use of Estimates***

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make certain estimates and assumptions. These estimates and assumptions affect the carrying values of assets and liabilities and disclosures of contingent assets and liabilities at the balance sheet date and the amounts of revenues and expenses recognized during the period. Actual results could differ from such estimates.

**Note 3 — Investments**

At December 31, 2002 and 2001, the Company had investments in commercial paper, money market funds and Eurodollar time deposits that were classified as held-to-maturity and carried at amortized cost. These investments are classified as Marketable securities on the Consolidated Balance Sheets. Due to the short-term

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

maturities of these instruments, the fair value of these investments in debt securities approximated their carrying value; therefore, there were no unrealized holding gains or losses as of December 31, 2002 or 2001.

In addition, the Company had other investments in debt and equity securities classified as available-for-sale held in connection with certain nonqualified pension plans. These investments, which were included in Other assets at December 31, are disclosed in the table that follows:

	2002			2001		
	Cost	Unrealized Gain (Loss)	Fair Value	Cost	Unrealized Gain (Loss)	Fair Value
	(In millions)					
Fixed-income mutual funds .....	\$ 6.7	\$ —	\$ 6.7	\$ 6.0	\$ —	\$ 6.0
Equity mutual funds .....	9.0	(0.3)	8.7	7.8	(0.8)	7.0
Balanced mutual funds .....	11.2	—	11.2	5.9	—	5.9
Other .....	0.7	—	0.7	0.3	—	0.3
	<u>\$27.6</u>	<u>\$ (0.3)</u>	<u>\$27.3</u>	<u>\$20.0</u>	<u>\$ (0.8)</u>	<u>\$19.2</u>

**Note 4 — Long-term Debt**

Long-term debt as of December 31 consisted of the following:

	2002	2001
	(In millions)	
7 $\frac{1}{8}$ % Notes due 2007, net of unamortized discount of \$0.3 million at December 31, 2002, and \$0.4 million at December 31, 2001(1) .....	\$301.3	\$299.6
7% Notes due 2028, net of unamortized discount of \$3.3 million at December 31, 2002, and \$3.4 million at December 31, 2001 .....	296.7	296.6
Zero Coupon Convertible Debentures due 2020, net of unamortized discount of \$272.8 million at December 31, 2002, and \$284.0 million at December 31, 2001 .....	<u>327.2</u>	<u>316.0</u>
Long-term debt .....	<u>\$925.2</u>	<u>\$912.2</u>

(1) The balance at December 31, 2002, includes a mark-to-market adjustment of \$1.6 million as part of fair value hedge accounting related to the Company's fixed-for-floating interest rate swap (see Note 7).

The Zero Coupon Convertible debentures were issued at a price of \$499.60 per debenture, which represents a yield to maturity of 3.5% per annum to reach an accreted value at maturity of \$1,000 per debenture. The Company has the right to redeem the debentures in whole or in part on or after June 23, 2005, at a price equal to the issuance price plus accrued original issue discount through the date of redemption. Each debenture is convertible into 8.125103 GlobalSantaFe ordinary shares (4,875,062 total shares, as restated to reflect the effect of the exchange ratio established in the Merger) at the option of the holder at any time prior to maturity, unless previously redeemed. Holders have the right to require the Company to repurchase the debentures on June 23, 2005, June 23, 2010, and June 23, 2015, at a price per debenture of \$594.25 on June 23, 2005, \$706.82 per debenture on June 23, 2010, and \$840.73 per debenture on June 23, 2015. These prices represent the accreted value through the date of repurchase. The Company may pay the repurchase price with either cash or shares or a combination thereof.

No principal payments are required with respect to either the 7 $\frac{1}{8}$ % Notes or the 7% Notes prior to their final maturity date. The Company may redeem the 7 $\frac{1}{8}$ % Notes and the 7% Notes in whole at any time, or in part from time to time, at a price equal to 100% of the principal amount thereof plus accrued interest, if any, to the date of

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

redemption, plus a premium, if any, relating to the then-prevailing Treasury Yield and the remaining life of the notes.

The indentures relating to the Zero Coupon Convertible Debentures, 7 $\frac{1}{8}$ % Notes and 7% Notes contain limitations on Global Marine's ability to incur indebtedness for borrowed money secured by certain liens and to engage in certain sale/leaseback transactions. The Zero Coupon Convertible Debentures, 7 $\frac{1}{8}$ % Notes and 7% Notes continue to be obligations solely of Global Marine. The Company has not guaranteed the Notes.

All of the Company's debt is unsecured and unsubordinated and ranked equally in right of payment with all other unsecured and unsubordinated obligations of the Company.

Subsequent to the balance sheet date, on February 11, 2003, the Company issued \$250 million of 5% Notes due 2013 (the "5% Notes") in a private placement and received cash proceeds of approximately \$247.6 million after deduction for discount, underwriting fees and estimated expenses. The Company plans to use the funds for general corporate purposes. The 5% Notes are unsecured senior obligations of the Company and rank equally with all other senior unsecured indebtedness of the Company. The 5% Notes, however, have a junior position to the claims of holders of the indebtedness and capital lease obligations of Global Marine and its subsidiaries on Global Marine's assets and earnings. The indenture relating to the 5% Notes contains limitations on the Company's ability to incur indebtedness for borrowed money secured by certain liens and on its ability to engage in certain sale/leaseback transactions. The indenture, however, does not restrict the Company's ability to incur additional senior indebtedness. Interest on the 5% Notes is payable on February 15 and August 15 of each year beginning on August 15, 2003. No principal payments are required with respect to the 5% Notes prior to their final maturity date.

The Company may redeem the 5% Notes in whole or in part, at any time and from time to time, at a price equal to 100% of the principal amount plus accrued interest to the redemption date, plus a premium relating to the then-prevailing Treasury Yield and the remaining life of the notes. The Company has agreed to file a registration statement with the Securities and Exchange Commission relating to an exchange offer to exchange the 5% Notes for registered notes having substantially identical terms.

**Note 5 — Commitments and Contingencies**

At December 31, 2002, the Company had office space and equipment under operating leases with remaining terms ranging from approximately one to seven years. Certain of the leases may be renewed at the Company's option, and some are subject to rent revisions based on the Consumer Price Index or increases in building operating costs. In addition, at December 31, 2002, the Company had the *Glomar Explorer* drillship under capital lease through 2026. Total rent expense was \$73.9 million for 2002, \$116.9 million for 2001, and \$114.4 million for 2000. Included in rent expense was the rental of offshore drilling rigs used in the Company's turnkey operations totaling \$55.0 million for 2002, \$109.9 million for 2001, and \$108.4 million for 2000.

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

Future minimum rental payments with respect to the Company's lease obligations as of December 31, 2002, were as follows:

	<u>Capital Lease</u>	<u>Operating Leases</u>
	(In millions)	
Year ended December 31:		
2003.....	\$ 1.8	\$ 11.9
2004.....	1.8	10.8
2005.....	1.8	9.8
2006.....	1.8	7.9
2007.....	1.8	5.9
Later years .....	<u>33.4</u>	<u>15.8</u>
Total future minimum.....	42.4	<u>\$ 62.1</u>
Less amount representing imputed interest.....	<u>(23.9)</u>	
Present value of future minimum rental payments under capital lease.....	18.5	
Less current portion included in accrued liabilities .....	<u>(1.8)</u>	
Long-term capital lease obligation .....	<u>\$ 16.7</u>	

As of December 31, 2002, the Company had operating leases in place for Santa Fe International's offices in Dallas, Texas and Aberdeen, Scotland and Global Marine's office in Lafayette, Louisiana, which have been closed as part of the restructuring program described in Note 1. These costs are included in the table above. Costs associated with the closure of Santa Fe International's offices in Dallas and Aberdeen totaling approximately \$11.5 million were recognized as a liability assumed in the Merger and included in the cost of acquisition in accordance with SFAS No. 141, "Business Combinations." Estimated costs related to the closure of Global Marine's Lafayette office along with the consolidation of the Company's offices in Aberdeen and Houston totaling approximately \$4.3 million were accrued as part of Restructuring costs in the consolidated financial statements for the year ended December 31, 2001. These estimated costs assumed that Global Marine's Houston office would be subleased to a third party. The Company, however, has not yet entered into such a transaction. Consequently, the Company has revised its original estimate of closure costs associated with Global Marine's former office space to \$7.2 million.

In March 2002, the Company entered into a sublease agreement with BP America Inc. for the Company's current executive offices located at 15375 Memorial Drive, Houston, Texas. This sublease expires in September 2009. Lease payments pursuant to this sublease total \$2.3 million per year. The Company has also entered into an 11-year lease for the Company's Aberdeen, Scotland office. Payments pursuant to this lease total £597,000 (approximately \$1 million) per year.

Subsequent to the balance sheet date, in January 2003, the Company entered into a lease-leaseback arrangement with a European bank related to the Company's *Britannia* cantilevered jackup. Pursuant to this arrangement, the Company leased the *Britannia* to the bank for a five-year term for a lump-sum payment of approximately \$37 million, net of origination fees of \$1.5 million. The bank then leased the rig back to the Company for a five-year term, under which the Company will make annual lease payments of \$8.0 million. The Company has classified this arrangement as a capital lease.

***Capital Commitments***

The Company has definitive contracts with PPL Shipyard PTE, Ltd. of Singapore for construction of two ultra-deepwater semisubmersibles and two high-performance jackups, with options for two additional similarly

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

priced semisubmersibles, and up to four additional jackups, the first two of which are similarly priced. The Company does not intend to exercise any of these options. Contractual obligations in connection with construction of the two ultra-deepwater semisubmersibles, excluding capitalized interest, capital spares, startup expenses and mobilization costs, are expected to total approximately \$570 million, or \$285 million per rig. Of the \$570 million, \$297 million had been incurred as of December 31, 2002. Contractual obligations in connection with construction of the two high-performance jackups, excluding capitalized interest, capital spares, startup expenses and mobilization costs, are expected to total approximately \$264 million, or \$132 million per rig. Of the \$264 million, \$154 million had been incurred as of December 31, 2002.

***Legal Proceedings***

Applied Drilling Technology Inc. ("ADTI"), a wholly owned subsidiary of the Company, was a defendant in a civil lawsuit filed in September 2001 by Newfield Exploration Co. ("Newfield") and its insurance underwriters in the United States District Court for the Eastern District of Louisiana. The lawsuit arose out of damage caused to an offshore well owned by Newfield, which had been drilled by ADTI pursuant to a turnkey contract. The lawsuit has been dismissed with prejudice by the court, and Newfield has waived its right to appeal.

In 1998, the Company entered into fixed-price contracts with Harland and Wolff Shipbuilding and Heavy Industries Limited (the "Shipbuilder") totaling \$315 million for the construction of two dynamically positioned, ultra-deepwater drillships, the *Glomar C.R. Luigs* and the *Glomar Jack Ryan*, originally scheduled for delivery in the fourth quarter of 1999 and first quarter of 2000, respectively. Pursuant to two 20-year capital lease agreements, the Company subsequently novated the construction contracts for the drillships to two financial institutions (the "Lessors"), which now own the drillships and lease them to the Company. The Company acted as the Lessors' construction supervisor and has paid on behalf of the Lessors, or provided for the Lessors' payment of, all amounts it believes were required under the terms of the contracts, including payments for all approved change orders.

In November 1999, because the Company was concerned about the Shipbuilder's financial viability and the satisfactory completion of the drillships in a timely manner, the Company agreed to provide additional funding to the Shipbuilder for completion of the two drillships in exchange for certain assurances by the Shipbuilder and its parent, Fred. Olsen Energy ASA (the "Funding Agreement"). The Company ultimately provided a total of \$103.1 million under the Funding Agreement.

The Lessors and the Company were involved in arbitration proceedings with the Shipbuilder, in which the Shipbuilder claimed breach of contract in connection with the Company's obligations regarding design of the drillships, the timely delivery to the Shipbuilder of owner furnished equipment and information relating thereto, change orders and additional compensation for increased steelweight. The Company was involved in an arbitration proceeding with Fred. Olsen Energy ASA ("Olsen") relating to disputes under the Funding Agreement. In February 2003, the Lessors and the Company agreed to pay an additional \$8.2 million to the Shipbuilder and Olsen in exchange for settlement of all outstanding disputes between the parties. This amount is to be adjusted by reference to the award to be issued by the arbitration tribunal for the cost of completion arbitration in respect of the *Glomar Jack Ryan*, subject to a minimum amount of \$7.7 million and a maximum amount of \$10.0 million. In the event that the Company is required to pay the maximum amount of \$10.0 million, total cost of construction will be \$485.1 million for the two drillships.

The Company filed a claim in 1993 in the amount of \$40.6 million with the United Nations Compensation Commission ("UNCC") for losses suffered as a result of the Iraqi invasion of Kuwait in 1990. The claim was for the loss of four rigs and associated equipment, lost revenue, and miscellaneous expenditures. The Governing Council of the UNCC has awarded the Company compensation in the amount of \$22.1 million in a final, non-appealable, adjudication of the claim. The Company has been advised that the funds will be paid upon receipt of a formal request, which has now been made.

**GLOBAL SANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

***Environmental Matters***

The Company has certain potential liabilities in the area of claims under the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA") and similar state acts regulating cleanup of various waste disposal sites, including those described below. CERCLA is intended to expedite the remediation of hazardous substances without regard to fault. Potentially responsible parties ("PRPs") for each site include present and former owners and operators of, transporters to and generators of the substances at the site. Liability is strict and can be joint and several.

The Company has been named as a PRP in connection with a site located in Santa Fe Springs, California known as the Waste Disposal, Inc. site. The Company and other PRPs have agreed with the U.S. Environmental Protection Agency ("EPA") and the U.S. Department of Justice ("DOJ") to settle their potential liabilities for this site by agreeing to perform the remaining remediation required by EPA. The form of the agreement is a consent decree which has not yet been lodged or entered by the court. Although the settlement is not final until the decree is entered by the court, the Company expects the decree to be entered by the Court. The parties to the settlement have entered into a participation agreement which makes the Company liable for an estimated 7.7% of the remediation costs. Although the remediation costs cannot be determined with certainty until the remediation is complete, the consultant advising the group with respect to remediation believes that the remediation costs will be such that the Company's share of the remaining remediation costs will be less than \$800,000. There are additional potential liabilities related to the site, but these cannot be quantified, and there is no reason at this time to believe that they will be material.

The Company has also been named as a PRP in connection with a site in California known as the Casmalia Resources Site. The Company and other PRPs have entered into an agreement with EPA and DOJ to resolve their potential liabilities. This agreement is also not final until the agreed-upon Consent Decree is entered by the court, but it is likely that it will be. Under the settlement, the Company is not likely to owe any substantial additional amounts for this site beyond what the Company has already paid. There are additional potential liabilities at this site, but these cannot be quantified at this time, and there is no reason to believe that they will be material.

The Company has been named as one of many PRPs in connection with a site located in Carson, California formerly maintained by Cal Compact Landfill. On February 15, 2002, the Company was served with a required 90-day notification that eight California cities, on behalf of themselves and other PRPs, intend to commence an action against the Company under the Resource Conservation and Recovery Act ("RCRA"). On April 1, 2002, a Complaint was filed by the cities against the Company and others alleging that they have liabilities in connection with the site. However, the Complaint has not been served. The site was closed in or around 1965, and the Company does not have sufficient information to enable it to assess its potential liability, if any, for this site.

Resolutions of other claims by the U.S. Environmental Protection Agency, the involved state agency and/or PRPs are at various stages of investigation. These investigations involve determinations of:

- the actual responsibility attributed to the Company and the other PRPs at the site;
- appropriate investigatory and/or remedial actions; and
- allocation of the costs of such activities among the PRPs and other site users.

The Company's ultimate financial responsibility in connection with those sites may depend on many factors, including:

- the volume and nature of material, if any, contributed to the site for which the Company is responsible;
- the numbers of other PRPs and their financial viability; and
- the remediation methods and technology to be used.

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

It is difficult to quantify with certainty the potential cost of these environmental matters, particularly in respect of remediation obligations. Nevertheless, based upon the information currently available, the Company believes that its ultimate liability arising from all environmental matters, including the liability for all other related pending legal proceedings, asserted legal claims and known potential legal claims which are likely to be asserted, is adequately accrued and should not have a material effect on the Company's financial position or ongoing results of operations. Estimated costs of future expenditures for environmental remediation obligations are not discounted to their present value.

***Contingencies and Other Legal Matters***

Pursuant to the capital lease agreements on the Company's two dynamically positioned, ultra-deepwater drillships, the *Glomar C.R. Luigs* and the *Glomar Jack Ryan* discussed above in "Legal Proceedings," the Company has deposited with three large foreign banks (the "Payment Banks") amounts equal to the progress payments that the Lessors were required to make under the construction contracts, less a lease benefit of approximately \$62 million (the "Defeasance Payment"). In exchange for the deposits, the Payment Banks have assumed liability for making rental payments required under the leases and the Lessors have legally released the Company as the primary obligor of such rental payments. Accordingly, the Company has recorded no capital lease obligations on its balance sheet with respect to the two drillships. The *Glomar C.R. Luigs* and the *Glomar Jack Ryan* began operating under contract in April and December 2000, respectively.

The Company has interest rate risk in connection with its fully defeased financing leases for the *Glomar Jack Ryan* and *Glomar C. R. Luigs*. The Defeasance Payment earns interest based on the British Pound Sterling three-month LIBOR, which approximated 8.00% at the time of the agreement. Should the Defeasance Payment earn less than the assumed 8.00% rate of interest, the Company will be required to make additional payments as necessary to augment the annual payments made by the Payment Banks pursuant to the agreements. If the December 31, 2002, LIBOR rate of 4.02% were to continue over the next ten years, the Company would be required to fund an additional estimated \$50 million during that period. Any additional payments made by the Company pursuant to the financing leases would increase the carrying value of its leasehold interest in the rigs and therefore be reflected in higher depreciation expense over their then-remaining useful lives. The Company does not expect that, if required, any additional payments made under these leases would be material to its financial position or results of operations in any given year.

There are no other material pending legal proceedings, other than ordinary routine litigation incidental to the business of the Company, to which the Company is a party or of which any of its property is the subject.

**Note 6 — Accumulated Other Comprehensive Loss**

The components of the Company's accumulated other comprehensive loss were as follows:

	Unrealized Gain (Loss) on Securities	Minimum Pension Liability Adjustment, Net of Tax	Accumulated Other Comprehensive Loss
		(In millions)	
Balance at December 31, 2000 .....	\$(0.3)	\$ (1.5)	\$ (1.8)
Net change for the year .....	(0.5)	(12.1)	(12.6)
Balance at December 31, 2001 .....	(0.8)	(13.6)	(14.4)
Net change for the year .....	0.5	(26.7)	(26.2)
Balance at December 31, 2002 .....	<u>\$(0.3)</u>	<u>\$(40.3)</u>	<u>\$(40.6)</u>

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

The minimum pension liability adjustments in the table above are shown net of a tax benefit of \$14.8 million in 2002 and a tax benefit of \$6.4 million in 2001. The tax effect of the unrealized holding gains and losses was immaterial for all periods presented.

**Note 7 — Derivative Financial Instruments and Fair Values of Financial Instruments**

***Derivative Instruments***

Two of the Company's cantilevered jackup rigs are currently operating under similar dayrate contracts that expose the Company to commodity price risk. These two-year agreements, expiring in May 2004 and October 2004, respectively, each contain a variable-dayrate formula linked to crude oil prices, whereby dayrates earned under these contracts increase or decrease in response to increases or decreases in oil prices. Dayrates under these agreements are calculated using a sliding scale formula based on the arithmetic average of the daily closing price of Light Sweet Crude on the New York Mercantile Exchange ("NYMEX"), subject to a maximum of \$28.00 per barrel and a minimum of \$12.00 per barrel.

The variable-dayrate formula contained in these agreements is comprised of multiple embedded derivative financial instruments as defined in SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities." The fair values of these embedded derivatives fluctuate in response to changes in oil prices. The net fair value of the embedded derivatives in each of these contracts was an asset of approximately \$2.5 million at December 31, 2002, or \$5.0 million in the aggregate.

As part of the Company's overall risk management strategy, the Company has entered into a number of commodity caps, swaps and floors designed to mitigate its exposure to fluctuations in fair values of the embedded derivatives in these contracts resulting from changes in oil prices. The fair values of these derivative financial instruments represented a total liability of \$5.0 million at December 31, 2002.

The Company manages its fair value risk related to its long-term debt by using interest rate swaps to convert a portion of its fixed-rate debt into variable-rate debt. Under these interest rate swaps, the Company agrees with other parties to exchange, at specified intervals, the difference between the fixed-rate and floating-rate amounts, calculated by reference to an agreed upon notional amount.

In October 2002, the Company entered into a fixed-for-floating interest rate swap with a notional amount of \$50 million, effective October 2002 through September 2007. This interest rate swap is intended to manage a portion of the fair value risk related to the Company's 7 $\frac{1}{8}$ % Notes due 2007. Under the terms of this swap, the Company has agreed to pay the counterparty an interest rate equal to the six-month LIBOR rate plus 330 basis points on the notional amount and the Company will receive the fixed 7 $\frac{1}{8}$ % rate. The estimated fair value of this swap was an asset of approximately \$1.6 million at December 31, 2002. The Company has designated this swap as a fair value hedge.

***Fair Values of Financial Instruments***

The estimated fair value of the Company's \$300 million principal amount 7 $\frac{1}{8}$ % Notes due 2007, based on quoted market prices, was \$342.4 million at December 31, 2002, compared to the carrying amount of \$301.3 million. The estimated fair value of the Company's \$300 million principal amount 7% Notes due 2028, based on quoted market prices, was \$333.9 million at December 31, 2002, compared to the carrying amount of \$296.7 million. The estimated fair value of the Company's \$600 million Zero Coupon Convertible Debentures due 2020, based on quoted market prices, was \$326.2 million at December 31, 2002, compared to the carrying amount of \$327.2 million.

The fair values of the Company's cash equivalents, marketable securities, trade receivables, and trade payables approximated their carrying values due to the short-term nature of these instruments (see Note 3).

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

***Concentrations of Credit Risk***

The market for the Company's services and products is the offshore oil and gas industry, and the Company's customers consist primarily of major integrated international oil companies and independent oil and gas producers. The Company performs ongoing credit evaluations of its customers and has not historically required material collateral. The Company maintains reserves for potential credit losses, and such losses have been within management's expectations.

The Company's cash deposits were distributed among various banks in the areas of the Company's operations throughout the world as of December 31, 2002. In addition, the Company had commercial paper, money-market funds and Eurodollar time deposits with a variety of financial institutions with strong credit ratings. As a result, the Company believes that credit risk in such instruments is minimal.

**Note 8 — Stock-Based Compensation Plans**

The Company has stock-based compensation plans under which it may grant shares of the Company's ordinary shares or options to purchase a fixed number of shares. Vesting periods for stock options and performance-based stock awards granted under the Company's various stock-based compensation plans range from two to four years. Stock options expire ten years after the grant date.

As a result of the Merger, all options to purchase Global Marine stock outstanding as of November 20, 2001, the effective date of the Merger, became immediately exercisable and were converted into options to purchase GlobalSantaFe Ordinary Shares. The number of GlobalSantaFe Ordinary Shares issuable upon exercise of these options is calculated by multiplying the number of shares of Global Marine originally issuable upon exercise of the option by the conversion ratio (0.665) as outlined in the merger agreement. The exercise price is calculated by dividing the original exercise price of the Global Marine options by the conversion ratio. All options to purchase Santa Fe International ordinary shares that were outstanding as of the Merger date also became immediately exercisable pursuant to the terms of the merger agreement.

At December 31, 2002, there were a total of 6,528,801 shares available for future grants under the Company's various stock-based compensation plans, including 327,486 shares reserved for issuance under the Company's Employee Share Purchase Plan.

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

***Stock Options***

A summary of the status of stock options granted, as adjusted for the conversion ratio as outlined in the merger agreement, is presented below:

	<u>Number of Shares Under Option</u>	<u>Weighted Average Exercise Price</u>
Shares under option at December 31, 1999 .....	6,293,202	\$18.65
Granted .....	1,830,213	\$33.11
Exercised .....	(1,069,426)	\$13.29
Canceled .....	<u>(138,753)</u>	\$29.35
Shares under option at December 31, 2000 .....	6,915,236	\$23.10
Granted .....	2,861,668	\$34.79
Exercised .....	(469,898)	\$16.35
Santa Fe International options .....	5,192,171	\$25.20
Canceled .....	<u>(88,713)</u>	\$32.37
Shares under option at December 31, 2001 .....	14,410,464	\$26.34
Granted .....	4,401,550	\$29.69
Exercised .....	(1,682,342)	\$14.66
Canceled .....	<u>(390,004)</u>	\$32.34
Shares under option at December 31, 2002 .....	<u>16,739,668</u>	\$28.25
Options exercisable at December 31,		
2000 .....	2,677,133	\$17.95
2001 .....	13,410,464	\$26.74
2002 .....	11,490,568	\$28.32

All stock options granted in 2000 through 2002 had exercise prices equal to the market price of the Company's ordinary shares on the date of grant.

The weighted average per share fair value of options as of the grant date was \$15.82 in 2002, \$13.29 in 2001 and \$11.73 in 2000. The weighted average per share fair value of the outstanding Santa Fe International options at November 20, 2001 was \$4.94.

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

The following table summarizes information with respect to stock options outstanding at December 31, 2002:

Range of Exercise Prices	Options Outstanding			Options Exercisable	
	Number Outstanding at 12/31/02	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Number Exercisable at 12/31/02	Weighted Average Exercise Price

	<u>16,739,668</u>	7.3	\$28.25	<u>11,490,568</u>	\$28.32

***Employee Share Purchase Plan***

The Company maintains the GlobalSantaFe Corporation 1997 Employee Share Purchase Plan (the "Share Purchase Plan"). The Share Purchase Plan is designed to furnish eligible employees of the Company and designated subsidiaries of the Company an incentive to advance the best interests of the Company by providing a formal program whereby they may voluntarily purchase ordinary shares of the Company at a favorable price and upon favorable terms. Generally speaking, substantially all covered employees who are scheduled to work an average of at least 20 hours per week are eligible to participate in the Share Purchase Plan.

Once a year, participants in the Share Purchase Plan will be granted options to purchase ordinary shares with a fair market value equal to the lesser of 10% of the participant's eligible compensation (as defined in the Share Purchase Plan) and the amount specified in Section 423(b) of the Code (currently \$25,000). The exercise price of the options is 85% of the fair market value of the ordinary shares on the date of the grant, or the date of exercise, whichever is less. Options granted under the Share Purchase Plan are exercisable on the date one year after the date of grant. Generally, participants pay option exercise prices through payroll deductions made ratably throughout the year. The Company granted options to purchase a total of 263,713 ordinary shares in 2002 under the Share Purchase Plan. The fair value of options granted under the Share Purchase Plan as of the grant date was \$9.61 per share for 2002.

***Performance-Based Stock Awards***

The Company offers ordinary shares to certain key employees at nominal or no cost to the employee. Under the Company's current plan, which covers grants for 2002 in the table below, the exact number of shares that each employee receives is dependent on Company performance over a one-year period as measured against performance goals with respect to operating performance and cash flow, among other measures. The performance period applicable to each offer ends on December 31 of the year of the grant. Data for 2001 and 2000 represent

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

shares granted under the Global Marine plan. A summary of the status of performance-based stock awards (prior year periods have been adjusted for the conversion ratio) is presented in the table that follows:

	<u>2002</u>	<u>2001</u>	<u>2000</u>
Number of contingent shares at beginning of year .....	—	286,873	330,428
Granted .....	148,752	142,975	142,975
Issued .....	—	(300,856)	—
Canceled .....	—	(128,992)	(186,530)
Number of contingent shares at end of year .....	<u>148,752</u>	<u>—</u>	<u>286,873</u>
Shares vested at December 31 .....	—	—	—
Fair value at grant date .....	\$ 23.92	\$ 29.36	\$ 19.32

The amount of compensation cost included in income for the Company's performance-based stock awards was \$1.3 million in 2002, \$4.6 million in 2001, and \$3.4 million in 2000.

**Note 9 — Retirement Plans**

**Pensions**

The Company has defined benefit pension plans covering all of its U.S. employees and a portion of its non-U.S. employees. For the most part, benefits are based on the employee's length of service and average earnings for the highest consecutive 60 months of compensation during the last ten years of service. Substantially all benefits are paid from funds previously provided to trustees. The Company is the sole contributor to the plans, with the exception of one of the Company's plans in the U.K., and its funding objective is to fund participants' benefits under the plans as they accrue, taking into consideration future salary increases. Net periodic pension cost for 2002 includes full-year costs related to the Santa Fe International plans. The components of net periodic pension benefit cost for the Company's pension plans were as follows:

	<u>2002</u>	<u>2001</u>	<u>2000</u>
	(In millions)		
Service cost — benefits earned during the period .....	\$ 13.4	\$ 4.7	\$ 4.5
Interest cost on projected benefit obligation .....	20.0	7.8	7.5
Expected return on plan assets .....	(18.5)	(8.5)	(8.9)
Recognized actuarial loss .....	4.2	0.4	0.8
Recognized actuarial loss-special termination benefits(1) .....	—	2.0	—
Amortization of prior service cost .....	<u>1.1</u>	<u>—</u>	<u>—</u>
Net periodic pension benefit cost .....	<u>\$ 20.2</u>	<u>\$ 6.4</u>	<u>\$ 3.9</u>

(1) Special termination costs related to certain pension plans are included in Restructuring costs in 2001. See discussion in Note 1.

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

The following table shows the changes in the projected benefit obligation and assets for all plans for the year ended December 31 and a reconciliation of the plans' funded status at year-end.

	<u>2002</u>	<u>2001</u>
	<u>(In millions)</u>	
Change in projected benefit obligation:		
Projected benefit obligation at beginning of year .....	\$ 252.8	\$109.5

Unrecognized prior service cost .....	<u>17.7</u>	<u>—</u>
Net amount recognized .....	<u>\$ (16.7)</u>	<u>\$ (25.2)</u>
	<u>2002</u>	<u>2001</u>
	<u>(In millions)</u>	
Amounts recognized in the balance sheet consist of:		
Accrued benefit liability .....	\$(92.1)	\$(46.8)
Intangible asset .....	13.1	0.8
Accumulated other comprehensive loss .....	<u>62.3</u>	<u>20.8</u>
Net amount recognized .....	<u>\$(16.7)</u>	<u>\$(25.2)</u>

During 2002, the Company made certain amendments to its pension plans, including, among other things, calculations of retirement benefit formulas, the amount of compensation included in these calculations and

## GLOBALSANTAFE CORPORATION AND SUBSIDIARIES

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

formulas used for the determination of early retirement benefits. These amendments were made to conform benefits received under the Global Marine and Santa Fe International plans. Benefits paid for 2002 included approximately \$11.4 million of lump-sum termination payments made as a result of the Merger.

The following table provides information related to those plans that were underfunded as of December 31. In the table, the projected benefit obligation ("PBO") is the actuarially computed present value of earned benefits based on service to date and includes the estimated effect of future salary increases. The accumulated benefit obligation ("ABO") is the actuarially computed present value of earned benefits based on service to date, but differs from the PBO in that it is based on current salary levels.

	2002	2001
	(In millions)	
Projected benefit obligation .....	\$338.8	\$146.4
Accumulated benefit obligation .....	\$284.5	\$130.1
Fair value of plan assets .....	\$194.5	\$ 87.7

The Company has established grantor trusts to provide funding for benefits payable under certain nonqualified plans. Assets in the trusts, which are irrevocable and can only be used to pay such benefits, with certain exceptions, are excluded from plan assets in the preceding tables in accordance with Statement of Financial Accounting Standards No. 87, "Employers' Accounting for Pensions." The fair market value of such assets was \$27.3 million at December 31, 2002, and \$19.2 million at December 31, 2001 (see Note 3).

The expected long-term rate of return on plan assets used to compute pension cost was 9% for 2002, 2001 and 2000. The assumed rate of increase in future compensation levels was 4.5% for 2002 and 2001, and 6.0% for 2000. The discount rate used to compute the projected benefit obligation was 6.75% for 2002, 7.25% for 2001 and 7.5% for 2000.

The Company has a defined contribution ("401(k)") savings plan in which substantially all of the Company's U.S. employees are eligible to participate. Company contributions to the 401(k) savings plan are based on the amount of employee contributions. The Company matches 100% of each participant's first six percent of compensation contributed to the plan. Charges to expense with respect to this plan totaled \$7.4 million for 2002, \$5.2 million for 2001 and \$3.9 million for 2000.

#### *Other Postretirement Benefits*

The Company provides health care benefits to all retirees who are U.S. citizens and to certain non-U.S. citizen employees who were participants in a U.S. based health care plan at the time of their retirement and elect to enroll for continued coverage. Generally, employees who have reached the age of 55 and have rendered a minimum of five years of service are eligible for health care benefits. For the most part, health care benefits require a contribution from the retiree. Prior to July 1, 2002, the Company also provided term life insurance to certain retirees, both U.S. citizens and non-U.S. citizens. Liabilities for postretirement health care and life insurance benefits were \$13.9 million at December 31, 2002, and \$13.3 million at December 31, 2001.

The weighted-average annual assumed rate of increase in the per capita cost of covered medical benefits was 11% in 2002 and 2001, and 7% in 2000. This 11% rate is expected to decrease ratably to 5% in 2009 and remain at that level thereafter. The health care cost trend rate assumption has a significant effect on the amounts reported. For example, as of and for the year ended December 31, 2002, increasing or decreasing the assumed health care cost trend rates by one percentage point each year would change the accumulated postretirement benefit obligation by approximately \$0.6 million and \$0.5 million, respectively, and the aggregate of the service and interest cost components of net periodic postretirement benefit by approximately \$35,000 and \$32,000, respectively.

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

**Note 10 — Income Taxes**

Income before income taxes was comprised of the following:

	<u>2002</u>	<u>2001</u>	<u>2000</u>
		(In millions)	
United States .....	\$(76.4)	\$147.2	\$103.4
Foreign .....	<u>389.0</u>	<u>175.3</u>	<u>51.9</u>
Income before income taxes .....	<u>\$312.6</u>	<u>\$322.5</u>	<u>\$155.3</u>

Income taxes have been provided based upon the tax laws and rates in the countries in which operations are conducted and income is earned. The Company is a Cayman Islands company. The Cayman Islands does not impose corporate income taxes. The Company's U.S. subsidiaries are subject to a U.S. tax rate of 35%.

At December 31, the provision for income taxes consisted of the following:

	<u>2002</u>	<u>2001</u>	<u>2000</u>
		(In millions)	
Current — Foreign .....	\$ 53.4	\$ 20.1	\$11.2
— U.S. federal .....	<u>0.1</u>	<u>2.1</u>	<u>1.2</u>
	<u>53.5</u>	<u>22.2</u>	<u>12.4</u>
Deferred — Foreign .....	6.2	0.1	(2.2)
— U.S. federal .....	<u>(25.0)</u>	<u>101.4</u>	<u>31.2</u>
	<u>(18.8)</u>	<u>101.5</u>	<u>29.0</u>
Provision for income taxes .....	<u>\$ 34.7</u>	<u>\$123.7</u>	<u>\$41.4</u>

A reconciliation of the differences between the Company's income tax provision computed at the appropriate statutory rate and the Company's reported provision for income taxes follows:

	<u>2002</u>	<u>2001</u>	<u>2000</u>
		(\$ in millions)	
Income tax provision at statutory rate (Cayman Islands rate in 2002 and 2001, and U.S. rate in 2000) .....	\$ —	\$ —	\$54.4
Taxes on U.S. and foreign earnings at greater than the Cayman Islands rate .....	12.6	98.9	—
Taxes on foreign earnings at less than the U.S. rate .....	—	—	(9.7)
Permanent differences .....	3.2	—	(0.1)
Adjustments to contingencies related to closed years .....	—	(55.7)	—
Change in valuation allowance(1) .....	21.1	80.5	—
Other, net .....	<u>(2.2)</u>	<u>—</u>	<u>(3.2)</u>
Provision for income taxes .....	<u>\$34.7</u>	<u>\$123.7</u>	<u>\$41.4</u>
Effective tax rate .....	<u>11%</u>	<u>38%</u>	<u>27%</u>

(1) The 2001 amount is comprised of the net change in the valuation allowance for the year of \$105.9 million less \$25.4 million of valuation allowance acquired from Santa Fe International at the time of the Merger.

The Company intends to permanently reinvest all of the unremitted earnings of its U.S. Subsidiaries in their businesses. As a result, the Company has not provided for deferred taxes on \$1.2 billion of cumulative unremitted

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

earnings at December 31, 2002. Should the Company make a distribution from the unremitted earnings of its U.S. Subsidiaries, the Company would be required to record additional U.S. deferred taxes. It is not practicable to estimate the amount of deferred tax liability associated with these unremitted earnings.

In certain circumstances, management expects that, due to the changing demands of the offshore drilling markets, the Company's mobile assets are more likely than not to be redeployed to other locations before those assets operate in certain jurisdictions long enough to give rise to future tax consequences. As a result, no deferred tax liability has been recognized on the earnings from these assets. In addition, the Company has not provided for U.S. deferred taxes on foreign earnings that could be taxed in the United States upon the occurrence of certain events in a future period. The Company plans, subject to approval by its Board of Directors, to implement a business restructuring that will better integrate the operations of the Company. This integration will change the U.S. tax classification of certain of its subsidiaries before the occurrence of any events that could give rise to a tax liability. Should management's expectations change regarding the length of time a mobile asset will be operating in a given location, or should the Company choose not to implement the planned business restructuring, the Company would be required to record additional deferred taxes that could have a material adverse effect on its financial position, results of operations and cash flows.

Deferred tax assets and liabilities are recorded in recognition of the expected future tax consequences of events that have been recognized in the Company's financial statements or tax returns. The significant components of the Company's deferred tax assets and liabilities as of December 31 were as follows:

	<u>2002</u>	<u>2001</u>
	(In millions)	
Deferred tax assets:		
Net operating loss carryforwards — U.S. ....	\$ 189.1	\$ 139.5
Net operating loss carryforwards — various foreign .....	55.1	80.2
Tax credit carryforwards .....	15.2	18.0
Accrued expenses not currently deductible.....	35.3	23.2
Other .....	<u>13.6</u>	<u>13.0</u>
	308.3	273.9
Less: Valuation allowance .....	<u>(167.7)</u>	<u>(146.6)</u>
Deferred tax assets, net of valuation allowance .....	<u>140.6</u>	<u>127.3</u>
Deferred tax liabilities:		
Depreciation and depletion for tax in excess of book expense .....	135.1	153.4
Tax benefit transfers .....	4.3	6.6
Other .....	<u>2.9</u>	<u>6.8</u>
Total deferred tax liabilities .....	<u>142.3</u>	<u>166.8</u>
Net future income tax liability .....	<u>\$ (1.7)</u>	<u>\$ (39.5)</u>

In 2002, based upon currently anticipated market conditions in the United States, the Company did not adjust the valuation allowance against the U.S. NOL carryforwards.

In 2001, the valuation allowance increased by approximately \$105.9 million, of which \$102.9 million related to U.S. NOL carryforwards. The \$102.9 million increase in the valuation allowance was partially offset by a \$55.7 million adjustment to prior years' tax contingencies, resulting in a net charge in the fourth quarter of 2001 of \$47.2 million. The Company recorded a valuation allowance against its U.S. NOL carryforwards because the Company believes it is more likely than not that it will not generate sufficient U.S. taxable income to fully utilize its NOL carryforwards before they expire. Reduced activity levels in the U.S. Gulf of Mexico in 2001 contributed

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

to a decrease in the expected future earnings of the Company's U.S. subsidiaries. Also, as a result of the Merger, the expiration dates of the Company's NOL carryforwards were accelerated by one year, decreasing the number of years available to fully utilize the NOL carryforwards before they expire. In addition, the Company had previously recorded a valuation allowance against the net deferred tax assets in certain foreign jurisdictions. These net deferred tax assets decreased by approximately \$22.4 million in 2001 and increased by \$21.1 million in 2002. The valuation allowance recorded against the net deferred tax asset changed accordingly in each respective year.

At December 31, 2002, the Company had \$540.4 million of U.S. NOL carryforwards. In addition, the Company has \$15.2 million of non-expiring U.S. alternative minimum tax credit carryforwards. Both the NOL carryforwards and the U.S. alternative minimum tax credit carryforwards can be used to reduce the Company's U.S. federal income taxes payable in future years. The NOL carryforwards subject to expiration expire as follows (in millions):

<u>Year ended December 31:</u>	<u>Total</u>	<u>United States</u>	<u>Foreign</u>
2003 .....	\$ 6.8	\$ —	\$ 6.8
2004 .....	227.5	214.5	13.0
2005 .....	91.2	82.8	8.4
2006 .....	20.7	19.6	1.1
2007 .....	34.1	34.1	—
2008 .....	18.8	18.8	—
2012 .....	0.2	0.2	—
2018 .....	22.9	22.9	—
2023 .....	<u>147.5</u>	<u>147.5</u>	<u>—</u>
Total .....	<u>\$569.7</u>	<u>\$540.4</u>	<u>\$29.3</u>

In addition, the Company also had \$63.5 million and \$75.6 million of non-expiring NOL carryforwards in the United Kingdom and Trinidad and Tobago, respectively.

The Company's ability to realize the benefit of its deferred tax asset requires that the Company achieve certain future earnings levels prior to the expiration of its NOL carryforwards. The Company has established a valuation allowance against the future tax benefit of a portion of its NOL carryforwards and could be required to further adjust that valuation allowance if market conditions change materially and future earnings are, or are projected to be, significantly different from its current estimates. The Company's NOL carryforwards are subject to review and potential disallowance upon audit by the tax authorities in the jurisdictions where the loss was incurred.

As of December 31, 2002, Global Marine and its U.S. subsidiaries had approximately \$540.4 million of NOL carryforwards for United States federal income tax purposes. This amount included an NOL carryforward of \$408.4 million at November 19, 2001, related to Global Marine. The Company also had approximately \$168.4 million of NOL carryforwards from foreign jurisdictions. The Company can provide no assurance that the full amount of its NOL carryforwards will be allowed. The NOL carryforwards are scheduled to expire from 2003 to 2023. Section 382 of the U.S. Internal Revenue Code could limit the future use of the NOL carryforwards if the direct and indirect ownership of stock of the relevant company changes by more than 50% in certain circumstances over a prescribed testing period. The Internal Revenue Service may take the position that the Merger caused a greater-than-50% ownership change with respect to Global Marine (see Note 1). If the Merger did not result in such an ownership change, changes in the ownership of the Company's stock following the Merger could result in such an ownership change. In the event of such an ownership change, the Section 382 rules would limit the utilization of the NOL carryforwards of Global Marine in each taxable year ending after the

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

ownership change to an amount equal to a federal long-term tax-exempt rate published monthly by the Internal Revenue Service, multiplied by the fair market value of all of Global Marine's stock at the time of the ownership change. For this purpose, the value of Global Marine's stock could also be subject to adjustments, thereby further limiting the ability of the Company to utilize its NOL carryforwards in each taxable year thereafter.

**Note 11 — Earnings Per Ordinary Share**

A reconciliation of the numerators and denominators of the basic and diluted per share computations for net income follows:

	<u>2002</u>	<u>2001</u>	<u>2000(1)</u>
	(\$ in millions, except share and per share amounts)		
Net income (numerator):			
Net income — Basic .....	\$ 277.9	\$ 198.8	\$ 113.9
Add: Interest savings (net of tax) on assumed conversion of Zero Coupon Convertible Debentures .....	<u>—</u>	<u>7.0</u>	<u>—</u>
Net income — Diluted .....	<u>\$ 277.9</u>	<u>\$ 205.8</u>	<u>\$ 113.9</u>
Ordinary shares (denominator):			
Shares — Basic .....	233,747,710	130,544,893	116,600,920
Add:			
Effect of employee stock options .....	2,707,061	2,089,233	2,662,230
Shares issuable upon assumed conversion of Zero Coupon Convertible Debentures .....	<u>—</u>	<u>4,875,062</u>	<u>—</u>
Shares — Diluted .....	<u>236,454,771</u>	<u>137,509,188</u>	<u>119,263,150</u>
Earnings per ordinary share:			
Basic .....	\$ 1.19	\$ 1.52	\$ 0.98
Diluted .....	\$ 1.18	\$ 1.50	\$ 0.95

(1) Earnings per share data for 2000 has been restated to reflect the effect of the exchange ratio of 0.665 established in the Merger.

The computation of diluted earnings per share excludes outstanding stock options with exercise prices greater than the average market price of the Company's ordinary shares for the year, because the inclusion of such options would be antidilutive. The number of antidilutive options that were excluded from diluted earnings per ordinary share and could potentially dilute basic earnings per ordinary share in the future were 9,401,866 shares in 2002, 4,668,834 shares in 2001, and 610,641 shares in 2000. Antidilutive options for 2000 have been restated to reflect the effect of the exchange ratio of 0.665 established in the merger agreement.

As discussed in Note 4, holders of the Zero Coupon Convertible Debentures have the right to require the Company to repurchase the debentures on June 23, 2005, June 23, 2010, and June 23, 2015. The Company may pay the repurchase price with either cash or shares or a combination thereof. The Company does not anticipate using ordinary shares to satisfy any such future purchase obligation.

**Note 12 — Supplemental Cash Flow Information**

During the year ended December 31, 2002, the Company incurred approximately \$12.8 million of capital expenditures related to its rig building program that had been accrued but not paid as of December 31, 2002. These amounts are included in Accounts payable in the Consolidated Balance Sheet at December 31, 2002.

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

In December 2002, the Company's Board of Directors declared a regular quarterly cash dividend in the amount of \$0.0325 per ordinary share. The dividend in the amount of \$7.6 million was paid on January 15, 2003, to shareholders of record as of the close of business on December 31, 2002.

On November 20, 2001, Global Marine merged with a subsidiary of Santa Fe International. The following table summarizes the allocation of the purchase price to the specific assets and liabilities of Santa Fe International based on estimates of fair values and costs at the time of the Merger.

	(In millions)
Current assets .....	\$ 526.7
Properties, plant and equipment .....	1,958.7
Other assets .....	38.1
Goodwill .....	<u>382.1</u>
	2,905.6
Current liabilities .....	(259.4)
Deferred income taxes .....	(17.5)
Other liabilities .....	<u>(61.6)</u>
	<u>\$2,567.1</u>

In June 2001, the Company completed the sale of the *Glomar Beaufort Sea I* concrete island drilling system to Exxon Neftegas Limited for \$45.0 million. The Company received \$5.0 million in cash at closing with the remainder of the purchase price in the amount of \$40.0 million, plus interest, being due on or before March 1, 2003. The Company received approximately \$35 million (including accrued interest), net of \$7 million in sales commissions and payments to minority owners, during the first quarter of 2002, representing full payment of the remaining purchase price.

Cash payments for interest, net of amounts capitalized, totaled \$21.9 million, \$41.3 million and \$29.5 million for the years ended December 31, 2002, 2001 and 2000, respectively. Cash payments for income taxes, net of refunds, totaled \$51.8 million, \$14.5 million and \$6.6 million for the years ended December 31, 2002, 2001 and 2000, respectively.

**Note 13 — Segment and Geographic Information**

The Company has three lines of business, each organized along the basis of services and products and each with a separate management team. The Company's three lines of business are reported as separate operating segments and consist of contract drilling, drilling management services and oil and gas. The Company's contract drilling business provides crewed, mobile offshore and land drilling rigs to oil and gas operators on a daily rate basis and is also referred to as dayrate drilling. The drilling management services business, also referred to as turnkey drilling, designs, develops, and executes specific offshore drilling programs and delivers a logged or cased hole to an agreed depth for a guaranteed price. The Company's oil and gas business participates in exploration and production activities, principally in order to facilitate the acquisition of turnkey contracts for the Company's drilling management services operations.

The Company evaluates and measures segment performance on the basis of operating income. Segment operating income is inclusive of intersegment revenues. Such revenues, which have been eliminated from the consolidated totals, are recorded at transfer prices, which are intended to approximate the prices charged to external customers. Segment operating income consists of revenues less the related operating costs and expenses and excludes interest expense, interest income and corporate expenses. Segment assets consist of all current and long-lived assets, exclusive of affiliate receivables and investments.

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

Information by operating segment, together with reconciliations to the consolidated totals, is presented in the following table:

	<u>Contract Drilling</u>	<u>Drilling Management Services</u>	<u>Oil and Gas</u>	<u>Corporate</u>	<u>Eliminations and Other</u>	<u>Consolidated</u>
	(In millions)					
Revenues from External Customers(1)						
2002 .....	\$1,606.5	\$400.6	\$10.6			\$2,017.7

2000 .....	175.9	0.2	0.3	1.4	—	177.8
Segment Assets						
2002 .....	5,186.1	67.6	18.0	536.5	—	5,808.2
2001 .....	4,758.6	34.6	12.0	723.7	—	5,528.9
Goodwill						
2002 .....	386.4	0.5	—	—	—	386.9
2001 .....	382.1	0.5	—	—	—	382.6

(1) Revenues for prior periods have been reclassified to include certain reimbursements received for out-of-pocket expenditures as revenues (Note 1).

(2) Restructuring costs are discussed in Note 1.

(3) Capital expenditures for 2002 include approximately \$12.8 million of capital expenditures related to the Company's rig building program that had been accrued but not paid as of December 31, 2002 (Note 12).

One customer accounted for more than 10% of consolidated revenues for 2002: ExxonMobil provided \$267.7 million of contract drilling revenues and \$0.1 million of drilling management services revenues. In 2001, two customers each accounted for more than 10% of consolidated revenues: ExxonMobil provided \$180.1 million of contract drilling revenues, and BP provided \$146.0 million of contract drilling revenues and \$1.6 million

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

of drilling management services revenues. No single customer accounted for more than ten percent of consolidated revenues in 2000.

The Company is incorporated in the Cayman Islands; however, all of its operations are located in countries other than the Cayman Islands. Revenues and assets by geographic area in the tables that follow were attributed to countries based on the physical location of the assets. The mobilization of rigs among geographic areas has affected area revenues and long-lived assets over the periods presented. Revenues from external customers by geographic areas were as follows:

	<u>2002</u>	<u>2001</u>	<u>2000</u>
		(In millions)	
United Kingdom .....	\$ 535.3	\$ 174.5	\$ 110.3
Nigeria .....	105.2	86.7	44.2
Trinidad and Tobago .....	70.7	80.7	28.5
Other foreign countries(1) .....	<u>697.6</u>	<u>238.8</u>	<u>132.4</u>
Total foreign revenues .....	1,408.8	580.7	315.4
United States .....	<u>608.9</u>	<u>802.9</u>	<u>743.3</u>
Total revenues .....	<u><u>\$2,017.7</u></u>	<u><u>\$1,383.6</u></u>	<u><u>\$1,058.7</u></u>

(1) Individually less than 5% of consolidated revenues for 2002, 2001 and 2000.

Long-lived assets by geographic areas, based on their physical location at December 31, were as follows:

	<u>2002</u>	<u>2001</u>
		(In millions)
Properties and equipment:		
United Kingdom .....	\$ 918.3	\$1,070.9
Other foreign countries(1) .....	<u>1,777.8</u>	<u>1,306.3</u>
Total foreign long-lived assets .....	2,696.1	2,377.2
United States .....	<u>1,025.9</u>	<u>1,364.5</u>
Total productive assets .....	3,722.0	3,741.7
Construction in progress — Singapore .....	<u>472.0</u>	<u>155.9</u>
Total properties and equipment .....	4,194.0	3,897.6
Goodwill .....	<u>386.9</u>	<u>382.6</u>
Total long-lived assets .....	<u><u>\$4,580.9</u></u>	<u><u>\$4,280.2</u></u>

(1) Individually less than 10% of consolidated long-lived assets at December 31, 2002 and 2001.

**Note 14 — Transactions with Affiliates**

In connection with its initial public offering, Santa Fe International entered into an intercompany agreement with Kuwait Petroleum Corporation and SFIC Holdings, which agreement was amended in connection with the Merger. The intercompany agreement, as amended, provides that, as long as Kuwait Petroleum Corporation and its affiliates, in the aggregate, own at least 10% of the Company, the consent of SFIC Holdings is required to change the jurisdiction of any existing subsidiary of the Company or incorporate a new subsidiary in any jurisdiction in a manner materially adversely affecting the rights or interests of Kuwait Petroleum Corporation and its affiliates or reincorporate the Company in another jurisdiction. The intercompany agreement, as amended,

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

also provides SFIC Holdings the right to designate up to three representatives to the Company's Board of Directors based on SFIC Holdings' ownership percentage in the Company and provides SFIC Holdings rights to access certain information concerning the Company. SFIC Holdings currently holds approximately 18.7% of the outstanding ordinary shares of the Company.

The Company provides contract drilling services in Kuwait to the Kuwait Oil Company, K.S.C. ("KOC"), a subsidiary of Kuwait Petroleum Corporation, and also provides contract drilling services to a partially owned affiliate of KOC in the Kuwait-Saudi Arabian Partitioned Neutral Zone. Such services are performed pursuant to drilling contracts containing terms and conditions and rates of compensation that materially approximate those customarily included in arm's-length contracts of a similar nature. In connection therewith, KOC provides the Company rent-free use of certain land and maintenance facilities and has committed to providing same, subject to the availability of the maintenance facilities, through the current term of the drilling contracts and extensions thereof as may be agreed. In relation to its drilling business in Kuwait, the Company has an agency agreement with a subsidiary of Kuwait Petroleum Corporation that obligates the Company to pay an agency fee based on a percentage of revenues. The Company believes the terms of this agreement are more favorable than those which could be obtained with an unrelated third party in an arm's-length negotiation, but the value of such terms is currently immaterial to the Company's results of operations.

During the year ended December 31, 2002, the Company earned revenues from KOC and its affiliate for performing contract drilling services in the ordinary course of business totaling \$62.7 million and paid \$586,000 of agency fees pursuant to such agency agreement. During the period following the Merger until December 31, 2001, the Company earned revenues from KOC and its affiliate totaling \$6.9 million and paid \$80,000 of agency fees. At December 31, 2002 and 2001, the Company had accounts receivable from affiliates of Kuwait Petroleum Corporation of \$11.1 million and \$9.9 million, respectively.

**Note 15 — Summarized Financial Data — Global Marine Inc. and Subsidiaries**

Global Marine Inc. ("Global Marine"), a wholly owned subsidiary of GlobalSantaFe Corporation, is a domestic and international offshore drilling contractor, with a fleet of 33 mobile offshore drilling rigs worldwide. Global Marine, through its subsidiaries, provides offshore drilling services on a dayrate basis in the U.S. Gulf of Mexico and internationally, provides drilling management services on a turnkey basis, and also engages in oil and gas exploration, development and production activities, principally in order to facilitate the acquisition of turnkey contracts for its drilling management services operations.

Summarized financial information for Global Marine and its consolidated subsidiaries follows:

	Year Ended December 31,		
	2002	2001	2000
	(In millions)		
Sales and other operating revenues(1) .....	\$1,223.7	\$1,286.6	\$1,058.7
Operating income .....	136.2	303.1	188.5
Net income .....	74.2	171.2	113.9

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

	December 31,	
	2002	2001
	(In millions)	
Current assets .....	\$ 791.0	\$ 621.0
Net properties and equipment .....	1,887.4	1,897.9
Other assets .....	103.6	96.5
Current liabilities .....	260.7	174.1
Total long-term debt(2) .....	941.9	929.2
Other long-term liabilities .....	81.5	73.0
Net equity .....	1,497.9	1,439.1

(1) Prior period amounts have been reclassified to include certain reimbursements received for out-of-pocket expenses as revenues per EITF Issue 01-14 (Note 1). These amounts were previously recorded as a reduction of the related expenses incurred.

(2) Includes capitalized lease obligation.

**Note 16 — Recent Accounting Pronouncements**

In 2001, the Financial Accounting Standards Board (“FASB”) issued SFAS No. 142, “Goodwill and Other Intangible Assets,” SFAS No. 143, “Accounting for Asset Retirement Obligations” and SFAS No. 144, “Accounting for the Impairment or Disposal of Long-Lived Assets.” The Company adopted the provisions of SFAS No. 142 and SFAS No. 144 effective January 1, 2002.

SFAS No. 142 primarily addresses the accounting for goodwill and intangible assets subsequent to their initial recognition. The key provisions of SFAS No. 142:

- Eliminate the amortization of goodwill and indefinite-lived intangible assets;
- Require that goodwill and indefinite-lived intangible assets be tested at least annually for impairment (and in interim periods if certain events occur indicating that the carrying value of goodwill and/or indefinite-lived intangible assets may be impaired); and
- Require that reporting units be identified for the purpose of assessing potential future impairments of goodwill.

At December 31, 2002, Goodwill in the Company’s Condensed Consolidated Balance Sheet totaled approximately \$386.9 million, substantially all of which was recorded in connection with the Merger (see Note 1). The Company has defined reporting units within its contract drilling segment based upon economic and market characteristics of these units. All of the goodwill recorded in connection with the Merger has been allocated to the jackup drilling fleet reporting unit, as these rigs were the primary source of value in the Merger discussions and negotiations. The estimated fair value of this reporting unit for purposes of the Company’s annual goodwill impairment testing is based upon the present value of its estimated future net cash flows, utilizing a discount rate based upon the Company’s cost of capital. The Company has completed its goodwill impairment testing for 2002 and was not required to record a goodwill impairment loss. The amortization of goodwill existing before the Merger was immaterial.

SFAS No. 143 establishes accounting standards for the recognition and measurement of liabilities in connection with asset retirement obligations, and is effective for fiscal years beginning after June 15, 2002. The Company does not anticipate that the required adoption of SFAS No. 143 in 2003 will have a material effect on its results of operations, financial position or cash flows.

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

SFAS No. 144 addresses financial accounting and reporting for the impairment or disposal of long-lived assets. SFAS No. 144, among other things:

- Establishes criteria to determine when a long-lived asset is held for sale, including a group of assets and liabilities that represents the unit of accounting for a long-lived asset classified as held for sale;
- Provides guidance on the accounting for a long-lived asset if the criteria for classification as held for sale are met after the balance sheet date but before the issuance of the financial statements; and
- Provides guidance on the accounting for a long-lived asset classified as held for sale.

The adoption of SFAS No. 144 did not have a material impact on the Company's results of operations, financial position or cash flows.

In May 2002, the FASB issued SFAS No. 145, "Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement No. 13, and Technical Corrections." The Company adopted SFAS No. 145 in the second quarter of 2002. SFAS No. 145, among other things, addresses the criteria for the classification of extinguishment of debt as an extraordinary item and addresses the accounting treatment of certain sale-leaseback transactions. The adoption of SFAS No. 145 did not have a material impact on the Company's results of operations, financial position or cash flows.

In July 2002, the FASB issued SFAS No. 146, "Accounting for Costs Associated with Exit or Disposal Activities." SFAS No. 146 requires that a liability for a cost associated with an exit or disposal activity be recognized when the liability is incurred, rather than the date of an entity's commitment to an exit plan. The provisions of this statement are effective for exit or disposal activities that are initiated after December 31, 2002. The Company does not anticipate that the required adoption of SFAS No. 146 will have a material effect on its results of operations, financial position or cash flows.

In December 2002, the FASB issued SFAS No. 148, "Accounting for Stock-Based Compensation — Transition and Disclosure," which amends SFAS No. 123, "Accounting for Stock-Based Compensation." SFAS No. 148 provides three alternative methods of transition and disclosure requirements for a voluntary change to the fair value based method of accounting for stock-based employee compensation. The three alternative methods available are: (1) the prospective method, (2) the modified prospective method, and (3) the retroactive restatement method. Under the prospective method, which is available only for companies converting to SFAS No. 123 prior to December 16, 2003, compensation cost is recognized for awards granted, modified or settled after the beginning of the year of adoption. The modified prospective method recognizes compensation costs from the beginning of the year of adoption as if the fair value method had been used for all grants awarded, modified or settled in fiscal years beginning after December 15, 1994. The retroactive restatement method provides that all periods presented are restated to reflect compensation costs as if the fair value method had been used for all grants awarded, modified or settled in fiscal years beginning after December 15, 1994. In addition to providing compensation cost recognition methods, SFAS No. 148 also requires certain disclosures, including method used for each period presented, a description of the method used to report the change in accounting principle and continuing tabular presentation of proforma net income and earnings per share effects for any awards outstanding under the intrinsic method of Accounting Principles Board Opinion No. 25. SFAS No. 148 is effective for fiscal years ending after December 15, 2002. The Company has adopted the disclosure provisions of SFAS No. 148, and is currently evaluating the potential effects of the implementation of the transition requirements of this Statement on its financial position and results of operations.

In November 2002, the FASB issued Interpretation No. 45; "Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others" ("FIN 45"). This Interpretation provides disclosures to be made by a guarantor in its interim and annual financial statements about its obligations under certain guarantees that it has issued and clarifies that a liability for the fair value of the obligation undertaken in issuing certain guarantees shall be recognized at inception of the guarantee. FIN 45 does

**GLOBALSANTAFE CORPORATION AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)**

not, however, prescribe a specific approach for subsequently measuring the guarantor's recognized liability over the term of the related guarantee. The initial recognition and initial measurement provisions of FIN 45 are applicable to guarantees issued or modified after December 31, 2002. The disclosure requirements of FIN 45 are effective for financial statements of interim or annual periods ending after December 15, 2002. The Company believes that it has no material guarantees within the scope of FIN 45 other than the fully defeased financing leases for two of its drillships (see Note 5).

In January 2003, the FASB issued Interpretation No. 46, "Consolidation of Variable Interest Entities, an Interpretation of ARB No. 51" ("FIN 46"). This interpretation provides guidance on the identification of, and financial reporting for, entities over which control is achieved through means other than voting rights, or variable-interest entities ("VIEs"). FIN 46 is effective for public entities with VIEs created before February 1, 2003, at the beginning of the first interim or annual reporting period starting after June 15, 2003. For VIEs created after January 31, 2003, FIN 46 is effective immediately. Upon the applicable effective date, FIN 46 will become the guidance that determines whether consolidation is required or whether the variable-interest accounting model must be used to account for existing and new entities. The Company does not believe that it currently has any VIEs within the scope of FIN 46.

## CONSOLIDATED SELECTED QUARTERLY FINANCIAL DATA (Unaudited)

In the following table, the Company's operating results for 2002 reflect the operations of the combined company. The Company's operating results for the fourth quarter of 2001 include Global Marine's operations for the full quarter and Santa Fe International's operations from the merger date (42 days), while the Company's quarterly operating results for the first three quarters of 2001 represent Global Marine only. The consolidated selected quarterly financial data should be read in conjunction with "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations" and the audited consolidated financial statements and the notes thereto included under "Item 8. Financial Statements and Supplementary Data."

	2002				2001			
	Fourth Quarter	Third Quarter	Second Quarter	First Quarter	Fourth Quarter	Third Quarter	Second Quarter	First Quarter
(In millions, except per share data)								
Revenues(1) .....	\$512.9	\$514.4	\$501.7	\$488.7	\$397.4	\$322.6	\$382.5	\$281.1
Operating income .....	59.6	90.7	88.7	92.8	79.4	90.5	95.4	64.6
Net income .....	52.4	75.0	73.4	77.1	11.7	62.1	84.3	40.7
Earnings per ordinary share:(2)								
Basic .....	0.23	0.32	0.31	0.33	0.07	0.53	0.72	0.35
Diluted .....	0.22	0.32	0.31	0.33	0.07	0.52	0.69	0.34
Net income includes the following special items:								
Gain on sale of special- purpose rig .....	—	—	—	—	—	—	22.8	—
Provision for income taxes(3)	—	—	—	—	(47.2)	—	—	—
Cash dividends declared per ordinary share:(4) .....	0.0325	0.0325	0.0325	0.0325	0.0325	—	—	—
Price ranges of ordinary shares:(5)								
High .....	26.20	27.15	36.40	33.13	29.39	27.38	43.23	49.23
Low .....	21.90	19.33	27.35	25.00	20.27	19.17	27.74	36.96

(1) Revenues for the first quarter of 2002 and all 2001 periods have been reclassified pursuant to EITF Issue 01-14 (Note 1).

(2) Per share data of Global Marine prior to the Merger has been restated to reflect the effect of the exchange ratio of 0.665 established in the merger agreement.

(3) The Company established a valuation allowance in the fourth quarter 2001 against a tax asset related to its United States net operating loss (NOL) carryforwards. As a result of the Merger, the Company's NOL expirations were accelerated by a year. In addition, reduced activity levels in the U.S. Gulf of Mexico in 2001 contributed to a decrease in the expected future earnings of the Company's U.S. subsidiaries.

(4) In the fourth quarter 2001, the Company's Board of Directors declared a regular quarterly cash dividend of \$0.0325 per ordinary share. Global Marine historically did not pay dividends on its common stock.

(5) Data for 2001 represents the high and low share prices of Global Marine common shares up to the merger date, as adjusted to reflect the exchange ratio of 0.665 established in the Merger.

## **REPORT OF INDEPENDENT ACCOUNTANTS**

To the Board of Directors and Shareholders of GlobalSantaFe Corporation:

Our audits of the consolidated financial statements referred to in our report dated March 21, 2003, appearing in the 2002 Annual Report on Form 10-K of GlobalSantaFe Corporation and subsidiaries also included an audit of the financial statement schedule listed in Item 15(a)(2) of this Form 10-K. In our opinion, this financial statement schedule presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements.

PRICEWATERHOUSECOOPERS LLP

Houston, Texas  
March 21, 2003

**Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure***

Not applicable.

**PART III**

**Item 10. *Directors and Executive Officers of the Registrant***

As permitted by General Instruction G, the information called for by this item with respect to the Company's directors, and the information required by this item and Item 405 of Regulation S-K with respect to filings under Section 16 of the 1934 Securities Exchange Act, is incorporated by reference from the Company's definitive proxy statement to be filed pursuant to Regulation 14A within 120 days after the end of the last fiscal year. Information with respect to the Company's executive officers required by Item 401 of Regulation S-K is set forth in Part I of this Annual Report on Form 10-K under the caption "Executive Officers of the Registrant."

**Item 11. *Executive Compensation***

As permitted by General Instruction G, the information called for by this item is incorporated by reference from the Company's definitive proxy statement to be filed pursuant to Regulation 14A within 120 days after the end of the last fiscal year.

**Item 12. *Security Ownership of Certain Beneficial Owners and Management***

As permitted by General Instruction G, the information called for by this item is incorporated by reference from the Company's definitive proxy statement to be filed pursuant to Regulation 14A within 120 days after the end of the last fiscal year.

**Item 13. *Certain Relationships and Related Transactions***

As permitted by General Instruction G, the information called for by this item is incorporated by reference from the Company's definitive proxy statement to be filed pursuant to Regulation 14A within 120 days after the end of the last fiscal year.

**Item 14. *Controls and Procedures***

Within the 90 days prior to the date of this report, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Rule 13a-14 of the Securities Exchange Act of 1934. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company (including its consolidated subsidiaries) required to be included in the Company's periodic Securities and Exchange Commission filings. There have been no significant changes in the Company's internal controls or in other factors that could significantly affect internal controls subsequent to the date the Company completed its evaluation.

## PART IV

### Item 15. *Exhibits, Financial Statement Schedules, and Reports on Form 8-K*

## CERTIFICATIONS

I, C. Stedman Garber, Jr., certify that:

1. I have reviewed this annual report on Form 10-K of GlobalSantaFe Corporation;
2. Based on my knowledge, this annual report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this annual report;
3. Based on my knowledge, the financial statements, and other financial information included in this annual report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this annual report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and have:
  - a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this annual report is being prepared;
  - b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this annual report (the "Evaluation Date"); and
  - c) presented in this annual report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
  - a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and
  - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and
6. The registrant's other certifying officers and I have indicated in this annual report whether there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
